CHAIRMAN'S LETTER

4 November 2016

Dear Metaliko Shareholders,

RECOMMENDED OFF-MARKET TAKEOVER BID FOR METALIKO RESOURCES LIMITED

On 29 September 2016, Echo Resources Limited (**Echo**) announced its intention to make an off-market takeover offer for all the shares in Metaliko Resources Limited (**Metaliko**). On behalf of the directors of Echo, I am pleased to provide you with this Bidder's Statement detailing Echo's offer to acquire your Metaliko Shares.

By accepting Echo's offer you will, subject to the terms and conditions of the offer, receive 1 Echo Share for every 2.5 Metaliko Shares held as at the Record Date (Offer).

The terms and conditions of the Offer are explained further in Annexure A to this Bidder's Statement.

The Directors of Metaliko unanimously recommend that Metaliko Shareholders accept the Offer in the absence of a Superior Proposal.

Once completed (and assuming Echo holds a relevant interest in at least 90% of all Metaliko Shares on issue and moves to compulsory acquisition), the merger will create a strong emerging gold exploration company with potential for near term production and positive cashflow with excellent exploration upside in one of the premier Australian gold provinces.

The Offer provides a premium for your Metaliko Shares

The recommended Offer represents a premium of approximately:

- 24% to the last closing price on the ASX of Metaliko Shares of \$0.071 on 27 September 2016¹; and
- 38% to the 20-day volume weighted average market price (VWAP) of Metaliko Shares on the ASX of \$0.066 to 27 September².

Based on Echo's last closing share price of \$0.22 on the ASX on 27 September 2016, the Offer values Metaliko at approximately \$38.9 million or \$0.088 per Metaliko Share (on a fully diluted basis)³.

Based on Echo's last closing share price of \$0.24 on the ASX on 3 November 2016, the last trading date of Echo before the date of this Bidder's Statement, the Offer values Metaliko at approximately \$42.4m, or \$0.096 per Metaliko Share (on a fully diluted basis). This represents a premium of approximately 18.5% to the 10-day VWAP of Metaliko on the ASX of \$0.081 to 3 November 2016.

¹ Based on the last closing share price of \$0.22 on the ASX of Echo Shares on 27 September 2016, the last trading date of Echo and Metaliko before the Announcement Date.

² Based on the 20-day VWAP of Echo Shares on ASX of \$0.226 to 27 September 2016.

³ Based on Metaliko having a total of 441,614,328 Shares on issue on a fully diluted basis. The Directors note that the implied value of Metaliko based on the Offer will fluctuate depending on the prevailing trading price of Echo Shares. The Merged Entity's share price may rise or fall based on market conditions and the Merged Entity's financial and operational performance. If the Merged Entity's share price falls, the value of the Echo Shares received by Metaliko Shareholders that accept the Offer will decline in value.

If Echo acquires at least 90% of all Metaliko Shares, it intends to proceed with compulsory acquisition of the remaining Metaliko Shares and de-list Metaliko from the ASX.

A number of Metaliko Shareholders holding in aggregate approximately 56% of Metaliko Shares have indicated that they intend to accept the Offer in the absence of a Superior Proposal within 10 Business Days of Echo Shareholders approving, for the purposes of ASX Listing Rule 10.1, the issue of Echo Shares to Mr Michael Ruane and his Associates under the Offer. Refer to Section 9.8 for details in relation to the upcoming Annual General Meeting of Echo at which this approval is being sought. A list of the Metaliko Shareholders that have indicated that they intend to accept the Offer, in the absence of a Superior Proposal, is set out in Section 9.6.

Participate in benefits under the Offer

Merging Metaliko and Echo:

- provides potential for a rapid and modest-cost pathway to production for Echo's Julius Gold Project by utilising Metaliko's 2 Mtpa Bronzewing processing facility;
- potentially allows the Julius Gold Project to be brought into production as soon as mid 2017;
- the Echo Julius Scoping Study base case has indicated that the Julius stage 1 and 2 open pit would generate an EBITDA of \$47m (A\$1,600/oz Au) via toll treatment (the high case indicated EBITDA of \$54m with A\$1,700/oz Au) ⁴. Utilising the Bronzewing mill may increase the EBITDA;
- will give the combined company a contiguous tenement holding along 130km of the Yandal greenstone belt which represents the largest contiguous land holding between the operating Darlot and Jundee gold mines; and
- the merger provides exposure to high quality mineral resources and additional highly prospective tenements.

I encourage you to read this important document carefully, including the risk factors set out in Section 8. The Offer is open for your acceptance until 5:00pm (WST) on 12 December 2016, unless extended. If you wish to accept the Offer, you should follow the instructions on the relevant Acceptance Form enclosed.

If you have any questions about the Offer, please contact Echo on +61 (08) 9389 8726, or your professional financial advisor.

Yours sincerely

Mr Barry Bolitho
Chairman
ECHO RESOURCES LIMITED

⁴ Refer Julius Scoping Study – released by Echo to ASX 21 June 2016. All material assumptions underpinning the production targets and forecast financial information derived from the production targets set out in the announcement of 21 June 2016 continue to apply and have not materially changed. Echo has concluded it has a reasonable basis for providing these forward looking statements. The Scoping Study is based on low-level technical and economic assessments, and is insufficient to support estimation of Ore Reserves or provide assurance of an economic development case at this stage, or to provide certainty that conclusions of the Scoping Study will be realised. There is low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the production target itself will be realised.

6.	What happens if I do not accept the Offer?	Subject to the explanation below, you will remain a shareholder of Metaliko and will not receive the Offer Consideration. If you do not accept the Offer and Echo acquires a Relevant Interest in at least 90% of Metaliko Shares during or at the end of the Offer Period and the other Conditions of the Offer are satisfied or waived, Echo intends to proceed to compulsorily acquire the outstanding Metaliko Shares. If your Metaliko Shares are compulsory acquired by Echo, it will be on the same terms (including the Offer Consideration for each Metaliko Share acquired) as the Offer. If the Offer becomes or is declared unconditional or the Conditions are satisfied or waived but Echo does not become entitled to compulsorily acquire your Metaliko Shares under the Corporations Act, unless you sell your Metaliko Shares, you will remain a shareholder in Metaliko. In these circumstances and, depending on the number of Metaliko Shares acquired by Echo, you may be a minority Metaliko	Section 6 of this Bidder's Statement provides more information regarding Echo's intentions if it acquires a Relevant Interest in at least 90% of the Metaliko Shares during or at the end of the Offer Period.

7.	Are there conditions to the Offer?	The Offer is subject to the Conditions set out in Section 1.9 of Annexure A and include: (a) Echo acquiring an interest in at least 90% of all Metaliko Shares on issue at the end of the Offer Period (at any time prior to Echo obtaining a Relevant Interest in at least 80% of Metaliko Shares this condition can only be waived with the consent of Metaliko); (b) that no Metaliko Prescribed Occurrences occurs; and (c) that no Metaliko Material Adverse Change occurs. As at the date of this Bidder's Statement, Echo is not aware of any act, omission, event or fact that would result in any of the Conditions to the Offer being triggered (or not being satisfied, as appropriate).	Section 1.9 of Annexure A to this Bidder's Statement sets out the Conditions in full.
8.	What if the Conditions are not satisfied or waived?	If the Offer closes and the Conditions are not satisfied or waived, the Offer will lapse, and your acceptance will be void. In other words, you will continue to hold your Metaliko Shares (unless you otherwise sell them). Echo will announce whether the Conditions have been satisfied or waived during the Offer Period in accordance with its obligations under the Corporations Act.	Sections 1.9 to 1.11 of Annexure A to this Bidder's Statement sets out further information.
9.	What are the tax implications of accepting the Offer?	A general summary of the major Australian tax consequences for Metaliko Shareholders who accept the Offer is set out in Section 7 of this Bidder's Statement. This summary is expressed in general terms only and is not intended to provide taxation advice for your specific circumstances. Metaliko Shareholders should seek their own taxation advice in relation to the Offer.	Section 7 of this Bidder's Statement set out further information.
10.	Can I sell my Metaliko Shares on market? 11.	What happens if Echo improves the Offer Consideration?	If Echo improves the Offer Consideration, all the Metaliko Shareholders who accept the Offer (whether or not they have accepted the Offer before or after such improvement) will be entitled to the benefit of the improved Offer Consideration, should the Offer become or be declared unconditional.	Annexure A to this Bidder's Statement sets out further information.

2. WHY YOU SHOULD ACCEPT THE OFFER

Echo Directors believe you should accept the Offer for the following reasons.

- 1. The Directors of Metaliko unanimously recommend that Metaliko Shareholders accept the Offer, in the absence of a Superior Proposal**
- 2. The Merged Entity will create a strong emerging gold exploration company with potential for near term production and positive cashflow with excellent exploration upside in one of the premier Australian gold provinces**
- 3. The Offer provides a premium to the price of Metaliko Shares in the period prior to the Announcement Date**
- 4. The Merged Entity will have a strong board and management team that can deliver the strategy and growth going forward**
- 5. You may be eligible to receive capital gains tax relief in Australia if Echo achieves ownership of more than 80% of Metaliko Shares**
- 6. Metaliko's Share price may fall if the Offer is not successful**
- 7. As at the date of this Bidder's Statement no Superior Proposal exists**
- 8. Certain Metaliko Shareholders have indicated an intention to accept the Offer in the absence of a Superior Proposal**
- 9. No duty or brokerage will be payable by Metaliko Shareholders**
- 10. There are implications of being a minority shareholder of Metaliko if you do not accept the Offer**

The above is only a headline summary of some of the reasons why you should accept the Offer. Each of the reasons is explained below.

If you wish to accept this Offer, you must return the signed Acceptance Form by **5:00pm (Perth time) on 12 December 2016** (unless the Offer is extended or withdrawn).

2.1 Unanimous recommendation from Metaliko's Directors

The Directors of Metaliko's have unanimously recommended that Metaliko Shareholders accept the Offer, in the absence of a Superior Proposal.

Each Metaliko Director who holds Metaliko Shares intends to accept, or procure the acceptance of, the Offer in respect of any Metaliko Shares that they own or control, in the absence of a Superior Proposal within 10 Business Days of Echo Shareholders approving, for the purposes of ASX Listing Rule 10.1, the issue of Echo Shares to Mr Michael Ruane and his Associates under the Offer.

If you are an Eligible Shareholder and you accept the Offer made to you and that Offer becomes or is declared unconditional or the Conditions are satisfied or waived, you will receive the Offer Consideration, being 1 Echo Share for every 2.5 Metaliko Shares you hold.

As at the date of this Bidder's Statement, Echo is not aware of any Superior Proposal having been received by Metaliko and Metaliko has not made Echo aware of any party having made an intention to make such a proposal.

2.2 Creation of a strong emerging gold exploration company

If the Offer is successful, Eligible Shareholders who accept the Offer will become part of a substantial gold business pursuing a rapid and modest-cost pathway to production through the combination of established mineral resources at the Julius Gold Project and the 2 Mtpa Bronzewing processing facility.

In addition to continuing to have exposure to the future upside associated with the Julius Gold Project through owning shares in the Merged Entity, Metaliko Shareholders will gain exposure to a number of benefits of the Merged Entity, including:

- (a) global gold mineral resources (JORC 2004 and JORC 2012) of in excess of 800,000 ounces⁶ with substantial exploration and resource conversion potential;
- (b) a contiguous tenement holding along 130km of the Yandal greenstone belt which represents the largest contiguous land holding between the operating Darlot and Jundee gold mines;
- (c) the Merged Entity's enlarged size and balance sheet are expected to improve access to future development funding at a lower cost than what Metaliko could achieve on its own and provide the Merged Entity with the flexibility to support near term project funding and accelerate exploration and development activities;
- (d) a simplified single ownership structure and operational management of assets currently owned by Metaliko. This is expected to allow for the acceleration of exploration and development of the Julius Gold Project; and
- (e) the Merged Entity may receive increased coverage from equity research analysts, benefit from greater relevance and interest from institutional investors and increased access to a wider range of investors. This may result in a market re-rating of the Merged Entity that is superior to the market ratings of Echo and Metaliko as stand-alone companies.

2.3 Premium on Metaliko Shares

Under the Offer, Eligible Shareholders are being offered 1 Echo Share for every 2.5 Metaliko Shares held as at the Record Date. The Offer represents a premium of:

- (a) 24% to the last closing price on the ASX of Metaliko Shares of 7.1 cents on 27 September 2016⁷; and
- (b) 38% premium to the 20-day VWAP of Metaliko Shares to the Announcement Date⁸.

⁶ See Appendix 1 of Echo's ASX announcement dated 29 September 2016 for full details of mineral resource estimates

⁷ Based on Echo's last closing share price of 22 cents on the ASX on 27 September 2016, the last trading date of Echo and Metaliko before the Announcement Date.

⁸ Based on the 20-day VWAP of Echo Shares on ASX of 22.6 cents and the 20-day VWAP of Metaliko Shares of 6.6 cents to 27 September 2016.

Based on Echo's last closing share price of \$0.22 on the ASX on 27 September 2016, the Offer values Metaliko at approximately \$38.9 million or \$0.088 per Metaliko Share (on a fully diluted basis)⁹.

Based on Echo's last closing price of \$0.24 on the ASX on 3 November 2016 the last trading date of Echo Shares before the date of this Bidder's Statement, the Offer values Metaliko at approximately \$42.4 million, or \$0.096 per Metaliko Share. This represents a premium of approximately 18.5% to the 10-day VWAP of Metaliko on the ASX of \$0.081 to 3 November 2016.

The price of Echo Shares and Metaliko Shares may rise or fall during the Bid Period. You should note that continued fluctuations in the price of Echo Shares will continue to favourably or adversely impact the implied value of the Offer.

2.4 Strong board and management team of the Merged Entity

The board and management team of the Merged Entity are highly credentialed and experienced with delivering operational excellence, and is proposed to be expanded with the appointment of Robin Dean and Mark Hanlon as Non-Executive Directors. Further details on the current Echo Directors and the Proposed Directors are set out in to Section 3.3.

By accepting the Offer, Eligible Shareholders will become a shareholder in the Merged Entity which will benefit from a high quality management team and business model.

2.5 Potential eligibility for capital gains tax relief in Australia

Provided Echo achieves ownership of more than 80% of the issued Metaliko Shares, Eligible Shareholders may be entitled to scrip for scrip relief from capital gains tax on the Echo Shares they receive under the Offer. Such rollover relief, if available, will allow those Eligible Shareholders to disregard any capital gain in whole or in part, that would otherwise arise in respect of the disposal of their Metaliko Shares by way of acceptance of the Offer. However, Metaliko Shareholders may be subject to capital gains tax as a result of a later taxable event (such as a disposal) happening to the Echo Shares received as consideration under the Offer. Please refer to Section 7 of this Bidder's Statement for more information. You should consult a qualified tax adviser for further taxation advice.

2.6 Metaliko's share price may fall if the Offer is not successful

Echo believes that if the Offer does not succeed, and if there are subsequently no other alternative offers or proposals for Metaliko Shares, the trading price of Metaliko Shares may fall and Metaliko Shares may trade below the implied value of the Offer Consideration.

⁹ Based on Metaliko having a total of 441,614,328 Shares on issue on a fully diluted basis. The Directors note that the implied value of Metaliko based on the Offer will fluctuate depending on the prevailing trading price of Echo Shares. The Merged Entity's share price may rise or fall based on market conditions and the Merged Entity's financial and operational performance. If the Merged Entity's share price falls, the value of the Echo Shares received by Metaliko Shareholders that accept the Offer will decline in value.

In such circumstances, the current market conditions may make it challenging for Metaliko to raise equity funding, and any equity raising is likely to be dilutive to the existing Metaliko Shareholders who do not participate in that raising.

2.7 No Superior Proposal

The Offer is the only offer available for your Metaliko Shares as at the date of this Bidder's Statement. Echo is not aware of any other party intending to make an offer for Metaliko Shares which is superior to the Offer and Metaliko has not made Echo aware of any party having made an intention to make such a proposal.

2.8 Support from major Metaliko Shareholders

A number of Metaliko Shareholders holding in aggregate approximately 56% of Metaliko Shares have indicated that they intend to accept the Offer in the absence of a Superior Proposal within 10 Business Days of Echo's shareholders approving, for the purposes of ASX Listing Rule 10.1, the issue of Echo Shares to Mr Michael Ruane and his Associates under the Offer. Refer to Section 9.8 for details in relation to the upcoming Annual General Meeting of Echo. A list of the Metaliko Shareholders that have indicated that they intend to accept the Offer, in the absence of a Superior Proposal, is set out in Section 9.6.

2.9 No duty or brokerage

If your Metaliko Shares are registered in an Issuer Sponsored Holding in your name and you deliver a duly executed Acceptance Form to Echo, you will not incur any brokerage in connection with your acceptance of the Offer.

If your Metaliko Shares are registered in a CHESS Holding, or if you are a beneficial owner whose Metaliko Shares are registered in the name of a broker, bank custodian or other nominee, you will not be obliged to pay duty by accepting the Offer, but you should ask your Controlling Participant (usually your broker) or that nominee whether it will charge any transaction fees or service charges in connection with acceptance of the Offer.

If you are an Ineligible Foreign Shareholder or Unmarketable Parcel Shareholder, brokerage will be payable in respect of the Echo Shares sold by the Sale Nominee and these costs will be deducted from the proceeds of sale that will be provided to you.

2.10 Implications of remaining as a minority shareholder of Metaliko

You will be/remain a minority shareholder in Metaliko, in circumstances where:

- (a) Echo receives acceptances under the Offer for some but not all Metaliko Shares on issue at the end of the Offer Period resulting in Echo holding less than a 90% relevant interest in the voting shares of Metaliko. However, a condition of the Offer is that the level of acceptance must result in Echo obtaining a Relevant Interest in at least 90% of all Metaliko Shares. Echo reserves the right to free the Offer from the 90% minimum acceptance Condition save that, under the Bid Implementation Agreement, this Condition cannot be waived by Echo, where Echo has a Relevant Interest of less than 80% of Metaliko Shares, without the prior written consent of Metaliko;
- (b) the Offer Period closes and the Offer is unconditional or the Conditions are satisfied or waived at the time; and

(c) you do not accept the Offer in respect of your Metaliko Shares.

In the above circumstances, the market for Metaliko Shares may become less liquid or active affecting your ability to dispose of your Metaliko Shares should you wish to do so.

3.4 Overview of Echo's projects

3.4.1 Julius Gold Project

The Julius Gold Project is located 450km north of Kalgoorlie and proximate to the Bronzewing (70km north), Jundee (55km) and Wiluna (70km) gold mines.

Exploration drilling was undertaken between 2007 and 2015 and resulted in a maiden JORC 2012 Mineral Resource estimate for the Julius Gold Project that was announced to the ASX on 8 April 2016. Details are provided in the table below.

JORC Category	Cut-off Grade (g/t Au)	Tonnes	Grade (g/t Au)	Ounces Au
Indicated Resource	1.0	1.7Mt	2.31	125,513
Inferred Resource	1.0	1.3Mt	1.78	72,108
Total Mineral Resource	1.0	3.0Mt	2.08	197,621

In June 2016, Echo released the results of the Julius Gold Project Scoping Study (**Scoping Study**) which demonstrated the Project has attractive economic outcomes based on a toll treatment basis with upside potential through optimised mining and alternative treatment scenarios.

Using a base case of AU\$1,600/oz, the Scoping Study suggested the mining of a total of approximately 875,600t @ 2.6 g/t Au via open pit for the production of

68,740 ounces of gold at an estimated operating cost of \$921/ounce. Capital costs for this approach were estimated at \$2.9 million with Life of Mine (LOM) EBITDA of \$47 million¹⁰.

Notes:

1. The Mineral Resources underpinning the above production target have been prepared by a Competent Person or Persons in accordance with the requirements of the JORC (2012) Code. Refer to ASX Announcement dated 7 April 2016. Recoveries through the toll treatment mill are assumed to be 93%.
2. Assumes reasonable available capacity at the toll treatment facility yet to be finalised.

Following completion of the Scoping Study, Echo immediately commenced work on a Bankable Feasibility Study (BFS).

As part of ongoing Project studies and efforts to grow Echo's resource base a significant amount of drilling has been completed over the past several months. This drilling has targeted increased definition of the existing mineral resource estimate as well as step out drilling to expand the known occurrences.

Results from the program, which included over 8,000m of drilling, were released to the ASX on 22 August, 16 September and 26 October 2016. The database is currently being compiled to incorporate all of the drilling completed in the past six months and enable a new mineral resource estimate and block model to be created by an independent expert. Following this, critical components of the BFS including pit optimisation, design and scheduling will be conducted with completion expected by the end of 2016.

¹⁰ Refer Julius Scoping Study – released by Echo to ASX 21 June 2016. All material assumptions underpinning the production targets and forecast financial information derived from the production targets set out in the announcement of 21 June 2016 continue to apply and have not materially changed. Echo has concluded it has a reasonable basis for providing these forward looking statements.

Echo anticipates it will deliver a final BFS by first quarter 2017, with the aim of achieving first production by mid-2017.

3.4.2 Zaphod Gold Prospect

The Zaphod gold prospect is located approximately 80 kilometres due south of Echo's Julius Gold Project and 10 kilometres south of the Bronzewing Gold Plant in the Yandal Gold Belt of WA.

Previous rock chip sampling at the prospect returned a number of high grade gold results from surface rock chips. The mineralised quartz veins at Zaphod occur within a package of sheared and carbonated mafic rocks which outcrop through a window of the surrounding ferruginous laterite. Up to three individual quartz veins of 0.25-1.0 metre of thickness have been observed generally striking in a north-west trend and dipping to the east-north-east. Both milky quartz veins and iron rich quartz veins are present.

Assay results from the first pass drilling included a number of significant high grade results with follow up drilling required to better ascertain the prospectivity of the prospect.

3.4.3 Disclaimers

This Section 3.4 contains references to Mineral Resource estimates, all of which have been cross referenced to previous market announcements made by Echo. Echo confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.

The Scoping Study referred to in this Section 3.4 is based on lower-level technical and economic assessments and is insufficient to support estimation of Ore Reserves, or to provide assurance of an economic development case at this stage, or to provide certainty that the conclusions of the Scoping Study will be realised. Further, Echo cautions that there is no certainty that the forecast financial information derived from production targets will be realised.

4. PROFILE OF METALIKO RESOURCES LIMITED

4.1 Disclaimer

This overview of Metaliko and all financial information concerning Metaliko contained in this Bidder's Statement has been prepared by Echo using publicly available information.

The information in this Bidder's Statement concerning Metaliko has not been independently verified. Echo does not, subject to any applicable laws, make any representation or warranty, express or implied, as to the accuracy or completeness of this information. The information on Metaliko is not considered to be comprehensive.

4.2 Overview of Metaliko

Metaliko is a mineral exploration and development company which has been listed on the ASX since 6 October 2010. Its core asset is its Yandal Gold Project in the North Eastern Goldfields region of Western Australia, which includes the 2 MTPA Bronzewing milling/CIP gold recovery facility, a 200+ person accommodation village, associated production infrastructure, tenements and contained gold resources.

Figure 1: Metaliko's Yandal Tenements and Prospects

4.3 Metaliko Projects

4.3.1 Bronzewing Project

Until the 1980's, little exploration had taken place in the Yandal greenstone belt. Small scale prospector workings existed at Old Bronzewing, Sundowner, Maitland and Corboys but total gold production was less than 17,000 ounces of which 16,000 ounces reportedly came from the Corboys Prospect.

Production commenced on the Mt McClure line in 1992 and Bronzewing Central and Discovery open pits in 1994. Production from the mines to 2004 totalled some three million ounces.

Following two unsuccessful mining campaigns by View Resources Ltd (2004-09) and Navigator Resources Ltd, Metaliko acquired the Bronzewing Project in June 2014. Since acquisition, Metaliko has conducted over 13,000 metres of drilling and numerous soil sampling and reconnaissance surveys. It has also maintained the plant and associated infrastructure on a full time basis in preparation for recommissioning.

Prior to acquisition of the Bronzewing Project, Metaliko had significant tenement holdings in the Kalgoorlie region of Western Australia. Except for the Anthill Project, these tenements were divested in early 2016 allowing Metaliko to focus on the Yandal/Bronzewing Project.

Metaliko's exploration activities at Bronzewing focussed primarily on the Corboys Prospect with back up drilling on nine other prospects where previous drilling had intersected encouraging gold mineralisation.

4.3.2 Corboys Project

Drilling by Metaliko in the period 2015-16 resulted in a significant upgrade to the Corboys resource and JORC status. On 23 August 2016, Metaliko announced to the ASX an updated JORC (2012) compliant gold mineral resource of 2.14Mt at 1.82 g/t for 126,000 ounces Au (lower cut of 1g/t) comprising Indicated Resources of 1.67 Mt @ 1.80 g/t Au and Inferred Resources of 0.47 Mt @ 1.91 g/t Au.

4.3.3 Cockburn Gold Deposit

The Cockburn gold deposit forms part of the Mt McClure gold deposits west of Bronzewing. Mining at Cockburn commenced in 1992. Since that time the Cockburn deposit has produced 7,053,817 tonnes of ore grading 1.71 g/t for 276,553 ounces Au in three separate campaigns.

Metaliko announced on 1 September 2016 that an independent review of the Cockburn resource model and exploration data had been completed which produced an updated optimal block model (OBM) and gold mineral resource.

4.3.4 Other Metaliko Projects

Metaliko's Yandal tenement holdings include several prospects where significant gold mineralisation has been outlined including Mt Joel Woorana, Fat Lady and Katherine Well.

7. The fair value of the net assets of Metaliko to be acquired will ultimately be determined at the date of closing of the transaction. Therefore, it is likely that the fair value of the assets and liabilities acquired will vary from those shown above and the differences may be material.

5.12 Effect of transaction on the unaudited pro forma statement of financial position

The unaudited pro forma consolidated statement of financial position incorporates the following pro forma assumptions in relation to Echo's proposed acquisition of Metaliko.

The pro forma adjustment reflects:

- (a) the issue of 176,645,731 Echo Shares at \$0.22 per Echo Share under the Offer;
- (b) the estimated merger costs of \$[insert] include in cash costs (legal, taxation, accounting and financial advisors); and

- (c) the difference between the purchase price and the net assets acquired has been allocated to property, plant and equipment.

5.13 Outlook for the Merged Entity

This Bidder's Statement does not include any financial forecasts or projections for revenue or profit in relation to the Merged Entity.

Echo has given careful consideration as to whether there is a reasonable basis to produce reliable and meaningful forecast financial information for the Merged Entity. However, the Echo Directors have concluded that as at the date of this Bidder's Statement, it would be misleading to provide forecast financial information for the Merged Entity.

5.14 Dividends

Given the funding requirements for the exploration and potential development of the Julius Gold Project, Echo expects that dividends are unlikely to be available from the Merged Entity for the immediately foreseeable future.

6. INTENTIONS OF ECHO RESOURCES LIMITED

6.1 Introduction

The intentions of Echo in relation to Metaliko are set out in this Section of the Bidder's Statement. Those intentions have been formed on the basis of facts and information concerning Metaliko, and the general business environment, which are known at the time of preparing this Bidder's Statement. Final decisions will only be reached by Echo in light of material information and circumstances at the relevant time. Accordingly, the statements set out in this section are statements of current intention only and may vary as new information becomes available or circumstances change.

6.2 Disclosure Regarding Forward-Looking Statements

This Bidder's Statement includes forward-looking statements that have been based on Echo's current expectations and predictions about future events including Echo's intentions (which include those set out in this Section 6). These forward-looking statements are, however, subject to inherent risks, uncertainties and assumptions that could cause actual results, performance or achievements of Echo, Metaliko and the Merged Entity to differ materially from the expectations and predictions, expressed or implied, in such forward-looking statements. These factors include, among other things, those risks identified in this Bidder's Statement (including those set out in Section 8).

None of Echo, its officers, nor persons named in this Bidder's Statement with their consent or any person involved in the preparation of this Bidder's Statement makes any representation or warranty (express or implied) as to the accuracy or likelihood of any forward looking statements. You are cautioned not to place reliance on these statements in the event that the outcome is not achieved. These statements reflect views and opinions as at the date of this Bidder's Statement.

6.3 Rationale for the Offer

Echo believes (based on the information currently available to it) that there are a number of key strategic and financial benefits that will arise from the successful acquisition of Metaliko by Echo. These include:

- (a) a substantial gold business pursuing a rapid and modest-cost pathway to production through the combination of established mineral resources at the Julius gold deposit and the 2 Mtpa Bronzewing processing facility;
- (b) global gold mineral resources (JORC 2004 and JORC 2012) of in excess of 800,000 ounces with substantial exploration and resource conversion potential;
- (c) Metaliko's Shareholders will retain exposure to Metaliko's assets via their shareholding in Echo;
- (d) a contiguous tenement holding along 130km of the Yandal greenstone belt which represents the largest contiguous land holding between the operating Darlot and Jundee gold mines;
- (e) the Merged Entity's enlarged size and balance sheet are expected to improve access to future development funding at a lower cost than what Metaliko could achieve on its own and provide the Merged Entity

with the flexibility to support near term project funding and accelerate exploration and development activities;

- (f) a simplified single ownership structure and operational management of assets currently owned by Metaliko. This is expected to allow for the acceleration of exploration and development of the Julius Gold Project; and
- (g) the Merged Entity may receive increased coverage from equity research analysts, benefit from greater relevance and interest from institutional investors and increased access to a wider range of investors. This may result in a market re-rating of the Merged Entity that is superior to the market ratings of Echo and Metaliko as stand-alone companies.

6.4 Echo's Intentions Regarding Metaliko

6.4.1 Overview

Subject to the below, it is the present intention of Echo, on the basis of the information concerning Metaliko which is known to Echo and the existing circumstances affecting the business of Metaliko, that:

- (a) the business of Metaliko will otherwise be continued in substantially the same manner as it is presently being conducted;
- (b) no other major changes will be made to the business of Metaliko; and
- (c) the present employees of Metaliko will otherwise continue to be employed by Metaliko. Where there is duplication the fair and equitable solution as per the current employee agreements will be decided in consultation with the Metaliko Board. As a result of implementing Echo's intentions set out in this section 6, however, it is possible that certain operational functions will become redundant. While some redundancies may occur as a result, the incidence, extent and timing of such actions cannot be predicted in advance. If redundancies do occur, the relevant employees will receive benefits in accordance with their contractual and other legal entitlements. Further, as a Merged Entity, the business may require additional resources with specific skills which will be assessed against future requirements.

The current intentions of Echo may change in light of material facts and circumstances at the relevant time.

Following a period of review the value accretive treatment of the assets not central to the strategy of near term production will be presented to the Echo board to assess and determine the future treatment of those assets. Echo will also continue to assess its size and composition as the activities of Echo change.

6.4.2 Intentions upon Acquisition of 90% or More of Metaliko

If as a result of the Offer, Echo becomes entitled to compulsorily acquire outstanding Metaliko Shares in accordance with Part 6A.1 of the Corporations Act, it intends to proceed with the compulsory acquisition of those shares.

Echo then intends to undertake the steps outlined in Section 6.4.1 above and delist Metaliko from the ASX, subject to the required regulatory approvals.

6.4.3 Intentions upon Gaining Control but Less Than 90% of Metaliko

Echo may waive the satisfaction of the Conditions in its sole discretion, other than the 90% minimum acceptance condition, which cannot be waived by Echo, where Echo has a Relevant Interest of less than 80% of Metaliko Shares, without the prior written consent of Metaliko.

Echo has not decided at this stage whether it will free the Offer from the 90% minimum acceptance Condition (in the event it acquires at least an 80% Relevant Interest in Metaliko Shares or if Echo acquires less than 80% of Metaliko Shares and Metaliko consents to Echo waiving the 90% minimum acceptance condition) or any other Condition.

If, following the close of the Offer, Metaliko becomes a controlled entity, but not a wholly owned subsidiary of Echo, Echo presently intends, subject to the following, and to the extent possible, and appropriate, to implement the objectives and goals mentioned in Section 6.4.1 above.

The extent to which Echo will be able to implement these intentions will be subject to:

- (a) the Corporations Act and the ASX Listing Rules, in particular in relation to related party transactions and conflicts of interests; and
- (b) the legal obligation of the directors of Metaliko to act for proper purposes and in the best interests of Metaliko shareholders as a whole.

Having regard to this and in particular the possible requirements of minority shareholder approval, it is possible that Echo may not be able to implement some of these intentions.

6.4.4 Intentions if Echo does not Acquire Effective Control of Metaliko

Subject to Echo acquiring at least an 80% Relevant Interest in Metaliko Shares (or otherwise with the consent of Metaliko), Echo reserves its right to declare the Offer free from the 90% minimum acceptance Condition (or any other Condition) to the Offer. However, Echo has not decided at this stage whether it will free the Offer from the 90% minimum acceptance Condition (or any other Condition).

If the waiver occurs, and Echo does not acquire effective control of Metaliko, Echo intends, subject to the Corporations Act and the ASX Listing Rules, to implement the process outlined in 6.4.1 above to the extent possible.

7. AUSTRALIAN TAX CONSIDERATIONS

The following summary is a general overview of the Australian income tax consequences for Metaliko Shareholders who accept the Offer and dispose of their Metaliko Shares to Echo in accordance with the Offer. The comments set out below are relevant only to those Metaliko Shareholders who are residents of Australia for tax purposes and hold their Metaliko Shares on capital account.

Certain Metaliko Shareholders (such as those engaged in a business of share trading or investment, those who acquired their Metaliko Shares for the purpose of resale at a profit or those which are banks, insurance companies, tax exempt organisations, persons who are temporary residents or non-residents for Australian tax purposes or persons who acquired their Metaliko Shares in respect of their employment with Metaliko) will or may be subject to special or different tax consequences particular to their circumstances. Such Metaliko Shareholders should seek independent taxation advice regarding the disposal of Metaliko Shares based on their specific circumstances.

The summary is based on taxation law and practice in effect at the date of the Offer. It is not intended to be an authoritative or comprehensive analysis of the taxation laws of Australia, nor does it consider any specific facts or circumstances that may apply to particular Metaliko Shareholders. Further, it does not deal with the taxation consequences of disposing of Metaliko Shares which may have been issued under an employee share scheme, which may be subject to specific tax provisions.

Given the complexity of the taxation legislation, Metaliko Shareholders should seek independent taxation advice regarding the tax consequences of disposing of Metaliko Shares given the particular circumstances which apply to them.

7.1 Metaliko Shareholders holding Metaliko Shares on capital account

Acceptance of the Offer is likely to involve a disposal by a Metaliko Shareholder of their Metaliko Shares for CGT purposes.

An Australian-resident Metaliko Shareholder may make a capital gain where the capital proceeds from the exchange are more than the cost base of their Metaliko Shares. Alternatively, a Metaliko Shareholder may make a capital loss where the capital proceeds are less than the cost base of those shares.

The capital proceeds that a Metaliko Shareholder will be taken to have received in respect of the disposal of their Metaliko Shares will generally be the market value of Echo Shares on the date of acceptance of the Offer. Metaliko Shareholders will be responsible for keeping their own records with respect to the price at which Echo Shares are traded on the date that they accept the Offer.

The cost base of Metaliko Shares will generally be the cost at which they were acquired including any incidental costs of acquisition together with any additional cost base elements.

In broad terms, the Australian income tax consequences for Metaliko Shareholders who hold their Metaliko Shares **on capital account** and who accept the Offer will depend on whether or not 'scrip for scrip' capital gains tax rollover relief (**rollover relief**) is available and, if available, an election is made to apply it. The following discussion considers the general Australian income tax consequences for Metaliko Shareholders where:

- (a) rollover relief is available and is elected; and
- (b) rollover relief is not available or is not elected.

7.2 Acceptance of the Offer where rollover relief is available and is elected

Australian-resident Eligible Shareholders may be entitled to rollover relief in respect of the consideration referable to Echo Shares where the exchange of the shares would otherwise realise an assessable capital gain. Broadly speaking, rollover relief is available to Eligible Shareholders who exchange shares in one company for shares in another company where the transaction is made pursuant to the Offer and provided certain qualifying conditions are satisfied.

In broad terms, these qualifying conditions include the requirement that Echo must make an offer to all shareholders in Metaliko to acquire their voting shares on substantially the same terms and Echo must become the owner of at least 80% of the voting shares in Metaliko as a consequence of the Offer.

If the qualifying conditions are satisfied and an Eligible Shareholder elects for rollover relief to apply, the rollover relief is available. However, if Echo does not acquire 80% of the voting shares in Metaliko pursuant to the Offer, then the rollover relief will not be available.

The effect of the rollover relief is that the CGT event for Eligible Shareholders (and therefore their respective capital gains) will be deferred until they dispose of some or all of their Echo Shares in the future.

The CGT cost base of the new Echo Shares acquired in the exchange is determined by reasonably attributing to it the CGT cost base of the Metaliko Shares for which a rollover was obtained. For example, the CGT cost base for 2.5 Metaliko Shares will be apportioned for every 1 Echo Share received. Further, the Eligible Shareholders will be taken to acquire their Echo Shares at the time they originally acquired their Metaliko Shares (for the purpose of determining any entitlement to a CGT discount (discussed further below) on an otherwise assessable capital gain in relation to a subsequent dealing in their new Echo Shares).

As discussed above, rollover relief will only be available if the qualifying conditions are satisfied and Eligible Shareholders elect for it to apply. Further, rollover relief is not available if Eligible Shareholders realise a capital loss on the disposal of their Metaliko Shares.

Rollover relief does not apply automatically and Eligible Shareholders must make an election to apply it. The election to utilise rollover relief is evidenced by the manner in which the tax return for the relevant income year is prepared although it may be prudent (though not required) to keep a written record of that election with your tax records.

Given the complexity of the provisions governing rollover relief and the various qualifying conditions that need to be satisfied, Metaliko Shareholders should seek independent taxation advice regarding their particular circumstances.

7.3 Acceptance of the Offer where rollover relief is not available or is not elected

If Metaliko Shareholders do not elect to obtain rollover relief (or if it is not available), they will need to calculate whether they make a capital gain or capital loss on the disposal of their shares in Metaliko. As discussed above, this will involve a calculation of their cost base and capital proceeds for their shares in Metaliko.

Where the amount of capital proceeds received by a Metaliko Shareholder in respect of the disposal of their Metaliko Shares is greater than the cost base of those Metaliko Shares, then the shareholder should realise a capital gain for Australian CGT purposes.

Where the amount of capital proceeds received by a Metaliko Shareholder in respect of the disposal of their Metaliko Shares is less than the reduced cost base (broadly the cost of acquiring the shares, not including certain incidental costs of ownership) of those Metaliko Shares, then the Metaliko Shareholder should realise a capital loss for Australian CGT purposes.

Where it is expected that a capital gain will result, if a Metaliko Shareholder does not elect to apply the rollover relief, or that relief is not available, then individuals, complying superannuation funds and trusts, may be eligible for the CGT discount. Companies that hold shares in Metaliko are not eligible for the CGT discount.

Specifically, where Metaliko Shares have been held for at least 12 months (not including the day of acquisition and the day of disposal) before their disposal, a Metaliko Shareholder who is an individual, a complying superannuation entity or the trustee of a trust should be able to reduce the capital gain arising from the disposal of Metaliko Shares by the CGT discount (see below).

Subject to the Metaliko Shareholder having any available capital losses from previous income years or net capital losses in the tax year in which they dispose of their Metaliko shares, where the CGT discount is available, eligible Metaliko Shareholders which are individuals or trustees of trusts (excluding complying superannuation entities) will reduce the capital gain arising on the disposal of Metaliko Shares by one-half. For individuals, this reduced gain should be assessed at the Metaliko Shareholder's marginal tax rate. Trustees should seek specific advice regarding the tax consequences of distributions attributable to discounted capital gains and whether the beneficiaries of such trust distributions may be eligible to receive a CGT discount on any net capital gain distributed.

Where Metaliko Shares are held by a complying superannuation entity, subject to the Metaliko Shareholder having any available capital losses from previous income years or net capital losses in the tax year in which they dispose of their Metaliko shares, and the CGT discount is available, the discount will reduce the nominal capital gain on the disposal of the shares by one-third.

The CGT discount is generally applied after taking into account any available capital losses from previous income years or net capital losses or in the tax year in which they dispose of their Metaliko shares. Metaliko Shareholders having any capital losses from previous income years or net capital losses in the tax year in which they dispose of their Metaliko Shares should seek independent advice in relation to the potential availability of the CGT discount.

7.4 Metaliko Shareholders who are companies will not be entitled to the CGT discount

Companies are not entitled to the CGT discount. The capital gain or capital loss will be calculated with reference to the capital proceeds less the cost base or reduced cost base of the shares. Where a company realises a capital gain, it may be eligible to reduce that gain with capital losses from previous income years, net capital losses in the tax year in which they dispose of their Metaliko shares or revenue losses (subject to satisfying certain tax loss integrity measures). We recommend that companies seek advice from their professional tax advisor in relation to the availability and deductibility of any tax losses.

7.5 GST

GST should not apply to the disposal of Metaliko Shares under the Offer, the issue of Echo Shares under the Offer, or any subsequent disposal of Echo Shares.

Metaliko Shareholders who are registered for GST purposes may not be entitled to full input tax credits for any GST incurred on costs (e.g. accounting advisors' costs) associated with acquiring or disposing of securities in Echo or Metaliko. Metaliko Shareholders should seek their own tax advice in this respect.

8. RISK FACTORS

8.1 Overview

If the Offer becomes unconditional or the Conditions are satisfied or waived, Metaliko Shareholders who accept the Offer will become Echo Shareholders. In those circumstances, Metaliko Shareholders will:

- (a) continue to be exposed to the risks associated with the investment in Metaliko as a result of their indirect interest in Metaliko through Echo;
- (b) be exposed to the risks which are specific to an investment in Echo; and
- (c) be exposed to additional risks relating to the Offer and the Merged Entity.

These risks are explained below. Metaliko Shareholders should read this Bidder's Statement carefully and consult their professional advisors before deciding whether to accept the Offer. By accepting the Offer, Metaliko Shareholders will be investing in Echo.

The business activities of Echo and the Merged Entity are subject to various risks that may impact on the future performance of Echo and the Merged Entity. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but some are outside the control of Echo and the Merged Entity and cannot be mitigated.

Accordingly, an investment in the Merged Entity carries no guarantee with respect to the payment of dividends, return of capital or price at which shares will trade and should be considered speculative. The principal risk factors include, but are not limited to, the following risks set out below. The risks are general only and do not take into account your individual objectives, financial situation or needs. You should carefully consider the following risk factors, as well as other information provided by Echo, and consult your professional advisers before deciding whether to accept the Offer.

8.2 Risks Relating to the Offer

8.2.1 Conditions of the Offer

As described in Section 1.9 of Annexure A of the Bidder's Statement, the Offer is subject to a number of Conditions.

Subject to any statutory withdrawal rights that may be available (see Section 1.6 of Annexure A of the Bidder's Statement), Metaliko Shareholders who accept the Offer whilst it still remains conditional will no longer be able to trade their Metaliko Shares on the ASX or withdraw their acceptance of the Offer. Metaliko Shareholders should be aware that the market price of Metaliko Shares may exceed the implied price under the Offer during the Offer Period.

For those Metaliko Shareholders who accept the Offer and the Conditions remain unsatisfied at the end of the Offer Period and are not otherwise waived by Echo, there is no obligation on Echo to issue Echo Shares to you as consideration for your Metaliko Shares. In those circumstances, any acceptances of the Offer will be void and you would then be free to deal with your Metaliko Shares.

8.2.2 Limited withdrawal rights

As described in Section 1.6 of Annexure A of the Bidder's Statement, Metaliko Shareholders may only withdraw their acceptance of the Offer in limited circumstances. Otherwise, Metaliko Shareholders will be unable to withdraw their acceptances, even if the value of the Echo Shares to be issued to Metaliko Shareholders as consideration varies from the date of their acceptance.

8.2.3 Issue of Echo Shares as consideration

Eligible Shareholders are being offered specific quantities of Echo Shares as consideration under the Offer. As a result, the value of the consideration will fluctuate depending upon the market value of Echo Shares at any given time.

Furthermore, some of the holders of Metaliko Shares that receive Echo Shares as consideration under the Offer may not intend to continue to hold those Echo Shares and may wish to sell them on ASX. There is a risk that if a significant number of holders of Metaliko Shares seek to dispose of their Echo Shares, this may adversely impact the price of Echo Shares.

Accordingly, the market value of the Echo Shares at the time you receive them may vary significantly from their market value on the date of your acceptance of the Offer. This may result in the value of the consideration to Metaliko Shareholders increasing as well as decreasing.

8.2.4 Rollover relief

A condition of the Offer is that the level of acceptance must result in Echo obtaining a Relevant Interest in at least 90% of all Metaliko Shares. Echo reserves the right to free the Offer from the 90% minimum acceptance Condition save that, under the Bid Implementation Agreement, this Condition cannot be waived by Echo, where Echo has a Relevant Interest of less than 80% of Metaliko Shares, without the prior written consent of Metaliko.

If Echo does not acquire a Relevant Interest in at least 80% of Metaliko Shares, and Metaliko consents to Echo waiving the 90% minimum acceptance condition CGT rollover relief will not be available to Metaliko Shareholders. Refer to Section 7 above for further details.

8.2.5 Acquisition of less than 90% of Metaliko Shares

If Echo decides to waive the 90% minimum acceptance Condition, it is possible that Echo could acquire a Relevant Interest of less than 90% of Metaliko Shares on issue under the Offer. The existence of a minority interest in Metaliko may have an impact on the operations of the Merged Entity, although this impact will depend upon the ultimate level of Metaliko ownership acquired by Echo. However, a condition of the Offer is that the level of acceptance must result in Echo obtaining a Relevant Interest in at least 90% of all Metaliko Shares. Echo reserves the right to free the Offer from the 90% minimum acceptance Condition save that, under the Bid Implementation Agreement, this Condition cannot be waived by Echo, where Echo has a Relevant Interest of less than 80% of Metaliko Shares, without the prior written consent of Metaliko.

8.2.6 Duty and Government Charges

Duty and other government charges may be payable by Echo in relation to the Offer. The amount of these duties and charges may be material.

8.2.7 Dilution Risk

The consideration for the Offer is the Offer Consideration set out on the front page of this Bidder's Statement. If the Offer is completed, there will be a dilution for current Echo Shareholders as a result of the Offer Consideration being issued.

8.3 Risks relating to the Merged Entity

This Section 8.3 sets out risks that are specific to Echo and Metaliko as the Merged Entity.

8.3.1 Buy back Right

As disclosed to the ASX in Echo's IPO prospectus dated 10 April 2006, as part of Echo's acquisition of 100% of the Red Lake Tenements (which includes the Julius Gold Project) from Newmont Yandal Operations Pty Ltd (**Yandal**) and its associated companies in 2006, it was agreed that, for a period of 20 years from the sale completion date, Yandal has a buy back right should a gold discovery containing in aggregate inferred mineral resources of at least 2 million ounces of gold be identified within the Red Lake Tenements (**Buy Back Resource**) as follows:

- (a) if Echo announces that it has made a discovery within the Red Lake Tenements that contains at least a Buy Back Resource, Yandal has a 6 month option from the announcement to buy-back an interest in an area encompassed by a circle with a 10km diameter centred on the discovery (**Resource Area**); and
- (b) if Echo announces, or Yandal believes that, a discovery containing aggregate inferred mineral resources of at least 1.5 million ounces of gold has been defined within the Red Lake Tenements, and Yandal believes there are reasonable prospects that a Buy Back Resource can be defined within 12 months of the discovery, Yandal may elect to sole fund up to 12 months of exploration within the Resource Area for that discovery. If a Buy Back Resource is identified within the 12 month period, Yandal has a 6 month option to buy back an interest in the Resource Area.

If Echo has not commenced mining in the relevant Resource Area at the time of the buy back, Yandal may acquire a 60% joint venture interest in consideration for paying an amount calculated in accordance with a multiple of exploration expenditure. If Echo has commenced mining the Resource Area, Yandal may acquire a 75% joint venture interest in the Resource Area in consideration for paying a multiple of exploration expenditure, development and mining capital expenditure.

8.3.2 Royalties

Echo and Metaliko's tenements are subject to existing third party royalties. In addition, Metaliko owes royalties to third parties on certain ore treated at the Bronzewing mill. In the event ore from Echo's tenements is processed at the Bronzewing mill, Metaliko must pay a 1% royalty on that ore to Mark Creasy, and may be required to pay other royalties under its other existing third party royalties, which will reduce the economic return to the Merged Entity from the processing of that ore.

By an agreement made 30 September 2005 between Echo and Yandal known as the Red Lake Royalty Deed, Echo agreed to pay Yandal a net smelter royalty of 1.5% in respect of all minerals produced from the Red Lake Tenements.

In respect of E53/970, the royalty is 0.5% (pursuant to the Longreach Well Royalty Deed) and Echo is obliged to pay the vendor of E53/970, Sabre Resources Limited, a royalty of 1.0% of the gross proceeds of gold produced.

8.3.3 Exploration and mining

The mineral exploration licences comprising the Merged Entity's projects are at exploration and feasibility study stage, and potential investors should understand that mineral exploration and development are high-risk undertakings.

There can be no assurance that future exploration of these licences, or any other mineral licences that may be acquired in the future, will result in the discovery of an economic ore deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.

The future exploration activities of the Merged Entity may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns, unanticipated operational and technical difficulties, industrial and environmental accidents, native title process, changing government regulations and many other factors beyond the control of the Merged Entity.

The success of the Merged Entity will also depend upon its ability to maintain title to the mineral exploration licences comprising the Julius Gold Project and obtaining all required approvals for its contemplated activities. In the event that exploration programmes prove to be unsuccessful this could lead to a diminution in the value of the Merged Entity's projects, a reduction in the cash reserves of the Merged Entity and possible relinquishment of one or more of the mineral exploration licences comprising the projects.

8.3.4 Development and mining

The Merged Entity's projects are at an exploration and feasibility study stage. Ultimate and continuous success of activities is dependent on a number of factors including:

- (a) the discovery and/or acquisition of economically recoverable Ore Reserves;
- (b) access to adequate capital to fund and develop its projects;
- (c) construction of efficient development and production infrastructure within capital expenditure budgets;
- (d) securing and maintaining title to interests;
- (e) obtaining regulatory consents and approvals necessary for the conduct of mineral exploration, development and production; and
- (f) retention of appropriately skilled and experienced employees, contractors and consultants.

The Merged Entity's operations may be delayed or prevented as a result of factors including weather conditions, mechanical difficulties or a shortage of technical expertise or equipment. There may be difficulties with obtaining government and/or third party approvals, operational difficulties encountered with construction, extraction and production activities, unexpected shortages or increase in the price of consumables, plant and equipment, cost overruns or lack of access to required levels of funding.

The Merged Entity's operations may be curtailed or disrupted by a number of risks beyond its control such as environmental hazards, industrial accidents and disputes, technical failures, unusual or unexpected geological conditions, adverse weather conditions, fires, explosions and other accidents.

The Merged Entity's operations may be adversely affected by higher than anticipated ore treatment costs, worse than anticipated metallurgical conditions, fluctuations in metal prices or lack of availability of treatment plant capacity.

The occurrence of any of these circumstances could result in Echo not realising its operational or development plans or in such plans costing more than expected or taking longer to realise than expected. Any of these outcomes could have an adverse effect on the Merged Entity's financial and operational performance.

Possible future development of mining operations at any of the Merged Entity's projects are also subject to numerous risks. No assurance can be given that the Merged Entity will achieve commercial viability through development of any of its projects.

In addition, for development projects, reserves, resources and stockpiles are based on estimates of grade, volume and tonnage. The accuracy and precision of these estimates will depend upon drill spacing and other information such as continuity, geology, rock density, metallurgical characteristics, mining dilution and costs which evolve as the mine moves through different parts of the ore body.

8.3.5 Commodity price volatility

The revenue that the Merged Group may derive through the sale of commodities exposes the potential income of the Merged Entity to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors that would be beyond the control of the Merged Entity. Such factors include supply and demand fluctuations for precious and base metals, technological advancements, forward selling activities and other macro-economic factors.

If exploration is successful, a substantial source of revenue and operating cash flow of the Merged Entity may be derived from the sale of gold from the Julius Gold Project. Gold prices have been and will continue to be subject to fluctuation as a result of a number of factors which would be beyond the control of the Merged Entity, including demand for the product, prices agreed by the world's largest producers with their customers, production costs and capacities of other suppliers of gold, the level of competition between producers and end-users of the product. If realised product prices fall, the business, results of operations, financial condition and prospects of the Merged Entity could be materially adversely affected.

Future material price declines in the market value of the commodities to be supplied by the Merged Entity could cause the continued development of, and eventually the commercial production from, the Merged Entity's projects to be uneconomic. Depending on the price of these commodities, the Merged Entity could be forced to discontinue production or development and may lose its interest in, or be forced to sell, some of its properties. There is no assurance that, even as commercial quantities of the commodities are produced, a profitable market will exist for them.

8.3.6 Operating costs

The strong commodity cycle over recent years and the large number of projects being developed in the resources industry has led to increased demand for, and worldwide shortages in, skilled personnel, contractors, materials, equipment, spare parts and supplies that are required as critical inputs to those existing projects and planned developments. Such shortages may increase the costs of its operations, as a result of inputs becoming more expensive. Furthermore, the Merged Entity's input costs may be affected by changes in market conditions, government policies, exchange rates and inflation rates, which can be unpredictable and outside its control. There can be no assurance that the Merged Entity's present and future projects will continue to have access to adequate power and water supplies in the future or that the prices of such utilities will remain affordable. Any resulting increase in costs or production delays could have a material adverse effect on its business, results of operations, financial condition and prospects and result in the shutdown of an operation.

8.3.7 Approvals, permits and licences

The Merged Entity's operations will be dependent on certain government permits, approvals and licenses for each of its projects, including environmental and health and safety approvals. The Merged Entity's ability to carry on its business will therefore be subject to its ability to obtain, and various governments' willingness to renew and not revoke, such rights. If the Merged Entity is not able to obtain or renew such rights, or such rights are revoked, this may have a material and adverse impact on its business, results of operation, financial condition and prospects.

8.3.8 Land and resource tenure

The Merged Entity may lose title to, or interests in, its mineral exploration licences if the conditions to which those mineral exploration licences are subject are not satisfied or if insufficient funds are available to meet expenditure commitments.

In the jurisdictions in which the Merged Entity will operate, both the conduct of operations and the steps involved in acquiring interests will involve compliance with numerous procedures and formalities. It is not always possible to comply with, or obtain waivers from, all such requirements and it is not always clear whether requirements have been properly completed, or that it is possible or practical to obtain evidence of compliance.

In particular, mineral exploration licences are subject to expenditure and work commitments which must be complied with in order to keep the mineral exploration licences in good standing. In certain circumstances, these commitments may be varied at the discretion of the relevant mining authority. Failure to meet these commitments could lead to forfeiture of the mineral exploration licence.

Where tenement expenditures and work commitments or other regulatory requirements are not complied with, regulatory exemptions may need to be applied for within specified periods. Should exemptions not be applied for in time, or are applied for in time but are not ultimately granted, fines may be payable to avoid the mineral exploration licences being forfeited or, in extreme cases, the mineral exploration licences may be forfeited.

Further, it is possible that mineral exploration licences in which the Merged Entity will have an interest in may be subject to a native title claim. If native title rights do exist in respect of a mineral exploration licences, the ability of the Merged

Entity to gain access to that mineral exploration licence may be adversely affected.

8.3.9 Resources and reserves estimates

Resource estimates are expressions of judgement based on knowledge, experience and industry practice. Estimates that were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and mining plans that may, in turn, adversely affect the Merged Entity's operations.

8.3.10 Environmental risks

The operations and proposed activities of the Merged Entity are subject to extensive environmental regulation in Australia and all other jurisdictions in which the Merged Entity will operate. As with most exploration projects and mining operations, the Merged Entity's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. It is Echo's intention that the Merged Entity will conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires may impact on the Merged Entity's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Merged Entity for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or non-compliance with environmental laws or regulations.

The disposal of mining and process waste and mine water discharge are under constant legislative scrutiny and regulation. There is a risk that environmental laws and regulations become more onerous making the Merged Entity's operations more expensive.

Approvals are required for land clearing and for ground disturbing activities. Delays in obtaining such approvals may result in the delay to anticipated exploration programmes or mining activities.

The Department of Mines and Petroleum in Western Australia from time to time reviews the environmental bonds that are placed on tenements. Echo is not in a position to state whether a review is imminent or whether the outcome of such a review would be detrimental to the funding needs of the Merged Entity.

8.3.11 Future funding

Future funding may be required by the Merged Entity to support its proposed activities. There can be no assurance that such funding will be available on satisfactory terms or at all. The Merged Entity's capital requirements will depend on numerous factors. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Merged Entity is unable to secure additional financing

as needed, it may be required to reduce the scope of its operations. There is however, no guarantee that the Merged Entity will be able to secure any additional funding or be able to secure funding on terms favourable to the Merged Entity.

Further, loan agreements and other financing rearrangements such as debt facilities, convertible note issues and finance leases (and any related guarantee and security) that may be entered into by the Merged Entity may contain covenants, undertakings and other provisions which, if breached, may entitle lenders to accelerate repayment of loans and there is no assurance that the Merged Entity would be able to repay such loans in the event of an acceleration. Enforcement of any security granted by Merged Entity or default under a finance lease could also result in the loss of assets.

8.3.12 Ability to attract personnel

The Merged Entity's success depends, in part, on its ability to identify, attract, motivate and retain additional suitably qualified management. The Merged Entity does not carry key management insurance and the loss of any of its senior management or key employees could significantly impact its operations. Competition for suitably qualified staff is strong. The inability to access and retain the services of a sufficient number of qualified staff could be disruptive to the Merged Entity's development efforts or business development and could materially adversely affect its prospects.

8.3.13 Contractors

Part of the Merged Entity's commercial practice will involve sub-contracting various services. Although sub-contracted services will be supervised by the Merged Entity's employees, such arrangements with contractors carry with them risks associated with the possibility that the contractors may (i) have economic or other interests or goals that are inconsistent with the Merged Entity's, (ii) take actions contrary to the Merged Entity's instructions or requests, or (iii) be unable or unwilling to fulfil their obligations. There can be no assurance the Merged Entity will not experience problems with respect to its contractors in the future or that it will be able to find replacement contractors on similar terms in the event that contractors do not perform as the Merged Entity expects and this may materially and adversely affect its business, results of operations, financial condition and prospects.

8.3.14 Safety Risks and Industrial Accidents

Some of the Merged Entity's operations will be carried out under potentially hazardous conditions. Liabilities might arise in the future as a result of accidents, fatalities or other workforce related misfortunes, some of which may be beyond the Merged Entity's control. Any such events could lead to significant expenditure by the Merged Entity in respect of compensation claims or payments, fines or penalties for failure to comply with health and safety laws or regulations, and insurance may be unavailable or prohibitively expensive. The occurrence of accidents could delay production, increase production costs and result in liability and adverse publicity for the Merged Entity. These factors could have a material adverse effect on the Merged Entity's business, results of operations, financial condition and prospects.

8.3.15 Integration risks

There is a risk that integration of the businesses of Echo and Metaliko may take longer than expected and that the potential efficiencies and benefits of the Merged Entity may be less than anticipated. Potential risks include differences in

management culture, inability to achieve synergies, cost savings and tax advantages and the loss of key personnel. Whilst Echo anticipates that value will be added through the Offer, there is a risk that the full benefits may only be realised in part, or not at all.

8.3.16 Related party limitations if Echo does not acquire more than 90% of Metaliko Shares

If the Offer goes unconditional and Echo does not acquire more than a 90% interest in Metaliko Shares on issue at the end of the Offer Period, then the related party provisions of the Corporations Act (and the ASX Listing Rules) will apply to the two companies which may limit activities between the companies or increase regulatory compliance for undertaking certain activities between the companies.

8.3.17 Economic risk and external market factors

Factors such as, but not limited to, political movements, stock market trends, changing customer preferences, interest rates, inflation levels, commodity prices, industrial disruption, environmental impacts, international competition, taxation changes and legislative or regulatory changes, may all have an adverse impact on the Merged Entity's prospects, operating costs, profit margins and share price. These factors would be beyond the control of the Merged Entity and Echo cannot, to any degree of certainty, predict how they will impact on the Merged Entity.

8.3.18 Litigation risk

Litigation risks relating to the Merged Entity include contractual claims, employee claims, regulatory disputes, joint venture claims and disputes and the costs associated with such claims and disputes. There is a risk that material or costly disputes could arise which may have a material adverse effect on the financial performance and position of the Merged Entity.

8.3.19 War and terrorist attacks

War or terrorist attacks anywhere in the world could result in a decline in economic conditions worldwide or in a particular region. There could also be a resultant material adverse effect on the business, financial condition and financial performance of the Merged Entity.

9.5 Disclosure of Information

Due to the fact that Echo is offering Echo Shares as consideration for the acquisition of Metaliko Shares under the Offer, the Corporations Act requires that this Bidder's Statement must include all information that would be required for a prospectus for an offer of Echo Shares under Sections 710 to 713 of the Corporations Act.

As a company whose shares are quoted on ASX, Echo is subject to regular disclosure requirements. - (e) **Exceptions to no-talk** – Sections 9.7.1(c) and 9.7.1(d) above do not apply to the extent that they restrict a party or its Board from taking or refusing to take any action with respect to a bona fide Competing Transaction provided that the Metaliko Board or the Echo Board (as applicable) has determined in good faith and acting reasonably that the Competing

Transaction is bona fide and could lead to or become a Superior Proposal and failing to respond to it would be reasonably likely to constitute a breach of the fiduciary or statutory duties of the Metaliko Board (the **fiduciary out exception**).

9.7.2 Compensation Payment

Metaliko and Echo agree to pay to the other party the amount of \$250,000 (**Compensating Amount**) on the occurrence of certain events following the Announcement Date at the fault of such party, including material breach of the Bid Implementation Agreement (not remedied), the Offer failing to proceed because of a Superior Proposal, the directors of either party withdrawing their recommendation or recommending a Competing Transaction and termination as a result of a prescribed occurrence.

9.7.3 Conduct of business

The Bid Implementation Agreement sets out the obligations of Metaliko and Echo from the date of the Bid Implementation Agreement until the End Date in relation to the conduct of their business.

Amongst other things:

- (a) Metaliko and Echo must conduct their business in the ordinary and proper course in substantially the same manner as previously conducted and regularly consult with the other party on the manner of conduct of its business including on any matter that may have an adverse impact on the integration of the business of Echo and Metaliko following implementation of the Offer; and
- (b) other than with the approval of the other party, each party must, during the Exclusivity Period, undertake a number of activities, including to:

- (b) Immediately after the Offer becomes unconditional and Echo acquires a Relevant Interest in excess of 80% of the Metaliko Shares, Echo shall appoint two nominees of Metaliko, being Mr Robin Dean and Mr Mark

Hanlon, as Non-Executive Directors to the Echo Board, subject only to receiving a consent to act, such that the Echo Board will be comprised of the two Metaliko nominees and the three Echo Board members as at the date of the Bid Implementation Agreement.

9.7.5 Termination

Either Echo or Metaliko may terminate the Bid Implementation Agreement by notice to the other at any time in the following instances:

- (a) the other party is in material breach of the Bid Implementation Agreement (including a material breach of a representation or warranty given by it) and (if capable of remedy) has failed to remedy the breach within five business days of written notice from the first party notifying the other party of the breach;

- (d) the other party or any of their Subsidiaries becomes insolvent; or
- (e) if the terminating party has become liable to pay a Compensating Amount to the other party in accordance with the Bid Implementation Agreement and has paid the Compensating Amount.

Echo may also terminate the Bid Implementation Agreement by written notice to Metaliko if a Superior Proposal is made or publicly announced for Metaliko by a third party, any director of Metaliko withdraws or modifies their recommendation of the Offer, a person (other than Echo or its associates) has a Relevant Interest in more than 20% of Metaliko Shares on issue or a Metaliko Material Adverse Change or a Metaliko Prescribed Occurrence occurs.

Metaliko may also terminate the Bid Implementation Agreement by written notice to Echo if a Superior Proposal is made or publicly announced for Echo by a third party, any director of Echo does not recommend Echo Shareholders approving the issue of Echo Shares under the Offer in consideration for the acquisition of Metaliko Shares held by Mr Michael Ruane (and his associates) for the purposes of ASX Listing Rule 10.1 (or having recommended it, withdraws or adversely modifies their recommendation), a Echo Material Adverse Change or a Echo Prescribed Occurrence occurs or an independent expert (if commissioned) does not conclude that the Offer is fair and reasonable to Metaliko Shareholders.

Mr Michael Ruane is the current managing director of Metaliko and, together with his Associates, currently holds 133,757,304 Metaliko Shares with an aggregate voting interest of 30.29%.

Mr Ruane is also a former director of Echo who resigned on 30 May 2016. As this occurred within the last 6 months, he is deemed to be a related party of Echo for the purposes of the ASX Listing Rules and section 228 of the Corporations Act.

As such, the acquisition of Metaliko Shares from Mr Ruane and his Associates, and the issue of Echo Shares in consideration for that acquisition, will require Shareholder approval under ASX Listing Rule 10.1.

Approval for the acquisition of Metaliko Shares from Mr Ruane and his Associates, and the issue of Echo Shares in consideration for that acquisition will be put to Echo Shareholders at Echo's annual general meeting scheduled to be held on 11 November 2016.

In response to this Requisition Notice, Echo has convened a general meeting to be held on 14 December 2016 to consider resolutions to remove Echo's Chairman, Mr Barry Bolitho, as a director, and to appoint Mr Kohler.

It is your sole responsibility to satisfy yourself that you are permitted by any law of a country other than Australia applicable to you to accept the Offer and to comply with any other necessary formality and to obtain any necessary governmental or other consents. Refer to Section 1.8 of Annexure A for further information.
