

PENINSULA MINES LIMITED

ASX:PSM

ASX ANNOUNCEMENT

06 December 2016

TRANCHE 2 OF \$1.68M PLACEMENT COMPLETED

(Results from multi-faceted exploration programme expected shortly)

- Major shareholder, Aurora Minerals Ltd, completes \$250,000 investment in Peninsula @ 2.1 cents per share, following shareholder approval of their participation in October placement
- The accelerated and multi-faceted exploration programme continues in South Korea, with results from a number of programmes expected shortly

Peninsula Mines Limited ("Peninsula" or the "Company") is pleased to announce that its major shareholder, Aurora Minerals Ltd ("Aurora"), has completed its A\$250,000 investment in the Company following shareholder approval of Aurora's participation in the October placement at Peninsula's AGM on 29 November 2016.

The investment by Aurora, alongside a further investment by Executive Director Martin Pyle, completes the second and final tranche of the placement undertaken by Peninsula in October that raised a total of \$1.68 million (pre-costs)^{D1}.

This additional funding will go towards Peninsula's on-going and accelerated exploration and test-work programmes, that include geophysics (magnetics and electromagnetics (EM)), mapping and rockchip and soil sampling at the Ubeong Zinc-Silver Project; EM geophysics and channel sampling as well as the completion of graphite-concentrate metallurgy on the Yongwon Graphite Project; and channel sampling across the gold-silver-vein system at the Osu Gold Project, in order to fine tune drilling targets.

Results from all of these programmes will be released when available and compiled, and will allow the Company to define drilling targets to be tested as soon as possible during the 2017 field season.

Peninsula CEO, Jon Dugdale, said:

"We are very pleased to have now completed the placement we undertook in October with the support from our major shareholder, Aurora Minerals, and we will now strive to deliver the results that all shareholders are seeking and to define and test the multiple drilling targets being generated."
