These funds will allow us to accelerate the evolution of our **virtualplant** platform and progress our compliance with the ever-growing cybersecurity requirements (ISO 27001 certification) as we convert a robust pipeline of Tier 1 client opportunities into long-term value. With established relationships across clients such as Chevron, Woodside, and Newmont, we continue to see promising opportunities to extend our technology into broader applications. While we remain mindful of market conditions, our focus remains on disciplined execution and delivering value through strategic, long-term engagements"*
