

June 2025 Quarter Production Update

Record free cash flow of \$67 million as Bellevue exits FY25 at record production rates

Bellevue Gold Limited (Bellevue or the Company) (ASX: BGL) provides the following preliminary production and financial update for the June 2025 quarter. Full quarterly results will be released in the quarterly report later in July 2025.

Strong cash build during the June 2025 quarter

- Record free cash flow of \$67 million¹ (March 2025 quarter: \$30 million outflow).
- Cash and gold on hand at 30 June 2025 increased by \$65 million during the quarter to A\$152 million (March 2025 quarter: \$49 million, Pro-forma²: \$87 million).
- Gold production for the June 2025 quarter was 38,941oz, following a record 287k tonnes processed at 4.5 g/t and 94.4% recovery. During the month of June 2025, recoveries were ~95% following modifications implemented as part of the plant upgrade during the quarter.
- Gold sales totalled 38,754oz at an average sale price of A\$5,147/oz with all gold sold at spot gold prices. Gold sold across the full FY25 year was 130,164oz.
- Debt remains unchanged at \$100M and no minimum mandatory principal repayments until CY27.

June 2025 quarter production update

- Quarterly gold production was impacted by a short delay accessing a key stope at Deacon as well as some unplanned plant maintenance early in the quarter. As a result, gold production of ~39koz was slightly below the lower end of June 2025 quarter guidance (40,000 – 45,000oz)³. At the end of the quarter, ~3.1koz remained on the ROM stockpile.
- The June 2025 quarter reflected much improved performance across all key aspects of the operation. Ore mined during the quarter was 290k tonnes at 4.7 g/t gold for 43.5koz (in line with expectations).
- In the month of June 2025, the operation achieved a monthly record of 130kt mined at 4.6 g/t gold for 19.4koz and a monthly record of 111kt processed at 5.3 g/t gold at ~95% recovery for 18.1koz. Development rates also averaged 311 metres per jumbo per month in June 2025, the highest monthly development rate achieved in FY25.
- The strong mining and production rates recorded towards the end of the year position the company favourably going into FY26.

¹ Free cash flow = sum of operating and investing cash flows, plus or minus the movement in bullion awaiting settlement, gold dore and bullion value (at traded price or closing quarter end gold price as appropriate).

² Pro-forma cash and gold on hand following addition of \$38m following equity raise in April 2025.

³ Refer to the Company's ASX announcement dated 14 April 2025 titled "Updated guidance and equity raising".
