

Townsville Power Station

Practical Completion of Maintenance Overhaul

QPM Energy Limited (**ASX:QPM**) ("**QPM**" or "**the Company**") is pleased to provide the following update on the commissioning of the Townsville Power Station ("**TPS**").

Commissioning of the TPS was successfully completed last week and the Dispatch Agreement between QPM and Ratch Australia Corporation formally commenced on 1 August 2025. The Dispatch Agreement gives QPM the right to manage the dispatch of electricity generated by TPS into the National Electricity Market.

In line with the return to service of the TPS, QPM has an accelerated well workover program underway, including the use of a coiled tubing unit, to further increase QPM's production from the Moranbah Gas Project ("**MGP**"). The Company's Energy Markets team is now able to optimise dispatch of the TPS to maximise electricity revenues using MGP gas supply and gas stored in the North Queensland Gas Pipeline.

This announcement has been authorised for release by the Chairman and CEO.
