

ANNOUNCEMENT 31 July 2025

# ACTIVITIES REPORT FOR THE QUARTER ENDED 30 JUNE 2025 (FY2025 Q4) FOR MC MINING LIMITED (MC Mining or the Company) AND ITS SUBSIDIARY COMPANIES

#### **HIGHLIGHTS**

#### **Operations**

- Health and safety performance across the group improved, with the Company having operated with no lost time injuries (LTI) for the quarter. The Makhado steelmaking hard coking coal Project (Makhado Project or Makhado) has now reached 817 days LTI-free, for 556,000 manhours worked, whilst Uitkomst steelmaking coal Colliery (Uitkomst Colliery or Uitkomst) reached 136 days LTI-free;
- Development of the Makhado Project continued on schedule, with commissioning of the coal handling and preparation plant (CHPP or Coal Plant) expected by December 2025, the principal mining contractor being appointed and commencing with site establishment, procurement activities for the Coal Plant reaching factory acceptance testing stage for critical equipment, significant progress being made towards the commissioning of the 14km overhead power transmission line and work on the permanent bridge to access the project site having commenced;
- The operational improvement plan for Uitkomst Colliery (Turnaround Plan) was completed and is set to be in full implementation during the coming quarter, with a specialist mining engineering and consultancy firm, Metalla Tutum Engineering Proprietary Limited (MTE), co-opted to assist with the implementation. The Turnaround Plan should see an improvement in cost, stabilise earnings and result in operating efficiencies at the mine.
- Run-of-mine (ROM) coal production from Uitkomst Colliery improved 3% on the previous quarter's production, though was 9% lower than the June 2024 quarter at 104,129 tonnes (t) (FY2024 Q4: 113,977t). The reduction in production, compared to 2024, was due to disruptions in production whilst reconfiguring underground layouts as part of the Turnaround Plan and also due to lower-than-expected coal seam mining heights in some areas of the mine;
- Uitkomst Colliery sold 68,020t of high-grade coal during the quarter (FY2024 Q4: 62,274t), a 9% increase on 2024 sales, and had no sales of the lower grade middlings coal (FY2024 Q4: 10,099).

WEB WWW.MCMINING.CO.ZA

EMAIL ADMINZA@MCMINING.CO.ZA

Coal plant yields remained high at 69% due to operational improvement initiatives over the period, which offset the lower ROM coal production to result in improved sales volumes;

- Limited activities were undertaken at the Company's Vele Aluwani semi-soft coking coal (SSCC)
  and thermal coal (TC) Colliery (Vele Colliery or Vele), whilst the numerous coal deposits within
  the Greater Soutpansberg Projects (GSP) were evaluated and prioritised for development; and
- Depressed TC prices continued with average prices of US\$90/t for the three months, compared to
  US\$96/t in Q3 FY2025 and US\$108/t in Q4 of FY2024. Premium steelmaking HCC prices have
  decreased, averaging US\$184/t in the quarter compared to US\$243/t in FY2024 Q4.

### Corporate

- Available cash and facilities was US\$7.4 million at the period end (FY2025 Q3: US\$9 million);
- Kinetic Development Group Limited (KDG) made payments amounting to US\$10 million for the
  purchase of MC Mining shares, as part of the share subscription agreement, during the quarter.
  US\$5 million of the payment relates to the third Second Closing and US\$5 million of the payment
  relates to the fourth Second Closing as per the Share Subscription Agreement.
- The Company made a further repayment of ZAR10 million towards the Industrial Development Corporation (IDC) loan during the quarter.
- Wang Lanlan (Lily) was appointed as a Non-Executive Director of MC Mining;
- Dr Huoxin Wang (Hevin) was appointed as a Non-Executive Director of MC Mining; and
- An Chee Sin resigned from being a Non-Executive Director of MC Mining.

#### **DETAILED QUARTERLY OPERATIONS REPORTS**

Makhado HCC Project - Soutpansberg Coalfield, Limpopo Province, South Africa (67% owned)

**Project Overview.** Construction of the Makhado steelmaking hard coking coal Project (**Makhado**) **Project or Makhado**) progressed as planned, with commissioning of the Coal Plant scheduled for December 2025. During the quarter, more project development milestones were successfully achieved, whilst maintaining the excellent safety, health, environmental and regulatory compliance performances that have become a recognizable feature of the venture to date. The colliery will be South Africa's largest HCC producer, designed to produce 800,000 tonnes a year of HCC 64 Mid Vol, once steady-state operation for the foundation phase is reached. The life-of-mine (**LOM**) for the Makhado Colliery is planned to be 28 years. Contiguous to the Makhado Project are the satellite Greater Soutpansberg Projects (**GSP**), that are all at granted Mining Right status, also endowed with steelmaking HCC potential, and scheduled to be the focus of mine planning, once the Makhado Project is commissioned.

**Health, Safety and Environmental Performance.** The Makhado Project achieved another quarter free from any LTIs (FY2025 Q3: nil), with 817 days LTI-free and 556,000 manhours now accumulated for the project to date. Approximately 388 people are now working onsite, with numbers expected to almost double during the coming quarter.

The mine continued to be built with zero reportable environmental incidents and keen emphasis being placed on environmental protection and management. Visits were successfully hosted for officials from the Department of Mineral and Petroleum Resources (DMPR) to assess compliance with the site's Environmental Authorisation obligations. Statutory reporting, including Pollution Prevention Plans, Groundwater and Stormwater Management reports, the Greenhouse Gas Emission report, the Wet Season Bio-monitoring report and the National Atmospheric Emissions Inventory System (NAEIS) update, were all submitted timeously to the relevant regulatory authorities. The Company continues to promote collaborative and constructive relationships with regulatory authorities and host community stakeholders.

**Project Development Milestones Achieved.** Development of the Makhado Project is on schedule for the December 2025 Coal Plant commissioning and project expenditure remains within the budgeted estimates. The following key milestones were achieved for the quarter:

- appointment of the principal mining contractor, JCI Mining Proprietary Limited (JCI): JCI, a South African-based specialist surface mining contractor, was formally awarded a 5-year duration contract to undertake contract mining for the Makhado Project. JCI's site establishment is already underway with mining of the East Pit boxcut scheduled to build up during the coming quarter. JCI will mobilise the mining fleet, a 200-strong workforce and the management and supervision to initially target the mining of 2Mtpa of ROM coal by conventional load and haul, using backhoe-configured excavators and a fleet of articulated dump trucks.
- Detailed design of the Coal Plant completed and equipment procurement at factory acceptance testing stage for critical equipment: With the detailed design work for the Coal Plant now completed, the electrical and instrumentation design workstream is now in progress. Civil construction, which commenced last quarter, is well advanced for the majority of the Coal Plant work packages, structural steel fabrication has started, platework orders placed and equipment procurement is far enough progressed that the first factory acceptance testing, for vibrating screens, mineral sizers and the feeder breaker have been arranged. The CHPP will process ROM coal to produce a primary product of HCC 64 Mid Vol and a secondary product of 5,500kcal API4 thermal coal (TC). Work has also started on planning the expansion strategy once the foundation phase is commissioned.
- Commencement of permanent access bridge: The construction of a permanent bridge crossing the Mutamba River, to provide access to the mine site has commenced, with the first activity being the drilling and installation of 16 piles to support the bridge abutment and piers. Bridge construction is scheduled for completion before major rains at year's end. A temporary access bridge, completed last quarter is currently being used to provide site access.
- Construction power reticulation: During the quarter, emphasis was on obtaining the
  requisite electrical equipment specifications approvals from the national power utility
  company (Eskom) and on the follow-on procurement of critical components for power
  reticulation. Many of the critical components have now been approved by Eskom, allowing

the work on the Paradise Overhead Line (**OHL**) to progress. The OHL will be a 14km long, 22kV bulk power transmission line, to deliver 7.5MVA of power to the site from the national grid, via the nearby Paradise Power Station. This workstream is being managed by the EHL Engineering Group (**EHL**) on an EPC-turnkey basis.

**Outlook.** Construction work and operational readiness activities are ongoing, with open pit mining activities set to commence in earnest during the coming quarter.

Uitkomst steelmaking coal Colliery – Utrecht Coalfields, KwaZulu Natal Province, South Africa (84% owned)

**Colliery Overview.** Intensive re-engineering and operational reviews were completed, resulting in the development of a performance improvement plan for the colliery (**the Turnaround Plan**). The plan will be in full implementation during the coming quarter. The Turnaround Plan aims to introduce operational changes that will lower operating costs and deliver a commercially viable business, given the low coal price environment, and a mature underground mine that hosts significant high quality coal reserves. Coal preparation plant yields were pleasing at 69% which helped offset the lower than planned ROM coal tonnes mined.

**Health, Safety and Environmental Performance.** Uitkomst Colliery had a quarter free of reportable environmental incidents and LTIs (FY2025 Q3: four LTI). The concerted efforts by site personnel, focusing on behaviour-based safety principles, realignment sessions and operational improvement reviews, have contributed to an improvement in health and safety performance over the period.

**Production Performance.** The colliery mined 104,129t of ROM coal during the quarter, which was a 3% increase on the previous quarter, though 9% decrease on 2024 (FY2024 Q4: 113,977t). The 9% decrease in ROM coal production compared to the same period the previous year was due, in part, to disruptions in production whilst reconfiguring the underground mining layout as part of the Turnaround Plan and due to lower coal seam mining heights than was expected in some sections. Outlook is for an improvement in coal seam mining heights over the next quarter as the operating sections continue to move through the low seam zones. Underground mining fleet condition assessments and remediation plans have commenced to be implemented during the quarter. More

modifications made to the coal preparation plant in combination with a greater proportion of coal being mined from higher yielding sections of the mine saw plant yields remain high at 69% for the quarter.

Uitkomst sold 68,020t (FY2024 Q4: 62,274t) of high-grade duff and peas coal, a 9% improvement on the same period last year. The colliery sold no middlings coal during the three months (FY2024 Q4: 10,099). The colliery had 1,518t (FY2024 Q4: nil) of high-grade coal inventory at the end of June 2025.

The production costs per saleable tonne were 9% lower than the comparative period in 2024 (FY2025 Q4: US\$88/t vs. FY2024 Q4: US\$96/t). The increase in sales volumes and improved plant yields resulted in the decrease in unit production costs.

**Outlook.** Uitkomst Colliery, as of the end of the quarter, has commenced with the implementation of the Turnaround Plan. The focus remains on implementing initiatives to reduce unit operating costs whilst improving safety performance. The Turnaround Plan is being implemented with the assistance of Metalla Tutum Engineering Proprietary Limited (**MTE**). MTE is a South African specialist mining engineering and consulting firm, established in 2017, with expertise in mine management and operational improvements.

Key focus areas of the Turnaround plan are to:

- reconfigure underground mining layouts to streamline operational efficiencies and resource deployment;
- implement Coal Plant modifications to improve coal product yields;
- reduce workforce numbers from 430 to 366, with minimal forced retrenchments; and
- enter into longer-term coal offtake agreements to improve price certainty.

#### These changes should see Uitkomst:

- improve on the operations safety and health performance;
- further reduce unit costs of saleable coal production to respond to the current low coal price environment; and
- reduce the volatility in earnings.

	Quarter to	Quarter to

#### Vele Aluwani SSCC and TC Colliery – Limpopo (Tuli) Coalfield (100% owned)

Operations at Vele remain suspended. Vele recorded no LTIs (FY2025 Q3: nil) during the quarter.

#### **Greater Soutpansberg Projects (GSP) – Soutpansberg Coalfield (74% owned)**

The GSP recorded no LTIs (FY2025 Q3: nil) during the quarter. The GSP are a group of mineral tenements, held as Mining Rights and satellite to the Makhado Project. Work has commenced on assessing and prioritising the various tenements, as part of developing the future pipeline of steelmaking HCC prospects to supplement the Makhado Colliery production. The work required to obtain environmental and water use licences for the Mining Rights are expected to commence during H2 CY2025.

#### Appendix 5B - Quarterly Cash Flow Report

The Company's available cash balance and facilities as at 30 June 2025 was US\$7.4 million. The aggregate amount of payments to related parties and their associates, as disclosed as item 6.1 of the June 2025 quarter Appendix 5B, was US\$172k, comprising executive and non-executive director remuneration.

#### **Christine He**

#### **Interim Managing Director and Chief Executive Officer**

This announcement has been approved by the Company's Disclosure Committee.

All figures are in South African rand or United States dollars unless otherwise stated.

#### **About MC Mining Limited:**

MC Mining is an ASX/JSE-listed coal exploration, development and mining company operating in South Africa. MC Mining's key projects include the Uitkomst Colliery (metallurgical and thermal coal), Makhado Project (hard coking coal), Vele Colliery (semi-soft coking and thermal coal), and the Greater Soutpansberg Projects (coking and thermal coal).

All figures are denominated in United States dollars unless otherwise stated. Safety metrics are compared to the preceding quarter while financial and operational metrics are measured against the comparable period in the previous financial year. A copy of this report is available on the Company's website, <a href="https://www.mcmining.co.za">www.mcmining.co.za</a>.

#### Forward-looking statements

This Announcement, including information included or incorporated by reference in this Announcement, may contain "forward-looking statements" concerning MC Mining that are subject to risks and uncertainties. Generally, the words "will", "may", "should", "continue", "believes", "expects", "intends", "anticipates" or similar expressions identify forward-looking statements. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those expressed in the forward-looking statements. Many of these risks and uncertainties relate to factors that are beyond MC Mining's ability to control or estimate precisely, such as future market conditions, changes in regulatory environment and the behaviour of other market participants. MC Mining cannot give any assurance that such forward-looking statements will prove to have been correct. The reader is cautioned not to place undue reliance on these forward-looking statements. MC Mining assumes no obligation and does not undertake any obligation to update or revise publicly any of the forward-looking statements set out herein, whether as a result of new information, future events or otherwise, except to the extent legally required.

#### Statements of intention

Statements of intention are statements of current intentions only, which may change as new information becomes available or circumstances change.

# **Compliance statement**

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date:	31 July 2025
Authorised by:	Disclosure Committee

#### **Notes**

- 1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
- 2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
- 4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
- 5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
