

Alexium admitted to NASDAQ International Designation

Highlights:

- Nasdaq International Designation will increase visibility for Alexium's level 1 ADR's that currently trade in the US on the OTC Market.
- Precursor to planned NASDAQ Main Board listing.

Perth, Australia and Greer, South Carolina: Alexium International Group Limited ("Alexium," "the Company") (ASX:AJX, OTC QX:AXXIY) has been admitted to NASDAQ International Designation.

Alexium's Level 1 ADR's (American Depositary Receipts) will now trade on NASDAQ International Designation under ticker AXXIY and will cease being listed on the OTCQX. There are no additional regulatory or compliance requirements for Alexium's existing Level 1 ADR's under the NASDAQ International Designation. The Transfer Agent for Alexium's ADR's is BNY Mellon.

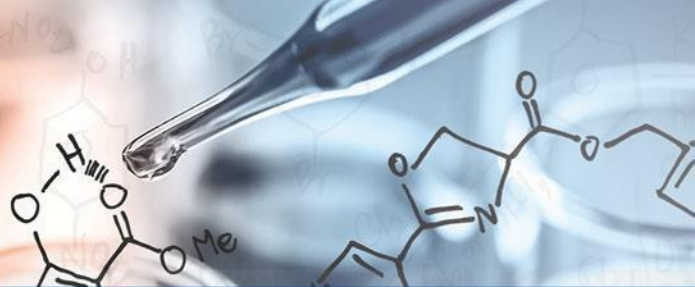

The NASDAQ International Designation will provide Alexium with access to NASDAQ's investor marketing programs and investor relations services to increase the visibility of Alexium in the US investment community and US market makers. NASDAQ will distribute Alexium's news through NASDAQ's press release distribution service, reaching both investor and financial news and online services.

"Alexium's growing sales and market penetration for its environmentally friendly specialty chemical products has led to an increase in interest from within the US investment community. This NASDAQ International Designation is a precursor to a NASDAQ Main board listing which is currently being progressed with NASDAQ", stated Dirk Van Hyning, Alexium's President.

The NASDAQ International Designation program commenced in December 2015. Two of the initial international designation companies were Qantas Airways Ltd and Macquarie Group.

The NASDAQ International Designation is not a US regulated public exchange. The companies who participate in this program are not subject to the same listing or qualification standards applicable to securities listed on a US public exchange market and regulated by the US Securities and Exchange Commission (SEC). However, NASDAQ International Designation companies are distinguished from other OTC traded companies by having met NASDAQ's high program requirements.

Alexium is not required to issue any new shares under the NASDAQ International Designation or to convert its existing Level 1 ADR's to publicly tradeable Level 2 ADR's for listing on the NASDAQ main board. However, Alexium will be required to make public filings with the SEC and be regulated by the SEC for Level 2 ADR's.

About Alexium:

Alexium International Group Limited (ASX: AJX, AJX: AX, OTC QX: AXXIY) holds proprietary patent applications for novel technologies developed to provide flame retardancy for a wide range of materials. These environmentally friendly flame retardants have applications for a number of industries and can be customized. Further, Alexium has developed products for a range of other applications including phase-change materials, water repellents, antimicrobials, and combinations thereof. Alexium also holds patents for a process developed initially by the U.S. Department of Defense, which allows for the surface modification and attachment of nano-particles or multiple chemical functional groups to surfaces or substrates to provide functions such as fire retardancy, water proofing, oil proofing, and anti-microbial treatments. Applications under development include but are not limited to textiles, packaging, electronics, and building materials. Alexium's chemical treatments are currently marketed under the Alexiflam™, Alexiflam FR™, Alexiflam SYN™, Alexiflam NF™, Alexiflam AD™, Alexiflam PB™, and Alexicool™ brand names. For additional information about Alexium, please visit www.alexiuminternational.com.

About Nasdaq:
