Virtual Copper Conference Participation

Norfolk Operations Team to present via NWR Communications Virtual Copper Conference with updates on Carmen Copper Project and the Maiden Drill Campaign.

Norfolk Metals Ltd (**Norfolk** or the **Company**) is pleased to advise it will be participating in the NWR Communications (**NWR**) Virtual Copper Conference, to be held from 12:00pm AEST (10:00am AWST) on Monday 1st September 2025. Norfolk will be presenting at approximately 12:30pm AEST (10:30am AWST).

Mr Jason Greive, Director of Transcendence Mining (Transcendence), will provide an update on the Carmen Copper Project and the Maiden Drill Program. Transcendence is the Operator and Option Vendors of the Carmen Copper Project. Mr Greive is an experienced mining executive and project development professional with over 30 years of corporate, operational, and project development experience in gold, copper, iron ore, and base metals. Mr Greive has worked for several multinational mining houses such as Barrick Gold, Placer Dome, Rio Tinto, North Ltd, and Evolution Mining across numerous jurisdictions, including Sweden, South Africa, Tanzania, Indonesia, and the Philippines. In his more recent roles with Evolution Mining as General Manager of the Cowal Gold Mine (NSW) and Red 5 as Chief Operating Officer, he was instrumental in the initiation, navigation, leadership, and delivery of significant expansion and greenfield development projects at Cowal and King of the Hills operations.

The Virtual Conference will include presentations from six (6) ASX-listed copper explorers and developers and a keynote speaker, **John Forwood, CIO of Lowell Resources Fund**. For more information on the lineup, click the link below for a summary, and you can proceed to register at your election.

About Norfolk Metals

The Carmen Copper Project (CCP) is located in the Huasco Province, Atacama Region in Chile. The Project encompasses twenty-two contiguous exploration and exploitation licenses totalling 46.6km². There are multiple mineralised targets over an extensive strike length with intensive copper mineralisation from surface. Only 16km to the northeast of the CCP is the Nueva Unión joint venture between Teck and Newmont. Nueva Unión is currently developing the multi-billion-dollar Relincho and Fortuna (previously called El Morro) deposits. Whilst the CCP currently presents as a copper oxide project with highly soluble copper oxide mineralisation from surface; it also hosts significant sulphide potential as demonstrated in historical drill intercepts that warrant further investigation and follow-up drilling programs. Norfolk is aiming to establish the Carmen Copper Project as a low-cost, high-margin, value-accretive copper heap leaching operation producing copper cathode at the mine gate.

The Orroroo Uranium Project comprises three granted exploration licenses, EL6552, EL6814 and EL6948, which together cover 723km², located approximately 274km northwest of the capital city of Adelaide, South Australia

within the Walloway Basin, which is an elongate Tertiary Basin approximately 50km long and up to 15km wide. It consists of Tertiary and Quaternary sediments unconformably underlain by Adelaidean basement.

The Roger River Project comprises two granted exploration licenses, EL20/2020, and EL17/2021, which together cover 74km², located 410km northwest of the capital city of Hobart, Tasmania. The Project is prospective for gold and copper as indicated by the intense silicification, argillisation and diatreme breccias in close proximity to the Roger River Fault along with carbonate-rich host rocks.
