

QUARTERLY ACTIVITIES REPORT

QUARTER ENDED 30 JUNE 2025

Horseshoe Metals Limited (ASX: HOR) (**Horseshoe, HOR or Company**) is pleased to present its Quarterly Activities Report for the period ending 30 June 2025.

HIGHLIGHTS

- *Horseshoe continues to progress key workstreams at Horseshoe Lights ('HSL') Copper-Gold Project in WA*
- *Significant early cash flow opportunity from DSO sales of existing high-grade copper stockpiles*
- *DSO mining approval granted post-quarter end – Horseshoe expects immediate demand for DSO product*
- *Horseshoe Lights camp recommissioned to support DSO start-up in Q3*
 - *Horseshoe Lights has an existing 20-person camp water/power supply and associated infrastructure including an airstrip*
- *Discussions ongoing with several well-known potential copper concentrate offtake partners*
- *Option exercised by Melody Gold to process gold surface materials at Horseshoe Lights*
- *Horseshoe retains full rights to copper and mixed Cu/Au surface materials, as well as all subsurface copper and gold rights*
- *Other activities to ramp-up on site with exploration and drilling campaigns planned to test new areas of interest in and around HSL Project area*
- *Strategic placement post-quarter end raises \$851,000 (before costs) – provides the necessary funding to commence DSO start-up and sales in the near-term*

Exploration & Development Summary

Western Australia

Horseshoe Lights Copper-Gold Project, Western Australia (HOR: 100%)

Project Summary

The Horseshoe Lights Copper-Gold Project is the original Cu/Au VMS discovery in the Bryah Basin and is located approx. 60 km west of DeGrussa Copper Mine owned by Sandfire Resources (ASX: SFR).

Past production from Horseshoe Lights includes approx. **316,000 oz Au & 55 kt Cu metal** in two phases of mining and the deposit contains a current in situ resource **128 kt Cu metal @ 1.0% (0.5% cut-off) and 36,000 oz Au** (refer Table 1).

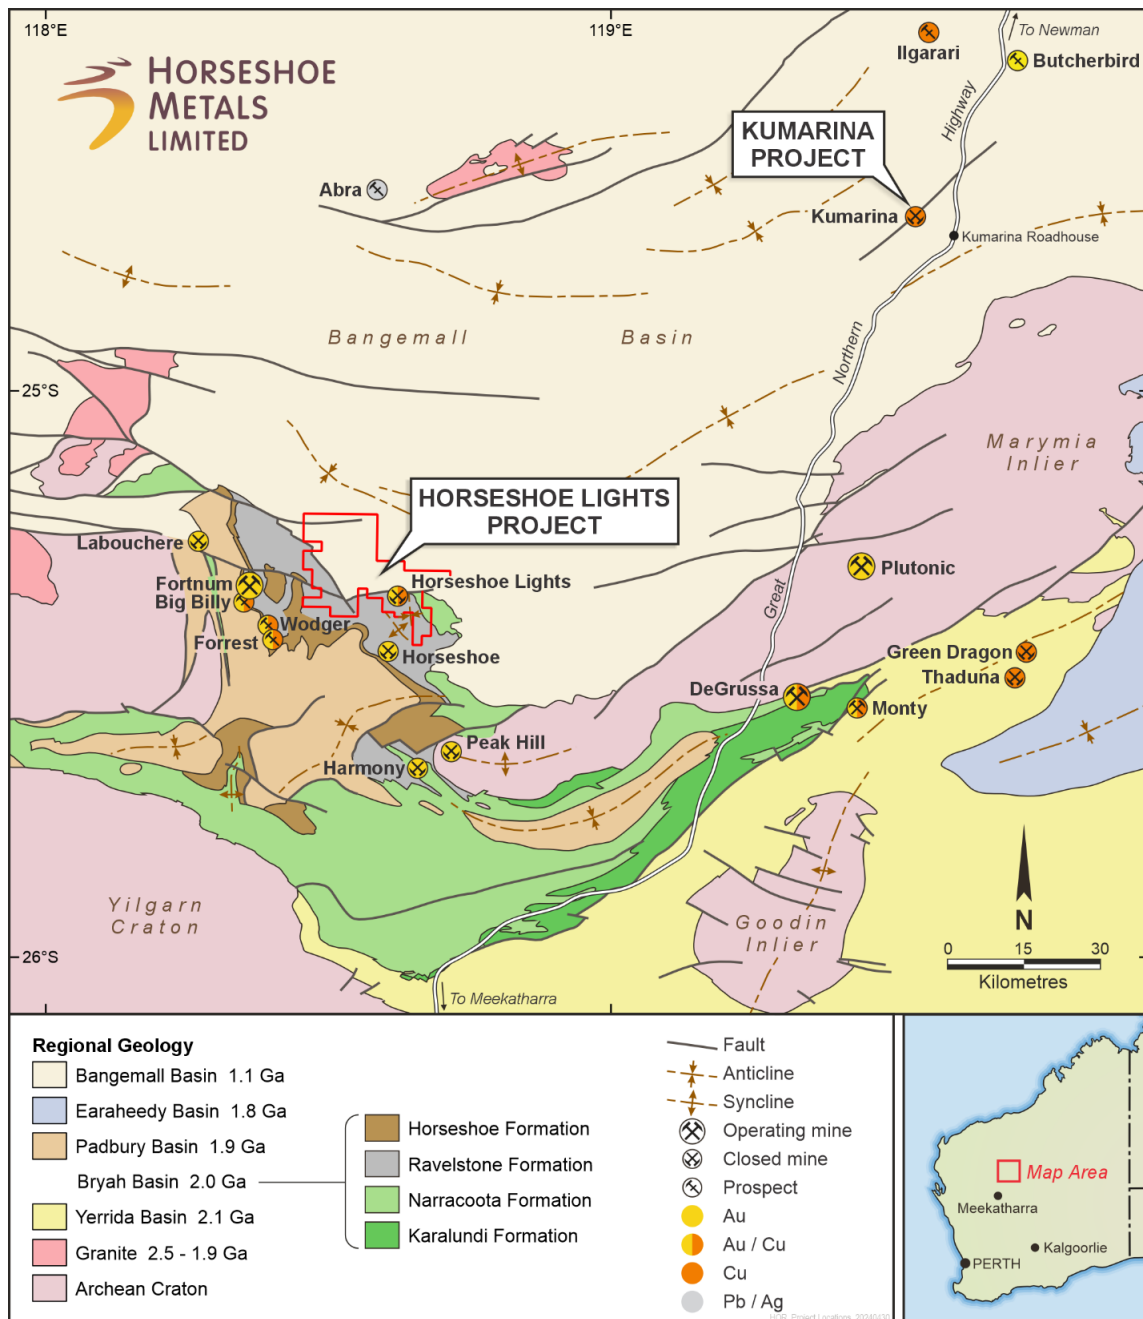

Figure 1: Location of Horseshoe Lights and Kumarina Projects, WA

June quarter activity update

During the June quarter, Horseshoe continued to focus its resources on the re-commencement of development activities at the Horseshoe Lights ('HSL') copper-gold system in WA.

A summary of the key activities completed during the quarter is outlined below.

Direct Shipping Ore ('DSO') Operation – Mining Approval Granted

The copper phase of mining at Horseshoe Lights included early DSO copper production that has left highly valuable subgrade and rehandle DSO material around the site. Areas identified and assessed as having strong DSO potential include M15, Subgrade and C20 stockpiles along with rehandle and surface pimple dumps located on the North Waste dump, Gold tailings and Southern low-grade stockpile (refer Figure 2). The coarse material is easily scavenged utilising loaders and excavators equipped with sieve buckets.

Post-quarter end, the Company reported an important milestone with receipt of approval from the Western Australia's Department of Energy, Mines, Industrial Regulation and Safety (DEMIRS) to commence DSO mining activities at Horseshoe Lights (refer ASX release 2 July 2025). This marks a significant development, with the approval allowing Horseshoe to mobilise key work personnel to site ahead of the commencement of DSO start-up operations this quarter. The Company anticipates demand for Horseshoe's DSO product will be strong, supported by the strengthening copper price.

Horseshoe Lights Infrastructure Recommissioning

During the quarter, the Company announced significant progress on the recommissioning of the camp at Horseshoe Lights to provide the necessary infrastructure for the upcoming DSO stockpiling and sales operation, Melody Gold's planned gold surface materials processing activities, and larger-scale future mining and processing operations (refer ASX release 26 May 2025).

Horseshoe Lights has an existing 20-person camp water/power supply and associated infrastructure including an airstrip requiring recommissioning (refer Figures 3 and 4). The camp includes a workshop and garage, camp office, technical office, recreation rooms, kitchen/dining facilities and a swimming pool.

Gold Surface Materials – Commercial Agreement Signed with Melody Gold

During the quarter, the Company announced that Melody Gold Pty Ltd ("Melody") had elected to exercise its option for the right to process gold surface materials at Horseshoe Lights (refer ASX release 12 June 2025).

The Gold Surface Materials Rights Agreement between Melody and Horseshoe's wholly-owned subsidiary Murchison Copper Mines Pty Ltd covers designated gold surface materials adjacent to the historic open pit at HSL, including four subgrade stockpiles: the rehandle stockpile; the gold leach vats and perimeter; the gold ROM stockpile; and gold and flotation tailings (**Gold Surface Materials**) (refer Figure 2).

Melody has advised it intends to treat up to **500,000 tonnes per annum** in its proposed retreatment of the gold surface material utilising gravity recovery to produce a gold-copper-silver concentrate.

Further details on the Option Agreement entered with Melody Gold can be found in the ASX announcement dated 20 January 2025.

Update on Copper Offtake and Funding Discussions

During the quarter, Horseshoe continued to progress discussions with several well-known groups that have expressed interest in offtake of the DSO and potential future concentrates, including copper cement and/or concentrate produced at HSL.

In addition, non-dilutive staged offtake funding is being considered to provide capital for the proposed development sequence including:

1. *Scavenging of remnant coarse DSO material, bagging and transport*
2. *Heavy Media Separation of fine DSO material from select stockpiles*
3. *Small Scale Heap/Vat Leach of surface oxide material followed by cementation*
4. *Large Scale Heap/Vat leach of surface oxide material followed by cementation*

HSL Development Strategy: Next steps

The following activities are planned over the coming months to advance the HSL asset:

- *Additional RC and/or auger drilling of the North Dump, gold stockpiles, copper Low-grade oxide and Low-grade sulphide stockpile stockpiles*
- *Commence updating of HSL Scoping Study*
- *Further assessment of the auriferous quartz veins hosted in siltstone immediately west of the HSL copper deposit*
- *Rock chip sampling of outcropping quartz veins and jasperoids*
- *Auger assisted soil geochemical sampling (Cu and Au) in areas of historic RAB drilling and extending into previously untested adjacent areas*
- *RC drill testing of several priority copper and gold targets*
- *Acquisition of open file magnetic data to aid delineation of additional targets in the project area*
- *Further detailed review of historic drill data to assist in building a copper and gold mineralisation model*

Updates on the above activities will be provided over the coming weeks as on-ground activities increase, and field crews are mobilised near-term.

Kumarina Copper Project, Western Australia (HOR: 100%)

The Kumarina Project consists of a mining lease and mining lease application covering approximately 3.2 km². The Project is located 95 km north of Sandfire Resources NL's DeGrussa copper-gold mine in the Gascoyne region of Western Australia. The Company has applied for a mining lease (MLA52/1078) to cover the Rinaldi resource, contiguous with M52/27. The Company continues to progress a Project Agreement as part of the application process with the Native Title Party and its lawyers.

No active field work was undertaken during the June quarter.

South Australia

Glenloth Gold Project, South Australia (HOR: 100%)

The Glenloth Project is located in the Central Gawler Craton of South Australia. The project consists of a single exploration licence, EL 6301, which comprises two areas totalling 107 km². The larger eastern block 'Glenloth' covers 81 km² and includes the Glenloth Goldfield and part of the Harris Greenstone Belt. The smaller western block 'Old Well' takes in the northern trend of the 1.6M oz Tunkillia gold deposit located 6 km to the south, under development by Barton Gold Holdings Ltd (ASX:BGD).

The Company is conducting a technical and strategic review of the 'Old Well' block at Glenloth, including reviews of historic calcrete geochemistry and AC and RC geochemistry (refer ASX release 20 February 2025). Historic exploration was wide spaced and part of larger regional programmes.

No active field work was undertaken during the June quarter.

Corporate

The Company held its Annual General Meeting on 29 May 2025, with all resolutions passed by shareholders.

Subsequent events

In July 2025, the Company raised a total of \$851,000 (before costs) through a placement to sophisticated and professional investors, via the issue of 40,523,810 fully paid ordinary shares at an issue price of \$0.021 per share (refer ASX release 2 July 2025) ("Placement"). In conjunction with the Placement, key contractors of the Company agreed to subscribe for 12,000,000 shares in consideration for \$252,000 in future drilling services ("Drill-to-Equity Conversion") and for 18,928,571 shares in consideration for \$397,500 in trade payables ("Debt-to-Equity Conversion"). The Placement and accompanying Drill-to-Equity and Debt-to-Equity conversions were completed at the last traded price of the Company's securities.

In July 2025, the Company received approval from the Department of Energy, Mines, Industry Regulation and Safety to commence DSO mining operations at Horseshoe Lights (refer ASX release 2 July 2025).

Listing Rule 5.3.5 disclosures

No payments were made to related parties and their associates during the quarter. Payments to directors and related parties have been deferred to later quarters.

The Board of Directors of HOR has authorised this announcement to be given to the ASX.

About Horseshoe Metals Limited

Horseshoe Metals Limited (ASX:HOR) is a copper and gold-focused company with a package of tenements covering approximately 500 km² in the highly prospective Peak Hill Mineral Field, located north of Meekatharra in Western Australia and mineral interests in South Australia. The Company manages the Horseshoe Lights Project and the Kumarina Project in Western Australia, and the Glenloth Gold Project in South Australia.

About the Horseshoe Lights Project

The Horseshoe Lights Project includes the historic open pit of the Horseshoe Lights copper-gold mine which operated up until 1994, producing over 300,000 ounces of gold and 54,000 tonnes of contained copper including over 110,000 tonnes of Direct Shipping Ore (DSO) which graded between 20-30% copper.

The Horseshoe Lights ore body is interpreted as a deformed Volcanogenic Hosted Massive Sulphide (VMS) deposit that has undergone supergene alteration to generate the gold-enriched and copper-depleted cap that was the target of initial mining. The deposit is hosted by quartz-sericite and quartz-chlorite schists of the Lower Proterozoic Narracoota Formation.

Past mining was focused on the Main Zone, a series of lensoid ore zones, which passed with depth from a gold-rich oxide zone through zones of high-grade chalcocite mineralisation into massive pyrite-chalcopyrite. To the west and east of the Main Zone, copper mineralisation in the Northwest Stringer Zone and Motters Zone consists of veins and disseminations of chalcopyrite and pyrite and their upper oxide copper extensions. The table below summarises the total Mineral Resources for the Horseshoe Lights Project at the reporting date.

TABLE 1 HORSESHOE LIGHTS PROJECT SUMMARY OF MINERAL RESOURCES as at 30 June 2025								
Location	Category	Tonnes (Mt)	Cu (%)	Au (g/t)	Ag (g/t)	Cu metal (tonnes)	Au metal (oz)	Ag metal (k oz)
In-situ Deposit (0.5% Cu cut-off grade)	<i>Measured</i>	1.73	1.04	0.0	0.5	18,000	1,900	28.8
	<i>Indicated</i>	2.43	0.95	0.0	0.7	23,200	3,400	52.2
	<i>Inferred</i>	8.69	1.01	0.1	2.6	87,400	30,700	712.4
	Total	12.85	1.00	0.1	1.9	128,600	36,000	793.4
Flotation Tailings	Inferred	1.421	0.48	0.34	6.5	6,800	15,300	294.8
M15 Stockpiles	Inferred	0.243	1.10	0.17	4.7	2,650	1,300	36.7
Note: At 0% Cu cut-off grade unless otherwise stated					TOTAL	138,050	52,600	1,124.9

The above Mineral Resource Estimates all meet the reporting requirements of the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves".

About the Kumarina Project

The copper deposits at the Kumarina Project were discovered in 1913 and worked intermittently until 1973. The workings extend over nearly 5km as a series of pits, shafts and shallow open cuts. At the main Kumarina Copper Mine, the workings are entirely underground with drives from the main shaft extending for some 200 m in the upper levels and for about 100 m in the lower levels at a depth of 49m below surface.

Incomplete records post-1960s make it difficult to estimate the total copper production from the workings. However, indications are that the Kumarina Copper Mine was the second largest producer in the Bangemall Basin group of copper mines. Recorded production to the late 1960s is 481 t of copper ore at a high-grade of 37.0% Cu and 2,340 t at a grade of 17.51% Cu. An initial Mineral Resource Estimate for the Rinaldi deposit was completed by the Company in 2013 (see 30 June 2013 Quarterly Report announced on 31 July 2013). The total Measured, Indicated and Inferred Mineral Resource Estimate at the reporting date is shown in the table below.

TABLE 2
KUMARINA PROJECT
SUMMARY OF MINERAL RESOURCES
as at 30 June 2025

Location	Category	Tonnes (t)	Cu (%)	Cu metal (tonnes)
Rinaldi Prospect (0.5% Cu cut-off)	<i>Measured</i>	<i>415,000</i>	<i>1.46</i>	<i>6,100</i>
	<i>Indicated</i>	<i>307,000</i>	<i>1.16</i>	<i>3,500</i>
	<i>Inferred</i>	<i>114,000</i>	<i>0.9</i>	<i>1,000</i>
	Total	835,000	1.3	10,600

The Mineral Resource Estimate meets the reporting requirements of the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserve

Forward Looking Statements

Horseshoe Metals Limited has prepared this announcement based on information available to it. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement. To the maximum extent permitted by law, none of Horseshoe Metals Limited, its directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this announcement or its contents or otherwise arising in connection with it. This announcement is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this announcement nor anything in it shall form the basis of any contract or commitment whatsoever. This announcement may contain forward-looking statements that are subject to risk factors associated with gold exploration, mining and production businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to price fluctuations, actual demand, currency fluctuations, drilling and production results, reserve estimations, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory changes, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates.

Competent Persons Statement

The information in this report that relates to the Exploration Results and Mineral Resources at the Horseshoe Lights and Kumarina Projects is based on information reviewed by Mr Michael Fotios, who is a member of the Australian Institute of Geoscientists. Mr Fotios is a consultant to Horseshoe Metals Limited and has sufficient experience which is relevant to the style of mineralisation and types of deposit under consideration and to the activity he is undertaking to qualify as Competent Persons as defined in the 2012 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2012)’. Mr Fotios consents to the inclusion of the data in the form and context in which it appears.

The information in this report that relates to the Horseshoe Lights Project In-situ Mineral Resources is based on information originally compiled by Mr Dmitry Pertel, an employee of CSA Global Pty Ltd, and reviewed by Mr Fotios. This information was originally issued in the Company’s ASX announcement “40% increase in Copper Resource at Horseshoe Lights Copper/Gold Project”, released to the ASX on 5 June 2013, and first disclosed under the JORC Code 2004. This information was subsequently disclosed under the JORC Code 2012 in the Company’s ASX release “Quarterly Report Period Ended 30 June 2013”, released on 31 July 2013. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the findings are presented have not materially modified from the original market announcements.

The information in this report that relates to the Horseshoe Lights Project surface stockpile Mineral Resources is based on information compiled by a previous employee of Horseshoe Metals Limited and reviewed by Mr Fotios. The information was previously issued in announcements released to the ASX on 26 February 2015 and 9 March 2015. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the findings are presented have not materially modified from the original market announcements.

The information in this report that relates to the Kumarina Project (Rinaldi Prospect) Mineral Resources is based on information compiled by or under the supervision of Mr Robert Spiers, an independent consultant to Horseshoe Metals Limited and a then full-time employee and Director of H&S Consultants Pty Ltd (formerly Hellman & Schofield Pty Ltd), and reviewed by Mr Fotios. The information was originally issued in the Company’s ASX announcement “Horseshoe releases Maiden Mineral Resource Estimate for Kumarina”, released to the ASX on 4 March 2013, and first disclosed under the JORC Code 2004. This information was subsequently disclosed under the JORC Code 2012 in the Company’s ASX release “Quarterly Report Period Ended 30 June 2013”, released on 31 July 2013. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the findings are presented have not materially modified from the original market announcements.

8.4 Cash and cash equivalents at quarter end (item 4.6)	206
8.5 Unused finance facilities available at quarter end (item 7.5)	2,458
8.6 Total available funding (item 8.4 + item 8.5)	2,664
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	92
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
N/A	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
N/A	
8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
N/A	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 31 July 2025

Authorised by: By the board.
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
