

Follow-up Priority Gold Targets to be drilled at Laverton

Highlights

- Drillers mobilisation to the Laverton project scheduled
- The drilling is designed to follow up the previous significant gold intercepts at Laverton including 28m @ 1.09g/t Au from 57m
- High-grade REE intersections including 10,000ppm TREO (1%), adjacent to the world class Mt Weld REE Mine will be drill tested

Catalina Resources Ltd (ASX: CTN) ('Catalina' or the 'Company') is pleased to provide the following update:

Catalina has engaged drillers, with mobilisation to the Laverton Gold Project scheduled for next week. The upcoming drill program is designed to follow up on the significant zone of gold mineralisation identified during previous aircore drilling along the interpreted trend of the regionally significant Barnicoat Shear Zone.

Notable intercepts include:

- **LVAC049: 28m @ 1.09g/t Au from 57m.**

Anomalous REE intersections were also returned from aircore drilling in the vicinity of LVAC049. A high-grade REE intersection in hole LVAC037 over 10,000ppm TREO (1%) near the Mt Weld REE Mine intersected:

- **LVAC0037: 9m @ 7,565ppm TREO from 47m, including: 4m @ 13,406ppm (1.34%) TREO from 49m.**

The upcoming program aims to define the continuity and extent of both gold and REE mineralisation along strike and at depth.

The Company will provide a further update when drilling commences.

This announcement has been authorised for release by the Board of Directors.

Competent Person Statement

The review of historical exploration activities and results contained in this report is based on information compiled by Michael Busbridge, a Member of the Australian Institute of Geoscientists (AIG). He is a consultant to Catalina Resources Ltd. He has sufficient experience which is relevant to the style of mineralisation and types of deposits under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the JORC Code). Michael Busbridge has consented to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The Company confirms that it is not aware of any new information or data that materially affects the information in the original reports, and that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original reports.
