

DTI to Provide CCTV Surveillance Systems to Alstom for Swiss Rail

5 December 2016 – DTI Group Ltd (ASX: DTI) (DTI) is pleased to announce the receipt of an order from Alstom France for the supply of Safety CCTV surveillance systems for 47 of their dual- mode H4 locomotives.

Alstom will manufacture the H4 locomotives at their Belfort plant in France for SBB CFF FFS (Swiss Federal Railways). The locomotives, to be used for track works on SBB's rail network and for shunting in the shunting yards of Lausanne, Triage and Limmattal, are scheduled to enter commercial service in 2018.

Deliveries for the systems are expected to commence in the second half of the 2016–17 financial year, spanning the build period for the H4 locomotives of just under four years.

The Swiss Rail order is not considered material in value; however, it is the second to be received under the recently agreed framework agreement between Alstom and DTI and is the first order received from Alstom for the DTI Safety CCTV surveillance solution.

About DTI Group

DTI develops and provides world-leading surveillance and commuter communication systems technology and services to the mobile transit industry worldwide. Core technology development and system design activities are undertaken from the Company's head office.
