

Loulombo Project Update

Blaze Minerals Limited (ASX: BLZ) ("**Blaze**" or the "**Company**") is pleased to provide an update on activities in the Republic of Congo where the Company is in the final stages of preparation for a maiden drilling campaign at the Loulombo Project.

The Environmental Impact Assessment (EIA) has been completed and submitted to the Ministry of Environment and Sustainable Development, inclusive of Community Engagement activities. Final approval is pending.

The Company will seek to engage two drilling contractors, a local diamond drilling company, BCBTP, which is scheduled to commence drilling immediately upon regulatory approval, and South African based Mining Drilling Systems (Pty) Ltd, which is in the final stages of preparation of shipping documentation for mobilisation of an RC drill rig to site, a process which is expected to take approximately three weeks.

The Loulombo Project spans 195km² across two granted exploration licenses in the Republic of the Congo, located 150 kilometres west of Brazzaville.

The Loulombo Project includes the Mimpala Target, a potentially high-grade discovery which has reported exceptional results from preliminary field activities (refer ASX release 18 June 2025).

This announcement has been authorised for release by the Board of Blaze Minerals Limited.

About Blaze Minerals

Blaze Minerals is a mineral exploration company focussed on identifying and developing high-margin, high-grade, and high-value ore deposits in highly prospective regions.

The Company has a highly prospective base metals project in the Republic of the Congo:

- **Loulombo Project, the Republic of the Congo:** The Loulombo Project comprises a total of 195 square kilometres over two granted exploration licenses located 150 kilometres west of Brazzaville, inclusive of the Mimpala Target, a potentially high-grade discovery which has reported exceptional results from preliminary field activities.

The Company has two projects in Uganda:

- **Ntungamo Project, Uganda:** The Ntungamo Project is adjacent to the Mwirasandu Mine, the largest producing tin mine in Uganda, and highly prospective for critical minerals such as gallium and rubidium.
- **Mityana Project, Uganda:** The Mityana Project is the site of a historic open-cut tantalite mine.
