

# DRILLING UNDERWAY: DIAMOND CORE AT NAMBI TO FURTHER TEST GOLD MINERALISED SYSTEM

NTM GOLD LTD is pleased to advise that diamond drilling has re-commenced at the Company's Nambi Deposit within the 100% owned Redcliffe Gold Project.

This stage of drilling is to consist of two diamond drill holes for approximately 500 metres to intersect both the Main Lode and East Lodes, at interpreted down plunge high grade positions.

Recent diamond drilling (see ASX release on Nambi Diamond Drilling 22 August 2016) indicated the potential for the existence of a robust mineralised system as lodes were intersected at depths significantly greater than previously drilled. A **Main Lode** intercept of **6m @ 6.62g/t gold** was returned and the drilling also showed that the **East Lodes** are becoming increasingly important at depth, as it included an intercept of **3.2m @ 9.86g/t gold**.

Results will be available over the next few weeks upon logging, cutting and assaying of mineralised intervals. Information will then be incorporated into the database to aid re-estimation of resources to JORC 2012 compliance.

Drilling in progress at Nambi Prospect

**Rodney Foster**  
CEO

#### Competent Person Statement

The information in this report, as it relates to Exploration Results, is based on information compiled and/or reviewed by Rodney Foster who is a Member of The Australasian Institute of Mining and Metallurgy. Rodney Foster is a Director of the Company. He has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Rodney Foster consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

This information with respect to Resources was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported.
