

Mining Entry Permits issued for Cosmo Newberry Project

In the September Quarter, 3D Resources Limited announced that it had reached agreement with both the Yilka Native Claimants and the Cosmo Newberry Aboriginal Corporation to gain access to the Aboriginal Reserve on which its Cosmo Newberry tenements lie.

The company is pleased to announce that the Aboriginal Land Trust have supported this agreement and following a recommendation to the Minister for Aboriginal Affairs, a Mining Entry Permit has been granted to the Company.

This paves the way for 3D Resources Ltd to initiate its program of exploration on the Cosmo Newberry area. The company has held tenements over the unexplored greenstone belt around Cosmo Newberry since it listed and has long recognized the prospectivity of the region as demonstrated by the recent exploration success of Gold Roads in the adjacent Yamarna Greenstone belt.

The Company is pleased that it can now initiate plans to explore this highly promising region and expects the first program to start in the current quarter. Completion of the Company's recent underwritten rights issue and placement of the shortfall as announced earlier today will assist in funding these programs.
