

An aerial photograph of a mining or exploration site. On the right side, there is a dirt road with two white vehicles, possibly trucks or cars, parked or moving. The ground is reddish-brown and shows signs of excavation or mining activity. On the left side, there is a large, white, rectangular area that appears to be a placeholder or a design element. The overall scene is arid and dusty.

## Directors' Report

The directors present their report, together with the financial statements, on the consolidated entity (referred to hereafter as the 'consolidated entity') consisting of GoldArc Resources Limited (previously known as Asra Minerals Limited) (referred to hereafter as the 'Asra', 'Company' or 'parent entity') and the entities it controlled at the end of, or during, the half-year ended 30 June 2025.

### Directors

The following persons were directors of GoldArc Resources Limited during the whole of the financial half-year and up to the date of this report, unless otherwise stated:

Mr Paul Summers – Non-Executive Chairman

Mr Paul Stephen – Managing Director (appointed 5 June 2025, previously Chief Executive Officer)

Mr Ziggy Lubieniecki – Non-Executive Technical Director (appointed 3 September 2025)

Mr Leonard Math – Non-Executive Director

Mr Mathew Longworth – Non-Executive Director (resigned 3 September 2025)

### Principal activities

The activities of the Company and its subsidiaries during the half-year ended 30 June 2025 was mineral exploration for gold in Western Australia.

### Review of operations

GoldArc has a growing portfolio in the premier Goldfields region of Western Australia and has undertaken exploration activities across its gold projects in the Leonora North and South Projects.

The profit for the consolidated entity after providing for income tax and non-controlling interest amounted to \$513,957 (30 June 2024: Loss of \$1,496,470).

### Leonora South Gold Project - Kookynie

The Company completed a targeted 1,300m drill program which consisted of approximately 1,000m RC drilling and ~300m diamond tails across six hole, focused on testing down-dip extensions of the high-grade Orion and Sapphire deposits. The primary objective was to confirm the continuity of mineralisation at depth and evaluate the potential for resource expansion. The targets were identified following a detailed reinterpretation of aeromagnetic data in Q4 FY2024, building on the success of a three-hole diamond drill program completed in October 2024. That earlier program intersected strong gold grades approximately 30m below previously drilled zones at Orion and Sapphire, validating the Company's geological model and significantly enhancing the prospectivity of the areas.

In addition to the work completed at Orion and Sapphire, and as part of this program, the Company was also able to complete 4 RC holes at the nearby Gladstone Prospect. the Company announced highly encouraging assay results from its recent Reverse Circulation (RC) drilling program at the Gladstone Prospect. This drilling program comprised several strategic holes designed to test both infill and extensional targets within the Gladstone mineralisation. All drill holes intersected gold mineralisation, providing strong resource potential and warranting further investigation.

The key intercepts include:

- **2m at 18.31g/t Au** from 60m in NIC014 including **1m at 34.74g/t Au** from 62m (**40.78g/t Au** repeat assay)
- **1m at 4.13g/t Au** from 105m in NIC016
- **2m at 3.18g/t Au** from 57m and **3m at 2.01g/t Au** from 64m in NIC001
- **1m at 2.9g/t Au** from 111m in NIC013
- **2m at 1.07g/t Au** from 77m in NIC015

This drilling successfully demonstrates the extension of mineralisation at Gladstone up to 45m below previously drilled intercepts and validates the presence of coarse gold, and high grades at depth as indicated by historical intersections, strengthening confidence in the 1994 drilling at all prospects.

## **Leonora North Gold Project – Mt Stirling**

At Leonora North, 1:25,000 litho-structural processing and interpretation by SGC resulted in the identification of 15 untested priority gold targets for testing in the upcoming Q4 CY25 drilling program.

The Ursus Fault and its splays host over 300k ounces of reported resources. Historical drilling data suggests potential for more resources, with only 3km of the fault system tested so far, leaving 9km still to explore. Recent soil sampling over this 9km has returned significant gold values, with the highest at 541 ppb Au north of the Mt Stirling-Viserion resource, indicating gabbro-related mineralisation near the Wonambi Fault. These anomalous areas will be prioritised for drill testing in the next program.

## **Corporate**

### ***Completion of \$3M Tarmoola Pastoral Lease Sale***

In January 2025, the Company received the balance of proceeds (A\$2.75 million) for the sale of the Tarmoola Pastoral Lease to Vault Minerals Ltd (ASX:VAU).

On 4<sup>th</sup> September 2024, the Company entered into a binding Sale and Purchase Agreement (“Agreement”) with Vault Minerals Ltd for the sale of the Tarmoola Pastoral Lease, remaining livestock and relevant plant equipment for a total purchase price of \$3 million in cash.

The Company retained the accommodation camp, kitchen, laundry, ablution facilities (“Exploration Camp”) and use of the access road, all located in an area approximately 10km<sup>2</sup>. Retention of these assets provides important support to the Company during future exploration programs. The sale also delivers substantial operational cost savings, allowing the Company to advance its strategy of regional consolidation and systematic exploration in the prolific Leonora Gold region.

### ***Sale of Boorara Leases***

In line with the Company’s strategy to focus on its gold assets, the Company executed a Binding Heads of Agreement with Northern Star (KLV) Pty Ltd (“Purchaser”), a subsidiary of Northern Star Resources Ltd (ASX:NST), for the divestment of the Boorara Leases for a cash consideration of A\$200,000. The sale included all rights, titles and interest in the Boorara tenement package, associated mining information and all statutory licences and approvals. The sale was completed during the half year.

### ***Secure of 100% Ownership of Mt Cutmore***

On the 14<sup>th</sup> May 2025, the Company announced the execution of a Binding Term Sheet to acquire the remaining 49% interest in the Mt Cutmore prospects, located at the Mt Stirling Leonora North Gold Project. The Company acquired the prospects from joint venture partners Ross Crew, Russell McKnight and Christopher Crew for a consideration of A\$200,000 cash and the issue of 75,000,000 fully paid ordinary shares in the Company at a deemed issue price of \$0.002 per share (pre-consolidation).

The ownership consolidation significantly enhances the Company’s exploration optionality and strengthens its overall strategic position within the region.

### ***Completion of \$3M Placement***

During the half year, the Company successfully completed a two-tranche placement, \$3.0 million (before costs) at \$0.002 per share (“Placement”) (pre-consolidation). This placement attracted support from new and existing institutional and sophisticated investors.

The proceeds from the Placement are to be used to accelerate exploration activities at the company’s Leonora Gold Projects, specifically enabling more aggressive drill programs. The funds will also be used for the evaluation and acquisition of accretive and synergistic project opportunities, and general working capital and corporate overheads.

The Offer included one (1) free option for every one (1) New Shares subscribed for under the Placement (“New Options”). The New Options will be exercisable at a A\$0.004 (pre-consolidation), each with an expiry date of 30 June 2028.

Discovery Capital Partners Pty Ltd and GBA Capital Pty Ltd are acting as Joint Lead Managers to the Placement.

**Key Leadership and Technical Appointments**

Several key leadership and technical team appointments were made during the quarter, underscoring the Company's commitment to building a high-calibre team to advance its portfolio of projects.

Mr Paul Stephen, formerly the Company's Chief Executive Officer (CEO), was appointed to Managing Director. Mr Stephen joined the Company as CEO in December 2024 and has been instrumental in driving Asra's refined strategic focus. The transition reflects his contributions to date further enhances Asra's capabilities to execute its strategic objectives for the Leonora Gold Project.

Also of significance during the quarter was the appointment of Mr Ziggy Lubieniecki as a Geological Consultant. Mr Lubieniecki is a highly respected geologist with over 39 years' experience in mineral exploration, discovery and project development across gold and a range of key commodities. His expertise will be invaluable in guiding the Company's exploration strategies and ongoing exploration programs. Subsequent to the half year, Mr Lubieniecki was appointed to the Board as Non-Executive Technical Director.

Additionally, current Non-Executive Director and Company Secretary, Mr Leonard Math, was appointed as the Company's new Chief Financial Officer (CFO). As an integral existing member of the board, Mr Math also brings more than 17 years' experience in Director, CFO and Company Secretary roles to the position, ensuring strong leadership.

In addition to the above appointments, Mr Paul Summers also stepped down from the role of Executive Chairman, remaining on as Non-Executive Chairman.

## **RISK MANAGEMENT**

Risk management is a key part of improving our business and our aim is to ensure that all business operations are performed within Board approved risk tolerance levels. To achieve this aim, Risk Management standards will be created, maintained and continually improved. This will involve risk identification and risk evaluation linked to practical and cost-effective risk control measures commensurate with our business. Risk Management is a continuous process demanding awareness and proactive action from all Company employees and contractors to reduce the possibility and impact of accidents and losses, whether caused by the Company (and its subsidiaries, collectively "The Group") or externally.

## **FACTORS AND BUSINESS RISKS AFFECTING FUTURE BUSINESS PERFORMANCE**

The following factors and business risks could have a material impact on the consolidated entity's success in delivering its strategy:

### **Funding**

The consolidated entity is likely to need to raise capital to explore and develop its projects. There is no guarantee that the consolidated entity will be able to secure any additional funding or will be able to secure funding on terms that are favourable or acceptable to the consolidated entity.

### **Exploration and Operating Risks**

The projects of the consolidated entity are at various stages of exploration. The future exploration activities of the consolidated entity may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents, native title process, changing government regulations and many other factors beyond the control of the consolidated entity.

### **Health and Safety**

The consolidated entity is exposed to potential safety hazards within its operations in Australia.

### **Aboriginal title and consultation issues**

Native title claims as well as related consultation issues may impact the ability to pursue exploration, development and mining. Managing relations with traditional owners is a matter of paramount importance to the consolidated entity. However, there may be no assurance that title claims as well as related consultation issues will not arise on or with respect to the consolidated entity's exploration Licences.

### **Commodity Prices, Services and Exchange Rates**

Commodity prices and the cost of services fluctuate according to changes in demand and supply. Changes in commodity prices can significantly impact exploration activities and investment decisions.

### **Key Person and Workforce**

The consolidated entity's success is to a large extent dependent upon the retention of key personnel and the competencies of its directors, senior management, and personnel. The inability to attract and retain a suitably skilled and diverse leaders and workforce is a risk to consolidated entity performance in the conduct of its business.

### **Tenure and Access risk**

While the consolidated entity does not anticipate there to be any issues with the grant or renewals of its tenements, there can be no assurance that the application (or future applications) will be granted. Mining and exploration tenements are subject to periodic renewal and reviews. The renewal of the term of granted tenure may be subject to the discretion of the relevant authorities and may include increased expenditure or obligations on the consolidated entity or compulsory relinquishment of areas of the tenements.

### **Environmental Regulation**

The mining leases granted to the consolidated entity pursuant to their respective country Mining Acts are granted subject to various conditions, which include standard environmental requirements. The consolidated entity adheres to these conditions and the Directors are not aware of any contraventions of these requirements. The Directors have considered compliance with the National Greenhouse and Energy Reporting Act 2007 which requires entities to report annual greenhouse gas emissions and energy use. For the first measurement period the directors have assessed that there is no current reporting requirements but may be required to do so in the future.

### Going concern

The Directors have prepared the interim financial report on a going concern basis, which contemplates the continuity of normal business activities and the realisation of assets and the settlement of liabilities in the ordinary course of business.

For the half-year financial report ended 30 June 2025, the consolidated entity had net cash outflows from operating activities of \$889,636 and payment of exploration and evaluation of \$2,802,964 for the half-year ended 30 June 2025. The ability to continue as a going concern and realise its exploration asset is dependent on a number of factors, the most significant of which is obtaining additional funding to continue its exploration activities.

These factors indicate a material uncertainty which may cast significant doubt as to whether the consolidated entity will continue as a going concern and therefore whether it will realise its assets and extinguish its liabilities in the normal course of business and at the amounts stated in the interim financial report.

The directors have reviewed the consolidated entity's overall position and outlook in respect of the matters identified above and are of the opinion that the use of the going concern basis is appropriate in the circumstances for the following reasons:

- The Company has a strong track record in raising external capital. The Board are confident of raising further capital through equity raising when deemed necessary with placement capacity under ASX Listing Rule 7.1 and 7.1A;
- The consolidated entity is exploring the possibility of entering into a number of joint venture arrangements for the development of some of its mining projects;
- The consolidated entity has the ability to dispose some of its assets as and when required; and
- The consolidated entity has the ability to scale back its exploration activities should funding not be available continue exploration at its current levels.

Accordingly, the Directors believe that the consolidated entity will be able to continue as a going concern and that it is appropriate to adopt the going concern basis in the preparation of the interim financial report.

The interim financial report does not include any adjustments relating to the amounts or classification of recorded assets or liabilities that might be necessary if the consolidated entity does not continue as a going concern.

## INDEPENDENT AUDITOR'S REVIEW REPORT TO THE MEMBERS OF GOLDARC RESOURCES LIMITED

### Report on the Half-Year Financial Report

#### Conclusion

We have reviewed the accompanying half-year financial report of GoldArc Resources Limited (the Company), which comprises the consolidated statement of financial position as at 30 June 2025, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the half-year ended on that date, notes comprising material accounting policy information and other explanatory information, and the directors' declaration of the Consolidated Entity comprising the Company and the entities it controlled at the half-year end or from time to time during the half-year.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of GoldArc Resources Limited is not in accordance with the *Corporations Act 2001* including:

- (a) giving a true and fair view of the Consolidated Entity's financial position as at 30 June 2025 and of its performance for the half-year ended on that date; and
- (b) complying with Accounting Standard AASB 134 *Interim Financial Reporting* and *Corporations Regulations 2001*.

#### Basis for Conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the Auditor's Responsibilities for the Review of the Financial Report section of our report. We are independent of the Company in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of GoldArc Resources Limited, would be in the same terms if given to the directors as at the time of this auditor's review report.

### *Material Uncertainty Related to Going Concern*

We draw attention to Note 1, which indicates that the Consolidated Entity had net cash outflows from operating activities of \$889,636 and payment of exploration and evaluation of \$2,802,964 for the half-year ended 30 June 2025. As stated in Note 1, these events or conditions, along with other matters as set forth in Note 1, indicate that a material uncertainty exists that may cast significant doubt on the Consolidated Entity's ability to continue as a going concern. Our conclusion is not modified in respect of this matter.

### *Directors' Responsibility for the Half-Year Financial Report*

The directors of GoldArc Resources Limited are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that is free from material misstatement, whether due to fraud or error.

### *Auditor's Responsibility for the Review of the Half-Year Financial Report*

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of the Consolidated Entity's financial position as at 30 June 2025 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
