

# **Cautionary Statements**

Except for statements of historical fact relating to Alacer, certain statements contained in this presentation constitute forward-looking information, future oriented financial information, or financial outlooks (collectively "forward-looking information") within the meaning of Canadian securities laws. Forward-looking information may be contained in this document and other public fillings of Alacer. Forward-looking information often relates to statements concerning Alacer's future outlook and anticipated events or results, and in some cases, can be identified by terminology such as "may", "will", "could", "should", "expect", "plan", "anticipate", "believe", "intend", "estimate", "projects", "predict", "potential", "continue" or other similar expressions concerning matters that are not historical facts.

Forward-looking information includes statements concerning, among other things, preliminary cost reporting in this document; production, cost, and capital expenditure guidance; the ability to expand the current heap leach pad; development plans for processing sulfide ore at Çöpler; the results of any gold reconciliations; the ability to discover additional oxide gold ore; the generation of free cash flow and payment of dividends; matters relating to proposed exploration; communications with local stakeholders; maintaining community and government relations; negotiations of joint ventures; negotiation and completion of transactions; commodity prices; mineral resources, m

Such forward-looking information and statements are based on a number of material factors and assumptions, including, but not limited in any manner to, those disclosed in any other of Alacer's filings, and include the inherent speculative nature of exploration results; the ability to explore; communications with local stakeholders; maintaining community and governmental relations; status of negotiations of joint ventures; weather conditions at Alacer's operations; commodity prices; the ultimate determination of and realization of mineral reserves; existence or realization of mineral resources; the development approach; availability and receipt of required approvals, titles, licenses and permits; sufficient working capital to develop and operate the mines and implement development plans; access to adequate services and supplies; foreign currency exchange rates; interest rates; access to capital markets and associated cost of funds; availability of a qualified work force; ability to negotiate, finalize, and execute relevant agreements; lack of social opposition to the mines or facilities; lack of legal challenges with respect to the property of Alacer; the timing and amount of future production; the ability to meet production, cost, and capital expenditure targets; timing and ability to produce studies and analyses; capital and operating expenditures; economic conditions; availability of sufficient financing; the ultimate ability to mine, process, and sell mineral products on economically favorable terms; and any and all other timing, exploration, development, operational, financial, budgetary, economic, legal, social, geopolitical, regulatory and political factors that may influence future events or conditions. While we consider these factors and assumptions to be reasonable based on information currently available to us, they may prove to be incorrect.

You should not place undue reliance on forward-looking information and statements. Forward-looking information and statements are only predictions based on our current expectations and our projections about future events. Actual results may vary from such forward-looking information for a variety of reasons including, but not limited to, risks and uncertainties disclosed in Alacer's filings on the Corporation's website at www.alacergold.com, on SEDAR at www.sedar.com and on the ASX at www.asx.com.au, and other unforeseen events or circumstances. Other than as required by law, Alacer does not intend, and undertakes no obligation to update any forward-looking information to reflect, among other things, new information or future events.

All Mineral Reserves and Mineral Resources referenced in this document are estimated in accordance with NI 43-101 standards and the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. While terms associated with various categories of "Mineral Reserve" or "Mineral Resource" are recognized and required by Canadian regulations, they may not have equivalent meanings in other jurisdictions outside Canada and no comparison should be made or inferred. Actual recoveries of mineral products may differ from those estimated in the Mineral Reserves and Mineral Resources due to inherent uncertainties in acceptable estimating techniques. In particular, Inferred Mineral Resources have a great amount of uncertainty as to their existence, economic and legal feasibility. It is reasonably expected that the majority of Inferred Mineral Resources could be upgraded to Indicated Mineral Resources with continued exploration. Investors are cautioned not to assume that all or any part of the Mineral Resources that are not Mineral Reserves will ever be converted into Mineral Reserves.

The information in this presentation, which relates to exploration results that was previously issued by Alacer in its Exploration Results Announcement dated July 21, 2016, is available on the Corporation's website at www.alacergold.com, on www.sedar.com and on www.asx.com.au. The Exploration Results Announcement details that the information is based on information reviewed by Mr. James Francis, who is a Qualified Person pursuant to NI 43-101 and a Competent Person as defined in the JORC Code. Alacer confirms that: (a) it is not aware of any new information or data that materially affects the information in the Exploration Results Announcement and that, to the extent the information is an exploration target, none of the material assumptions or technical parameters underpinning such estimates have materially changed; and (b) the form and content in which information in the Exploration Results Announcement is presented has not materially changed.

The resource model was constructed by Loren Ligocki, Alacer's Resource Geology Manager, and verified by external consultant, Gordon Seibel, SME Registered Member, Amec Foster Wheeler's Principal Geologist. The updated Mineral Resources estimates were developed and reviewed by external consultant, Dr. Harry Parker, SME Registered Member, Consulting Mining Geologist and Geostatistician for Amec Foster Wheeler.

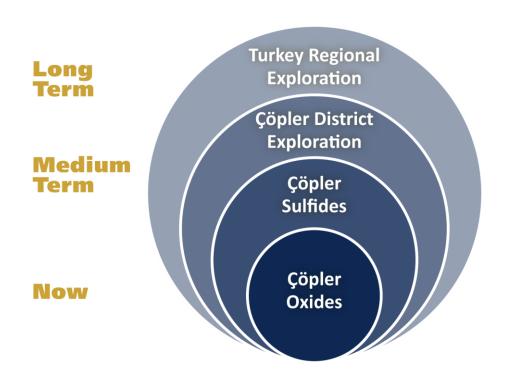

The information in this document which relates to the updated Mineral Resources estimate is based on, and fairly represents, the information and supporting documentation prepared by Dr. Parker and Mr. Seibel. Dr. Parker and Mr. Seibel are Qualified Persons pursuant to NI 43-101, and have sufficient experience which is relevant to the style of mineralization and type of deposit under consideration and to the activity which is being undertaken to qualify as Competent Persons as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves".

The Mineral Reserves and scientific and technical information disclosure in this document was estimated and approved by Mr. Stephen K. Statham, PE, SME Registered Member, Alacer's Mining Services Manager, who is a full-time employee of Alacer. The information in this document which relates to Mineral Reserves is based on, and fairly represents, the information and supporting documentation prepared by Mr. Statham. Mr. Statham is a Qualified Person pursuant to NI 43-101, and has sufficient experience which is relevant to the style of mineralization and type of deposit under consideration and to the activity which is being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves".

Messrs. Ligocki, Seibel, Parker and Statham consent to the inclusion in this document of the matters based on this information in the form and context in which it appears.

# **Advancing Our Strategy**

- Turkey Regional Exploration delivers organic growth through Gediktepe PFS
- Çakmaktepe drilling in Çöpler
  District confirms potential to add oxide production in 2018 Maiden Resource in Q4 2016
- Sulfide Project construction fullsteam ahead
- Çöpler oxides generate cash flow

**Attractive and Growing Portfolio of Assets** 

# **COUNTY OF STATE OF S**

# **Construction Underway**

- Foundations for critical path progressing rapidly
- First structural steel erected
- Project costs of \$114M incurred as of September 30
- Project remains on budget at \$744M
- All major equipment purchase orders complete

# **Çöpler Sulfide Expansion Project**

- Earthworks, including
  Mechanically Stabilized Earth
  Wall substantially complete
- Approximately 12,000m³ of concrete poured (30%)
- Camp construction progressing, with over 600 beds available
- Oxygen plant construction commenced
- Autoclaves expected on siteQ1 2017
- Project remains on track for first gold pour Q3 2018

# **Çöpler Sulfide Expansion Project**

# Sulfide Project Provides Substantial Growth with Significant Margins

- Total production of 4M ozs<sup>1</sup> over the remaining +20 year mine life
- Average life-of-mine Total Cash Costs<sup>2</sup> of \$570/oz and AISC<sup>2</sup> of \$645/oz
- Sulfide production<sup>3</sup> over the first 5 years averages 300kozs a year at Total Cash Costs<sup>2</sup> costs of \$510/oz and AISC<sup>2</sup> of \$545/oz

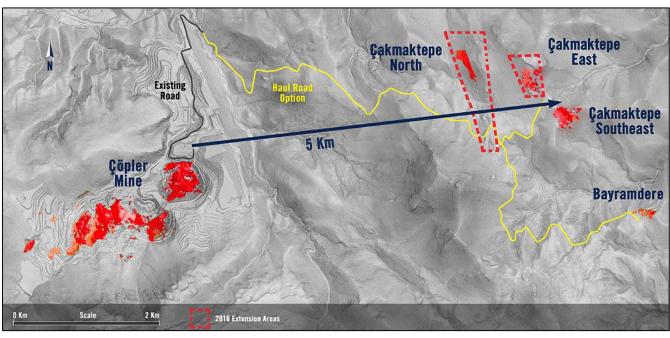

Alacer has an 80% controlling interest of the Cöpler Gold Mine

<sup>2</sup> Total Cash Costs (C2) and All-in Sustaining Costs (AISC) are non-IFRS financial performance measures with no standardized definitions under IFRS. For further information and a detailed reconciliation, please see the "Non-IFRS Measures" section of the MD&A for the three-month period ended September 30, 2016.

<sup>3</sup> Detailed information regarding the Çöpler Sulfide Project, including the material assumptions on which the forward-looking financial information is based, can be found in the Technical Report dated June 9, 2016 entitled "Technical Report on the Çöpler Mine and Çöpler Sulfide Exploration Project" (the "Updated Technical Report") available on the Corporation's website at www.alacergold.com, on www.sedar.com, and on www.asx.com.au.

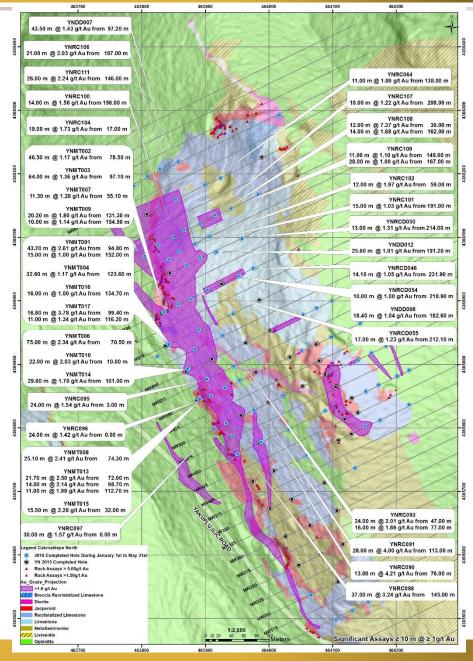

## **Rapid Development Potential**

- Oxide targets identified within 5-7km of Çöpler Mine
- Potential to add oxide production within two years from existing Çöpler infrastructure
- Step-out drilling continues to the north and south
- Deliver maiden resource by end of 2016

# Çöpler District - Çakmaktepe North Prospect

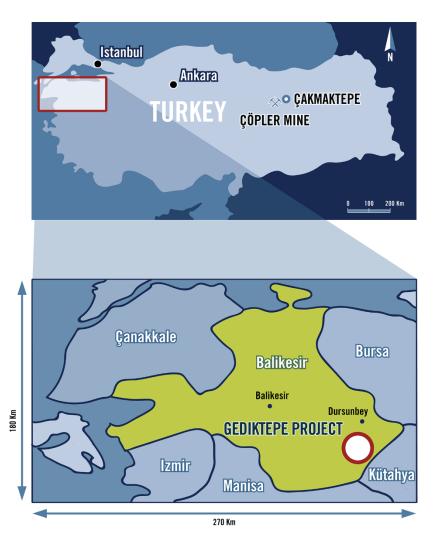

- Çakmaktepe North<sup>1</sup> has become the priority target in the Çöpler District with potential to add oxide production in 2018
- Gossan hosted mineralization occurring along ophiolite, metasediment, diorite and limestone contacts
- Domain is over 40m wide and potentially mineralized over 1km
- Work to date identified high-grade gold over a 700m strike length
- Remains open in all directions
- Drilled over 50,000m to date
- 2016 exploration budget of \$12.5M (100%) in the Çöpler District

**Çakmaktepe North Prospect Plan** - showing location of key drilling results from January 1, 2016 to May 31, 2016. Purple outline defines  $\geq$ 1.0 gpt Au distribution projected to surface. New significant assays are for mineralized downhole drilling intercepts  $\geq$ 10m @ >1.00 gpt Au. 2016 drill collars are colored in blue.

<sup>1</sup> See Alacer announcements "Alacer Gold Announces Further Exploration Results for the Çöpler District" dated July 21, 2016, and "Alacer Announces Çöpler District Exploration Results", dated December 9, 2015 and March 31, 2016 on the Company's website at <a href="https://www.alacergold.com">www.alacergold.com</a>, on SEDAR at <a href="https://www.sedar.com">www.sedar.com</a>, or on the ASX at <a href="https://www.asx.com.au">www.asx.com.au</a>.

# **Gediktepe Project**

#### **Delivers Organic Growth**

- PFS defined Project as technically and economically viable
- Alacer will own 50% with JV Partner Lidya Mining<sup>1</sup>
- Life-of-mine payable metals of 400,000 ozs of gold, 8M ozs of silver, 315M lbs of copper and 780M lbs of zinc<sup>2</sup>
- Life-of-mine production >12 years of **1.8M ozs**<sup>2</sup> on a Gold Equivalent Ounce<sup>3</sup> ("AuEq") basis

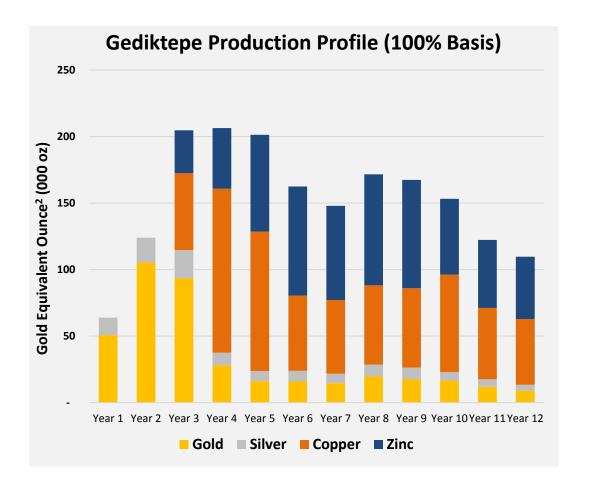

Alacer has exercised its claw-back option in the Gediktepe project and upon completion of the claw-back will own 50%

The material assumptions on which the production targets and forward-looking financial information on the Gediktepe Project are based are included in the Alacer press release titled "Alacer Gold Announces a New Reserve for its Gediktepe Project Providing Future Growth" dated September 13, 2016 and the National Instrument 43-101 Technical Report filed simultaneously with the press release, both are available on the Corporation's website at www.alacergold.com, on SEDAR at www.sedar.com or on ASX at www.asx.com.au

Gold Equivalent Ounce (AuEq) is a non-IFRS measure with no standardized definition under IFRS which converts non-gold production into gold equivalent ounces. Calculation of AuEq converts payable metals into revenue using metal prices of \$1,250 per ounce for gold, \$18.25 per ounce for silver, \$2.75 per pound for copper, \$1.00 per pound for zinc, and then the total revenue is divided by the gold price of \$1,250 per ounce.

# **Gediktepe Project**

Life-of-Mine Project Metrics <sup>1</sup> (100% Basis)							
Pre-production capital	\$120M						
Additional capital for sulfide plant	\$126M						
Project payback	2.5 years						
After-tax free cash flow	\$745M						
C2 <sup>2</sup> per oz AuEq <sup>3</sup>	\$613						
AISC <sup>2</sup> per oz AuEq <sup>3</sup>	\$625						
AIC² per oz AuEq³	\$759						

After Tax NPV at 5%	\$475M
After Tax IRR	47%

#### **Progressing into Detailed Study Phase**

<sup>1</sup> The material assumptions on which the production targets and forward-looking financial information on the Gediktepe project are based are included in the Alacer press release titled "Alacer Gold Announces a New Reserve for its Gediktepe Project Providing Future Growth" dated September 13, 2016 and the National Instrument 43-101 Technical Report filed simultaneously with the press release.

Total Cash Costs (C2), All-in Sustaining Costs (AISC) and All-in Costs (AISC) are non-IFRS financial performance measures with no standardized definitions under IFRS. For further information and a detailed reconciliation, please see the "Non-IFRS Measures" section of the MD&A for the three-month period ended September 30, 2016.

<sup>3</sup> Gold Equivalent Ounce (AuEq) is a non-IFRS measure with no standardized definition under IFRS which converts non-gold production into gold equivalent ounces. Calculation of AuEq converts payable metals into revenue using metal prices of \$1,250 per ounce for gold, \$18.25 per ounce for silver, \$2.75 per pound for copper, \$1.00 per pound for zinc, and then the total revenue is divided by the gold price of \$1,250 per ounce.

# **Advancing Our Strategy**

- Çöpler oxide production has provided foundation for growth
- Sulfide Project construction advancing rapidly
- Maiden resource by end of 2016 for Çakmaktepe and Bayramdere
- Gediktepe is progressing into detailed study phase

#### **Company Snapshot**

#### **Simple Capital Structure**

Market Cap C\$700M

Shares on issue 292M

Fully Diluted 295M

Turnover 1.5M shares/day

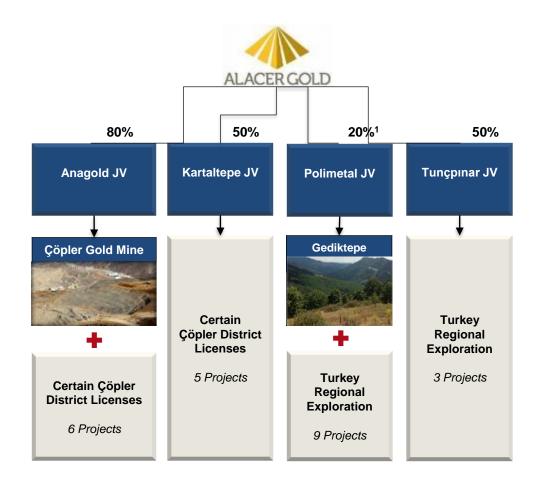

Cash US\$254M at 9/30/16

Debt Nil

Finance Facility \$350M<sup>1</sup>

#### **Strong Turkish Partnership with Lidya Mining**

# 2016 Highlights

## Strategic

- Sulfide Project advancing on budget, site works ramping up
- Foundations for Sulfide Project critical path areas progressing
- Hedge program at >185,000 oxide ozs to secure gold price during construction of Sulfide Project
- Regionally, positive PFS released for Gediktepe demonstrating economically and technically viable project
- In the Çöpler District, additional Çakmaktepe North drill results released

## **Operational**

- Produced 85,175 gold ozs
  - Guidance revised to 115,000 -125,000 ozs
  - 2017 production will increase with shortfall ozs from 2016
- Total Cash Costs<sup>1</sup> of \$742/oz and AISC<sup>1</sup> of \$965/oz
- Heap leach pad expansion to 58Mt advancing
- Sulfide stockpiles grew to 6.7Mt at avg grade of 3.39 gpt gold, or approximately 730k ozs of contained gold

# **Financial**

ALACER GOLD

- Cash of \$254M at September 30, 2016
- Operating cash flows of \$27.7M
- Attributable net profit<sup>2</sup> of \$14.4M or \$0.05 per share
- \$350M undrawn finance facility<sup>3</sup>

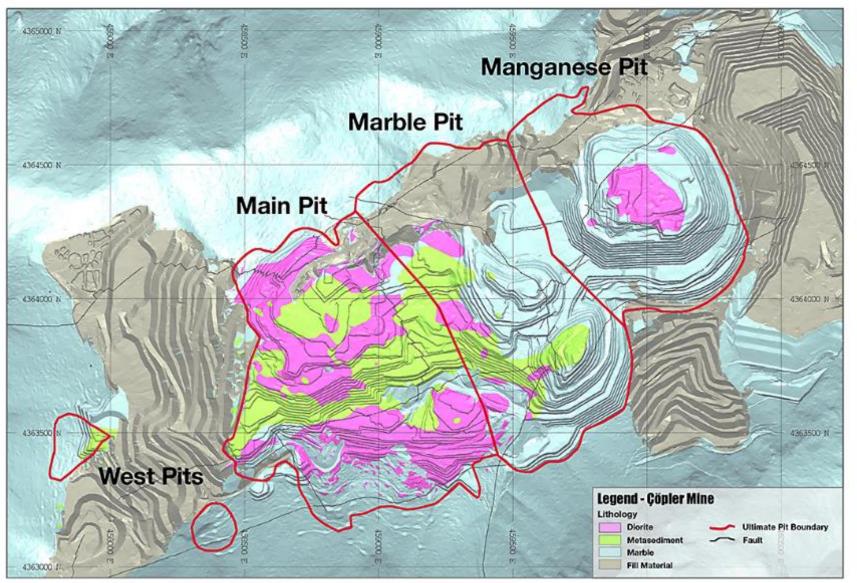

Total Cash Costs and All-in Sustaining Costs are all non-IFRS financial performance measures with no standardized definitions under IFRS. For further information and a detailed reconciliation, please see the "Non-IFRS Measures" section of the MD&A for the three-month period ended September 30, 2016.

<sup>2</sup> Attributable net profit is reduced by the 20% non-controlling interest at the Çöpler Gold Mine.

<sup>3</sup> Advances under the facility are subject to customary conditions precedent including execution of security documentation and a minimum of \$220 million capital spend at Çöpler.

# Çöpler Geology – Plan of Deposit

## **Çöpler Mineral Resources**

#### Mineral Resources Statement for the Çöpler Deposit (As of December 31, 2015) (100% Basis)

Gold Cut-off Grade (g/t)	Material Type	Resources Category Material	Tonnes (x1000)	Au (g/t)	Ag (g/t)	Cu (%)	Contained Au Ounces
		Measured	-	-	-	-	-
		Indicated	24,959	1.04	3.19	0.13	836,000
Variable	Oxide	Stockpile - Indicated	148	0.87	-	-	4,000
		Measured + Indicated	25,106	1.04	3.17	0.13	840,000
		Inferred	20,863	0.83	6.40	0.13	557,000
	Sulfide	Measured	-	-	-	-	-
		Indicated	70,151	2.12	5.94	-	4,771,000
1.0		Stockpile - Indicated	5,102	3.67	-	-	602,000
		Measured + Indicated	75,253	2.22	5.53	-	5,373,000
		Inferred	12,739	1.99	12.00	-	814,000

		Inferred	33,602	1.27	8.52	0.08	1,371,000

#### M+I Mineral Resources of 6.2M contained ounces of gold

Notes: Further information on this resource estimate is in the Updated Technical Report, which can be found on the Corporation's website at www.alacergold.com, on www.sedar.com, and on www.asx.com.au.. Mineral Resources are quoted after mining depletion and are inclusive of Mineral Reserves. The Mineral Reserve methodology and cut-off grades are discussed in the Updated Technical Report. Mineral Resources and Mineral Resources and Mineral Resources and Mineral Resources are shown on a 100% basis, of which Alacer owns 80%. The key assumptions, parameters, and methods used to estimate the Mineral Resources and Mineral Resources are provided in the Updated Technical Report. The Corporation is not aware of any new information or data that materially affects the information included in these tables and that all material assumptions and technical parameters underpinning the estimates in these tables continue to apply and have not materially changed. Rounding differences will occur.

#### **Çöpler Mineral Reserves Increased**

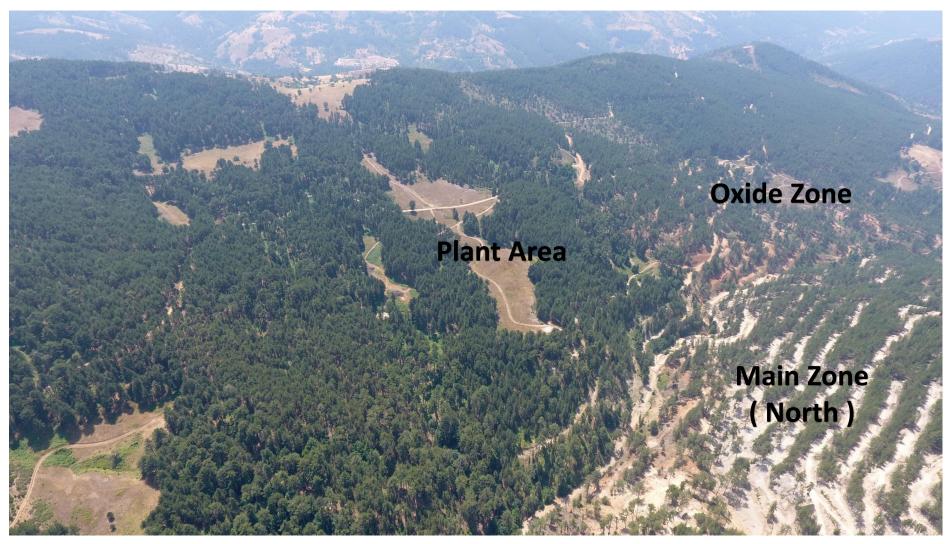

#### Mineral Reserves for the Çöpler Deposit (As of December 31, 2015) (100% Basis)

Mineral Reserves Category Material	Tonnes (x1000)	Au (g/t)	Ag (g/t)	Cu (%)	Contained Au Ounces	Recoverable Au Ounces
Proven - Oxide In-Situ	-	-	-	-	-	-
Probable - Oxide In-Situ	17,836	1.13	3.53	0.13	650,000	494,000
Probable - Oxide Stockpile	148	0.87	-	-	4,000	3,000
Total – Oxide	17,984	1.13	3.50	0.13	654,000	497,000
Proven - Sulfide In-Situ	-	-	-	-	-	-
Probable - Sulfide In-Situ	34,879	2.63	7.23	-	2,945,000	2,830,000
Probable - Sulfide Stockpile	5,102	3.67	-	-	601,000	578,000
Total - Sulfide	39,982	2.76	6.30	-	3,546,000	3,408,000
Proven - Oxide + Sulfide + Stockpile	-	-	-	-	-	-
Probable - Oxide + Sulfide + Stockpile	57,965	2.25	5.44	0.04	4,200,000	3,905,000
Total - Oxide + Sulfide	57,965	2.25	5.44	0.04	4,200,000	3,905,000

#### Total Mineral Reserves increased to 3.9M recoverable ounces of Gold

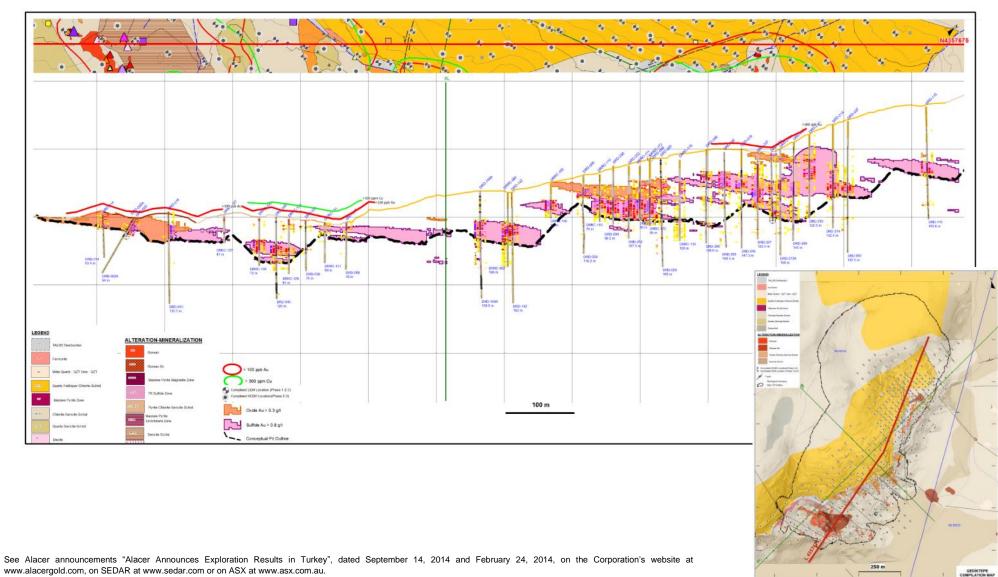

Note: Mineral Reserves are shown on a 100% basis, of which Alacer Gold owns 80%. Rounding differences will occur. Further information on this Mineral Reserves estimate is in the press release titled "Alacer Gold Announces Çöpler Sulfide Project Approval", dated May 12, 2016, which can be found on the Company's website at www.AlacerGold.com. We are not aware of any new information or data that materially affects the information included in the presentation and that all material assumptions and technical parameters underpinning the estimates in the presentation continue to apply and have not materially changed.
