## Aircore Drilling Resumes at Beatty Park Sth

- Tambourah's initial high-grade gold drill intercepts to be followed up with ~3,000m , ~70-hole aircore program.
- Phase 1 drilling tested only 120m of the 500m long gold in soil geochemical anomaly overlying historic drill intersections.
- The Phase 2 program is targeting potential extensions to mineralisation open to the northeast and along strike.

Tambourah Metals Ltd (ASX:TMB) is pleased to advise that a follow-up program of aircore drilling, comprising approximately 70 holes for 3,000m has commenced at the Beatty Park Sth gold project, located 160km north of Meekatharra in Western Australia (see Figure 3).

The second phase of aircore drilling will target the zone immediately east of high-grade gold intersections in BPAC016 (**6m at 25.8g/t Au from 30m in BPAC016, including 1m at 126g/t Au from 30m, see Figure 1**) and BPAC007 (**1m at 7.02g/t Au from 41m in BPAC007**) and BPAC015 (**1m at 1.11g/t Au from 30m in BPAC015**) for potential down-dip extensions to mineralisation with planned additional drilling to test the broader extent of the 500m long, +10ppb gold in soil anomaly (see Figure 2)<sup>1</sup>.

Figure 2 Area of planned second-phase aircore drilling showing Beatty Park Sth soil anomaly (yellow outline = 10ppb au) and TMB drill collars.

The Beatty Park Sth project is one of six project areas that Tambourah has acquired in the Bryah Basin. At Beatty Park Sth, gold mineralisation is hosted within ultramafic units near the upper contact of the Narracoota Formation with sediments of the Horseshoe Formation. Elsewhere in the Bryah Basin this setting hosts significant deposits of gold and base metals e.g. Harmony, Fortnum, Horseshoe Lights.

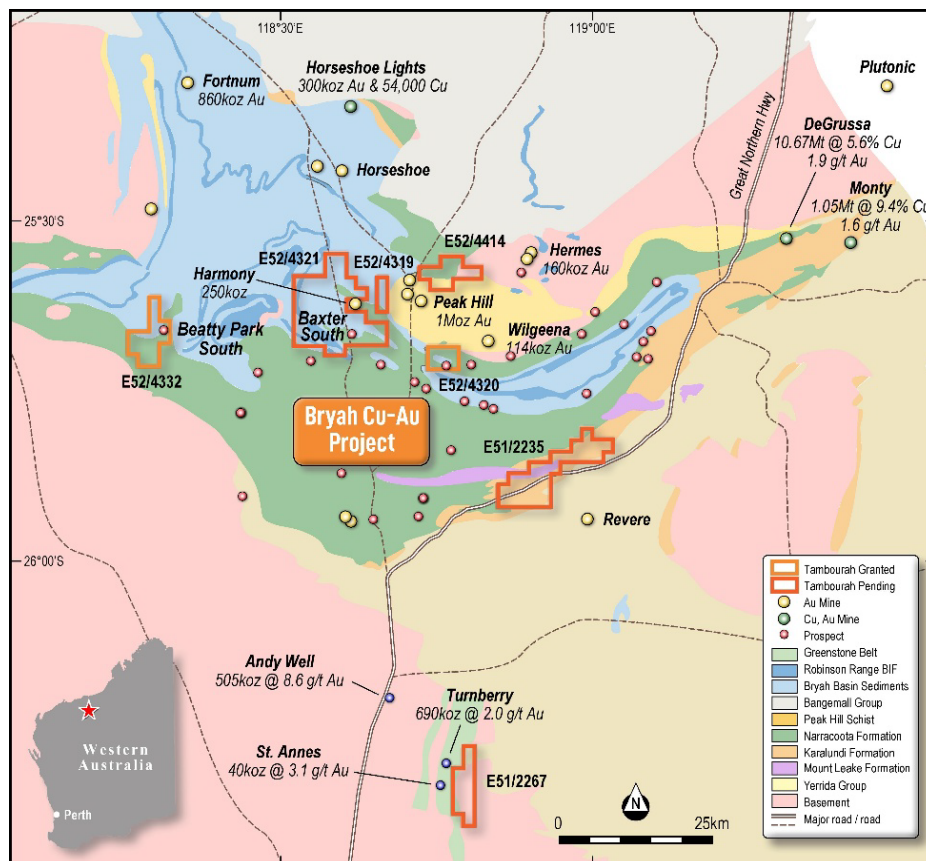

Figure 3 Location of Beatty Park Sth project (E52/4332).

Additional drilling, including targeted RC drilling, is anticipated following the completion and compilation of the results of the current program.

This announcement has been authorised for release by the Board of Directors of the Company.

## About Tambourah Metals

Tambourah Metals is a West Australian exploration company established in 2020 to develop gold and critical mineral projects. Tambourah is exploring for Gold and Critical Minerals at the Tambourah, Shaw River and Speewah Nth projects and Gold at the Bryah project in the Murchison region. Since listing the Company has extended the portfolio to include additional critical mineral projects in the Pilbara and gold projects in the Bryah, acquiring strategic positions in districts with known endowment and production.

## Forward Looking Statements

Certain statements in this document are or may be “forward-looking statements” and represent Tambourah’s intentions, projections, expectations, or beliefs concerning among other things, future exploration activities. The projections, estimates and beliefs contained in such forward-looking statements don’t necessarily involve known and unknown risks, uncertainties, and other factors, many of which are beyond the control of Tambourah Metals, and which may cause Tambourah Metals actual performance in future periods to differ materially from any express or implied estimates or projections. Nothing in this document is a promise or representation as to the future. Statements or assumptions in this document as to future matters may prove to be incorrect and differences may be material. Tambourah Metals does not make any representation or warranty as to the accuracy of such statements or assumptions.

The references in this announcement to Exploration Results were reported in accordance with Listing Rule 5.7 in the following announcements:

- “High-Grade Gold up to 126g/t Au at Beatty Park Sth”. 4<sup>th</sup> August 2025.

The Company confirms it is not aware of any new information or data that materially affects the information in the original reports and that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original reports.

## Competent Person’s Statement

The information in this report that relates to Exploration Results is based on information compiled by Mr. Bill Clayton, Geology Manager and a shareholder and Director of the Company, who is a Member of the Australian Institute of Geoscientists. Mr. Bill Clayton has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr. Clayton consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
