# ASX ANNOUNCEMENT

## About Highfield Resources

Highfield Resources is an ASX listed potash company which is planning on commencing full scale construction of its flagship high margin, low capex Muga Project in Spain having finalised the initial site preparatory work and having received all permits and key licences. Muga's Mining Concession was granted in 2021, the ramp construction licence in Aragón in 2022 and the process plant construction licence in Navarra in 2023.

Muga is a unique project – with shallow mineralization and no aquifers above it there is no need to build a shaft. There is high quality and readily accessible infrastructure already in place in the region and importantly, the Muga Project is located in the heart of a European agricultural region which has a clear deficit in potash supply.

In mid-2024, the Company announced a transformative transaction to finance the construction of the Muga potash project and create a new globally diversified potash company. This transaction involved **Yankuang Energy Group Co., Ltd** and several strategic investors, and included the **proposed acquisition of the Southey potash project** in Saskatchewan, Canada, alongside the **raising of US\$220 million in equity capital**. The transaction remains subject to shareholder and regulatory approvals.

Highfield's potash tenements (Muga-Vipasca, Pintanos, and Sierra del Perdón) are located in the Ebro potash producing basin in Northern Spain, covering an area of around 250km<sup>2</sup>.
