OVERVIEW

Matsa Resources Limited ("Matsa" or "the Company" ASX: MAT) is pleased to announce the commencement of ore haulage from the Devon Pit Gold Mine ("Devon") to FMR's Greenfields processing plant for processing in September 2025.

The Devon mine is now fully operational and ore is being mined and stockpiled at site. Haulage to the FMR processing plant has now commenced and the first 2,000t of a planned 50,000t parcel has been delivered this week.

Executive Chairman, Paul Poli said *"I am really pleased with this milestone achievement. The development progress at Devon has been excellent and now that we're hauling to FMR for processing, things are getting really exciting. The mine setup, infrastructure and material and equipment movement planning has fallen into place nicely and whilst results so far are very pleasing, we are not getting distracted from ensuring the first 50,000t parcel of high grade ore from Devon is delivered on time for a September quarter processing campaign, and importantly, our first gold sales."*

Road train haulage to FMR is now running around the clock currently running 6 road trains and ramping up to 10 in the later part of August and into September and I look forward to reporting on our first processing campaign and gold sales shortly in September.

Once this first campaign has been completed, Matsa will assess it's other projects for opportunities to bring them into production leveraging off the current Devon operation. Matsa is in a good position right now, has a great project in Lake Carey and we're excited with the prospects ahead as we transition into a producer."

Loading a 4 trailer road train (quad) of approx. 100t at the Devon Pit Gold Mine (7 August 2025)

Devin Pit Gold Mine ROM loader and road train (7 August 2025)

Road Train enroute to FMRs' Greenfields processing plant (7 August 2025)

Visual ore (brown streak) marked out in the Devon Pit floor between grey waste rock (7 August 2025)

First deliveries of ore at the FMR ROM Pad (7 August 2025)

The mine currently is expected to operate for approximately 18 months, selling in excess of 40,000 Oz gold. Matsa's second processing campaign is scheduled to commence mid-December 2025.
