

Phase 2 of RC Drilling Commences at Yandal West

Albion Resources Limited (ASX: ALB) is pleased to announce that Phase 2 of the **Reverse Circulation (RC) drilling program** has commenced at the **Yandal West Project**, located in the highly prospective **Yandal Greenstone Belt**, Western Australia.

Figure 1: RC drill rig lined up to commence drilling again at the Collavilla area

Phase 2 of the RC campaign will comprise **approximately 1,700 metres** of drilling, focussed on testing several high-priority gold targets across the Yandal West project, including:

- **Collavilla Historical Workings** – Outcropping shallow mineralised quartz vein system with historical high-grade hits. Drilling will step out to the southwest (focusing on the contact with the greenstone) and southeast.
- **Collavilla East** – Chargeability anomaly extending to ~300m depth, located near a mineralised vein system, supported by encouraging rock chip assays.
- **Broader Ives Find Targets** – New conceptual structural targets identified across the broader Ives Find area.
- **Barwidgee Central** – Drilling will target historic intercepts from hole **23YRD023: 4m @ 9.0g/t Au from 39 m and 7m @ 1g/t Au from 23m (same hole)**, with mineralisation open at depth, and supported by anomalous surface geochemistry and geophysical targets.
- **May Queen Prospect** - Historical drilling has shown promising potential. An initial target will be tested during this campaign, with broader exploration plans in development.

Note 1 - The historical intercepts referenced have been previously reported in ALB's announcements dated 28 Nov 2024 and are not being reported as new exploration results. The results have been referenced in multiple announcements since.

What's Next?

- ~1,700 m of RC drilling to be completed, fully funded to extend the program.
- **Broader targets to be evaluated.**
- **Assays pending for ~780 m of drilling** across regional targets.
- **Ongoing evaluation of the May Queen prospect** for inclusion in upcoming drill targeting.

Why This Matters for Investors

This drill campaign represents **a significant opportunity** for Albion to unlock value from a high-quality, underexplored gold project in a **tier-one mining jurisdiction**. With a **tight capital structure, fully funded exploration, and multiple compelling targets**, Albion is well positioned to **deliver strong leverage to discovery success**.
