BRIEF EXPLANATION OF RESULTS AND COMMENTARY ON RESULTS AND OTHER SIGNIFICANT INFORMATION

Orion's \$85k loss (before tax) for the year is principally attributable to its \$100k unrealised net loss in its investment in Strike Resources Limited (ASX:SRK) (**Strike** or **SRK**), which declined in price from 4 to 3 cents per share during the financial year.

Orion has recognised an income tax benefit of \$1.41 million from the reversal of a provision for income tax expense of \$1.41 million previously recognised as at 30 June 2024 in respect of the \$5 million total gross consideration received by Orion on the termination of a royalty in relation to the Paulsens East Iron Ore Project (in 8 March 2024). Subsequent to 30 June 2024, Orion has determined that it does not have an income tax liability due to the utilisation of available carried forward tax losses in respect of Orion's Income tax return for the financial year ended 30 June 2024.

Orion notes that it accounts for Bentley Capital Limited (ASX:BEL) (**Bentley** or **BEL**) as an Associate entity, which means that Orion is required to recognise a share of BEL's net gain or loss in respect of a financial period based on Orion's (26.95% as at 30 June 2025) shareholding interest in BEL (this is known as the equity method of accounting for an associate entity).

As a result, the Company's carrying value of its investment in Bentley has been reduced from cost to nil – as a consequence of the Company's accumulated recognition of Bentley's net losses. This compares with Bentley's closing bid price on ASX of 1 cent per share as at 30 June 2025 (valuing Orion's investment at \$0.205 million) and Bentley's after-tax NTA value of 0.65 cent per share as at 30 June 2025 (valuing Orion's investment based on Bentley's NTA backing at \$0.133 million).

Results for Announcement to the Market

The Company is not required to carry the Bentley investment at a negative value (i.e. below Nil) and if Bentley should generate net profits in the future, the Company will recognise a share of Bentley's net profits under the equity method, which will permit the Company to recognise a positive carrying value for Bentley.

Orion and Bentley's financial performance is primarily dependent on the share price performance of Strike (in which Orion has 10 million shares and Bentley has 56.7 million shares, as at 30 June 2025).

The Strike share price has traded within a range of 2.5 cents (on 17 December 2024) to 4.5 cents (on 13 May 2025) in the past 12 months, with a bid price of 3 cents (as at 30 June 2025) and a current price of 3 cents (as at 26 August 2025).

Further information about Bentley's operations financial position and performance for the financial year ended 30 June 2025 are outlined in Bentley's 30 June 2025 Full Year Report.

Please refer to the Directors' Report and Financial Report for further information on a review of Orion's operations and the financial position and performance of Orion for the financial year ended 30 June 2025.

Board Committees

During the financial year and as at the date of this Directors' Report, the Company did not have separate designated Audit or Remuneration Committees. In the opinion of the Directors, in view of the size of the Board and nature and scale of Orion's activities, matters typically dealt with by an Audit or Remuneration Committee are dealt with by the full Board.

REMUNERATION REPORT

This report details the nature and amount of remuneration for each Director and Company Executive (being a company secretary or senior manager) (**Key Management Personnel** or **KMP**) of Orion.

The information provided under headings (1) to (5) below has been audited for compliance with section 300A of the *Corporations Act 2001 (Cth)* as required under section 308(3C).

(1) Remuneration Policy

The Board determines the remuneration structure of all Key Management Personnel having regard to the Company's strategic objectives, scale and scope of operations and other relevant factors, including experience and qualifications, length of service, the duties and accountability of Key Management Personnel, the frequency of Board meetings, market practice (including available data concerning remuneration paid by other listed companies and in particular, companies of comparable size and nature) and the objective of maintaining a balanced Board which has appropriate expertise and experience, at a reasonable cost to the Company.

Corporate Governance Principles: The Company's Corporate Governance Statement (**CGS**) also addresses matters pertaining to the Board, Senior Management and Remuneration. The latest version of the CGS may be downloaded from the Company's website: www.orionequities.com.au/corporate-governance.

Fixed Cash Short-Term Employment Benefits: The Key Management Personnel of the Company are paid a fixed amount per annum plus applicable employer superannuation contributions. The Non-Executive Directors of the Company are paid a maximum aggregate base remuneration per annum inclusive of employer superannuation contributions where applicable, to be divided as the Board determines appropriate.

The Board has determined the following fixed cash remuneration for current Key Management Personnel during the year as follows:

Executive Directors

- (1) Mr Farooq Khan (Executive Chairman) - a base salary of \$150,000 per annum (with effect from 1 January 2025) plus employer superannuation contributions; and
- (2) Mr Victor Ho (Executive Director and Company Secretary) - a base salary of \$100,000 per annum (with effect from 1 January 2025) plus employer superannuation contributions.

Non – Executive Director

- (3) Mr Yaqoob Khan (Non-Executive Director) - a base fee of \$25,000 per annum.

Key Management Personnel can also opt to "salary sacrifice" their cash fees/salary and have them paid wholly or partly as further employer superannuation contributions or benefits exempt from fringe benefits tax.

Special Exertions and Reimbursements: Pursuant to the Company's Constitution, each Director is entitled to receive:

- (a) Payment for reimbursement of all travelling, hotel and other expenses reasonably incurred by a Director for the purpose of attending meetings of the Board or otherwise in and about the business of the Company; and
- (b) In respect of Non-Executive Directors, payment for the performance of extra services or the making of special exertions for the benefit of the Company (at the request of and with the concurrence of the Board).

Short-Term Benefits: The Company does not have any short-term incentive (**STI**) cash bonus schemes (or equivalent) in place for Key Management Personnel.

Long Term Benefits: The Company does not have any long-term incentive (**LTI**) cash bonus schemes (or equivalent) in place for Key Management Personnel.

REMUNERATION REPORT

Equity Based Benefits: The Company does not presently have any equity (shares or options) based remuneration arrangements for any personnel pursuant to any executive or employee share or option plan or otherwise.

Post-Employment Benefits: The Company does not presently provide retirement benefits to Key Management Personnel. Other than compulsory superannuation contribution and early termination benefits disclosed in 'Service Agreement' below, Key Management Personnel also have no right to termination payments save for payment of accrued unused annual and long service leave (where applicable) (these accrued employee entitlements are not applicable in respect of Non-Executive Directors). The Company notes that shareholder approval is required where a Company proposes to make a "termination payment" (for example, a payment in lieu of notice, a payment for a post-employment restraint and payments made as a result of the automatic or accelerated vesting of share based payments) in excess of one year's "base salary" (defined as the average base salary over the previous 3 years) to a director or any person who holds a managerial or executive office.

Service Agreements: The Company does not presently have formal service agreements or employment agreements with any Key Management Personnel.

Performance-Related Benefits and Financial Performance of Company: The Company does not presently provide short- or long-term incentive/performance-based benefits related to the Company's performance to Key Management Personnel, including payment of cash bonuses. The current remuneration of Key Management Personnel is fixed, is not dependent on the satisfaction of a performance condition and is unrelated to the Company's performance.

The Board does not believe that it is appropriate at this time to implement an equity-based benefit scheme or a performance related/variable component to Key Management Personnel remuneration or remuneration generally linked to the Company's performance but reserves the right to implement these remuneration measures if appropriate in the future (subject to prior shareholder approval where applicable).

In considering the Company's performance and its effects on shareholder wealth, Directors have had regard to the data set out below for the latest financial year and the previous four financial years.

4. SEGMENT INFORMATION (continued)

Accounting policy

The operating segments are reported in a manner consistent with the internal reporting provided to the "Chief Operating Decision Maker" (CODM). The Consolidated Entity's CODM is the Board of Directors who are responsible for allocating resources and assessing performance of the operating segments.

The Board has considered the business and geographical perspectives of the operating results and determined that the Consolidated Entity operates only within Australia, with the main segment being Investments. Corporate items are mainly comprised of corporate assets, office expenses and income tax assets and liabilities.

Description of segments

- (a) Investments comprise of equity investments of companies listed on the Australian Securities Exchange (ASX) and investment property; and
- (b) Corporate items are mainly comprised of corporate assets, office expenses and income tax assets and liabilities.

Liabilities

Liabilities are not reported to the CODM by segment. All liabilities are assessed at a consolidated entity level.

5. TAX (continued)

Critical accounting judgements and estimates

The above deferred tax assets have not been recognised in respect of the above items because it is not probable that future taxable profit will be available against which the Consolidated Entity can utilise the benefits. Revenue and capital tax losses are subject to relevant statutory tests.

The income tax benefit includes a reversal of a provision for income tax expense of \$1.4 million recognised as at 30 June 2024 in respect of the total gross consideration received (\$2 million) and receivable (\$3 million) by CXM Pty Ltd on the termination of a royalty in relation to the Paulsens East Iron Ore Project in 8 March 2024. The Consolidated Entity does not have an income tax liability due to the utilisation of available carried forward tax losses of \$12 million in respect of the Consolidated Entity's Income tax return for the year ended 30 June 2024.

Tax Consolidation

The head entity, Orion Equities Limited and its controlled entities have formed a tax consolidated group with effect from 29 June 2004. The members of the tax consolidation group continue to account for their own current and deferred tax amounts. These tax amounts are measured as if each entity in the tax consolidated group continues to be a stand-alone taxpayer in its own right.

In addition to its own current and deferred tax amounts, the Company also recognises the current tax liabilities (or assets) and the deferred tax assets (as appropriate) arising from unused tax losses and unused tax credits assumed from controlled entities in the tax consolidated group.

Assets or liabilities arising under tax funding agreements within the tax consolidated entities are recognised as amounts receivable from or payable to other entities in the group. Any differences between the amounts assumed and amounts receivable or payable under the tax funding agreement are recognised as a contribution to (or distribution from) wholly-owned tax consolidated entities.

The income tax expense or revenue for the period is the tax payable on the current period's taxable income based on the notional income tax rate for each taxing jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements, and to unused tax losses (if applicable).

Deferred tax assets and liabilities are recognised for temporary differences at the tax rates expected to apply when the assets are recovered or liabilities are settled, based on those tax rates which are enacted or substantively enacted for each taxing jurisdiction. The relevant tax rates are applied to the cumulative amounts of deductible and taxable temporary differences to measure the deferred tax asset or liability. An exception is made for certain temporary differences arising from the initial recognition of an asset or a liability. No deferred tax asset or liability is recognised in relation to these temporary differences if they arose in a transaction, other than a business combination, that at the time of the transaction did not affect either accounting profit or taxable profit or loss.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses. The amount of deferred tax assets brought to account or which may be realised in the future, is based on the assumption that no adverse change will occur in income taxation legislation and the anticipation that the Consolidated Entity will derive sufficient future assessable income to enable the benefit to be realised and comply with the conditions of deductibility imposed by the law.

8. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS

Listed securities at fair value	300,000	400,000
---------------------------------	----------------	----------------

Accounting policy

The Company has been classified under AASB 2013-5 as an Investment Entity whose business purpose is to invest funds solely for returns via capital appreciation and/or investment returns. As the Company has been classified as an Investment Entity, the investments have been accounted for at fair value through the profit or loss and shown as Financial Assets in the Statement of Financial Position. . The Company is exempt from consolidating underlying investees it controls in accordance with AASB 10 Consolidated Financial Statements.

Investments held at fair value through profit or loss are initially recognised at fair value. Transaction costs related to acquisitions are expensed to profit and loss immediately. Subsequent to initial recognition, all financial instruments held at fair value are accounted for at fair value, with changes to such values recognised in the profit or loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 30 June 2025

8. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS (continued)

Accounting policy (continued)

Shares and units in listed entities are measured at fair value on an ongoing basis. Inputs used to determine fair value are the unadjusted last-sale price, last-bid price and last-sell price quoted on the Australian Securities Exchange (ASX) at balance date. Fair value is determined at a value within the quoted bid/sell price spread with listed investments generally being valued at the quoted last-bid price. The carrying value of investments that are suspended from trading on the ASX has been determined by using appropriate valuation methods, including the last-sale price on ASX and net asset backing using the most recent reports provided by the relevant entities. Refer Note 10 for further information on fair value measurement.

9. FINANCIAL RISK MANAGEMENT

The Consolidated Entity's financial instruments consist of deposits with banks, accounts receivable and payable, investments in listed securities, and other unlisted securities. The principal activity of the Consolidated Entity is the management of its investments (Financial Assets at Fair Value through Profit and Loss) (refer Note 8). The Consolidated Entity's investments are subject to market (which includes interest rate and price risk), credit and liquidity risks.

The Board of Directors is responsible for the overall internal control framework (which includes risk management) but no cost-effective internal control system will preclude all errors and irregularities. The system is based, in part, on the appointment of suitably qualified management personnel. The effectiveness of the system is continually reviewed by management and at least annually by the Board.

The financial receivables and payables of the Consolidated Entity in the table below are due or payable within 30 days. The financial investments are held for trading and are realised at the discretion of the Board of Directors.

The Consolidated Entity holds the following financial assets and liabilities:

	Note	2025 \$	2024 \$
Cash and cash equivalents	7	4,118,008	1,458,343
Financial assets at fair value through profit or loss	8	300,000	400,000

Payables	13	(62,192)	(241,359)
Net financial assets		4,655,761	1,853,567

(a) Market risk

Market risk is the risk that the fair value and/or future cash flows from a financial instrument will fluctuate as a result of changes in market factors. Market risk comprises of price risk from fluctuations in the fair value of equities and interest rate risk from fluctuations in market interest rates.

(i) Price risk

The Consolidated Entity is exposed to equity securities price risk. This arises from investments held by the Consolidated Entity and classified in the Statement of Financial Position at fair value through profit or loss. The Consolidated Entity is not exposed to commodity price risk, save where this has an indirect impact via market risk and equity securities price risk.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 30 June 2025

9. FINANCIAL RISK MANAGEMENT (continued)

(a) Market Risk (continued)

(i) Price risk (continued)

affecting all instruments in the market. By its nature as an investment company, the Consolidated Entity will always be subject to market risk as it invests its capital in securities that are not risk free - the market price of these securities can and will fluctuate. The Consolidated Entity does not manage this risk through entering into derivative contracts, futures, options or swaps.

Equity price risk is minimised through ensuring that investment activities are undertaken in accordance with Board established mandate limits and investment strategies.

The Consolidated Entity has performed a sensitivity analysis on its exposure to market price risk at Balance Date. The analysis demonstrates the effect on the current year results and equity which could result from a change in these risks. The ASX All Ordinaries Accumulation Index was utilised as the benchmark for the unlisted and listed share investments which are financial assets available-for-sale or at fair value through profit or loss.

ASX All Ordinaries Accumulation Index	Impact on post-tax profit		Impact on other components of equity	
	2025	2024	2025	2024
	\$	\$	\$	\$

Decrease 15%	(20,458)	307	(20,458)	307

(ii) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. The Consolidated Entity's exposure to market risk for changes in interest rates relate primarily to investments held in interest bearing instruments. The weighted average interest rate for the year for the table below is 3.7% (2024: 4.19%). The revenue exposure is immaterial in terms of the possible impact on profit or loss or total equity.

	2025	2024
	\$	\$
Cash at bank	4,118,008	1,458,343

(b) Credit risk

Credit risk refers to the risk that a counterparty under a financial instrument will default (in whole or in part) on its contractual obligations resulting in financial loss to the Consolidated Entity. Credit risk arises from cash and cash equivalents and deposits with banks and financial institutions, including outstanding receivables and committed transactions. Concentrations of credit risk are minimised primarily by undertaking appropriate due diligence on potential investments, carrying out all market transactions through approved brokers, settling non-market transactions with the involvement of suitably qualified legal and accounting personnel (both internal and external), and obtaining sufficient collateral or other security (where appropriate) as a means of mitigating the risk of financial loss from defaults. The Consolidated Entity's business activities do not necessitate the requirement for collateral as a means of mitigating the risk of financial loss from defaults.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 30 June 2025

9. FINANCIAL RISK MANAGEMENT (continued)

(b) Credit risk (continued)

The credit quality of the financial assets are neither past due nor impaired and can be assessed by reference to external credit ratings (if available with Standard & Poor's) or to historical information about counterparty default rates. The maximum exposure to credit risk at Balance Date is the carrying amount of the financial assets as summarised below:

	2025	2024
	\$	\$
Cash and Cash Equivalents	4,117,858	1,458,193
AA-		

The Consolidated Entity measures credit risk on a fair value basis. The carrying amount of financial assets recorded in the financial statements, net any provision for losses, represents the Consolidated Entity's maximum exposure to credit risk.

(c) Liquidity Risk

Liquidity risk is the risk that the Consolidated Entity will encounter difficulty in meeting obligations associated with financial liabilities. The Consolidated Entity has no borrowings. The Consolidated Entity's non-cash investments can be realised to meet trade and other payables arising in the normal course of business. The financial liabilities disclosed in the above table have a maturity obligation of not more than 30 days.

10. FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS

Fair Value Hierarchy

AASB 13 (Fair Value Measurement) requires disclosure of fair value measurements by level of the following fair value measurement hierarchy:

- (i) Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- (ii) Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and
- (iii) Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

	\$	\$	\$	\$
Financial assets at fair value through profit or loss:				
Listed securities at fair value				
2025	300,000	-	-	300,000
2024	400,000	-	-	400,000

There have been no transfers between the levels of the fair value hierarchy during the financial year.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 30 June 2025

10. FAIR VALUE MEASUREMENT OF FINANCIAL INSTRUMENTS (continued)

(a) Valuation techniques

The fair value of the listed securities traded in active markets is based on closing bid prices at the end of the reporting period. These investments are included in Level 1.

The fair value of any assets that are not traded in an active market are determined using certain valuation techniques. The valuation techniques maximise the use of observable market data where it is available, or independent valuation and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2. If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3.

(b) Fair values of other financial assets and liabilities

		2025	2024
		\$	\$
Cash and cash equivalents	7	4,118,008	1,458,343

Current payables	13	(62,192)	(241,359)
		4,358,583	4,453,567

Due to their short-term nature, the carrying amounts of cash, current receivables and current payables is assumed to approximate their fair value.

Change in Classification – Reclassification from Asset Held for Sale to Investment Property

A real property non-current asset has been reclassified from being a 'Property held for redevelopment and resale' (under AASB 5) to an 'Investment property' (under AASB 140) in light of the current status of the property where the Consolidated Entity is not undertaking an active program to sell or redevelop the property. The property is still measured at fair value, with any changes in value recorded in statement of profit or loss and other comprehensive income. This reclassification did not have a material financial effect for the financial year and prior year comparative values have not been adjusted.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 30 June 2025

12. INVESTMENT PROPERTY (continued)

Critical accounting judgements and estimates

The investment property was valued by an independent qualified valuer (a Licensed Valuer of the Australian Property Institute) at \$2,100,000 as at 30 June 2025 (2024: \$1,850,000). The \$250,000 increase in value has been recognised as a fair value gain in the statement of profit or loss and other comprehensive income.

Accounting policy

The investment property was initially valued at its cost. Cost includes the cost of acquisition and any directly attributable expenditure. The investment property is now valued based on its fair value. A gain or loss arising from a change in the fair value of investment property is recognised in statement of profit or loss and other comprehensive income..

Accounting policy

These amounts represent liabilities for goods and services provided to the Consolidated Entity prior to the end of the financial year which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition.

Risk exposure

The Consolidated Entity's exposure to risks arising from current payables is set out in Note 9.

(a) Amounts not expected to be settled within 12 months

The provision for annual leave and long service leave is presented as current since the Consolidated Entity does not have an unconditional right to defer settlement for any of these employee benefits. Long service leave covers all unconditional entitlements where employees have completed the required period of service and also where employees are entitled to pro-rata payments in certain circumstances.

Based on past experience, the employees have never taken the full amount of long service leave or require payment within the next 12 months. The following amounts reflect leave that is not expected to be taken or paid within the next 12 months:

17. CAPITAL RISK MANAGEMENT

The Company's objectives when managing its capital are to safeguard its ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders and to maintain a capital structure balancing the interests of all shareholders.

The Board will consider capital management initiatives as is appropriate and in the best interests of the Company and shareholders from time to time, including undertaking capital raisings, share buy-backs, capital reductions and the payment of dividends.

19. INVESTMENT IN CONTROLLED ENTITIES (continued)

Accounting policy

Subsidiaries are fully consolidated from the date on which control is transferred to the Consolidated Entity. They are de-consolidated from the date that control ceases.

All controlled entities have a June financial year-end. All inter-company balances and transactions between entities in the Consolidated Entity, including any unrealised profits or losses, have been eliminated on consolidation.

Changes in Ownership Interests

When the Consolidated Entity ceases to have control, any retained interest in the entity is re-measured to its fair value with the change in carrying amount recognised in profit or loss. The fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Consolidated Entity has directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.
