
Quarterly Review

Quarter Highlights

- Agreement to deploy the Lenovo Entertainment Hub and Upscaling technology with Lenovo nearing conclusion
- Launch of the Lenovo Entertainment Hub (LEH), a product developed and managed by Beyond Media
- In the first week of January, Beyond Media demonstrated its Virtual Reality (VR) Upscaling technology at CES
- Gophr produced a record quarter for revenue and job numbers
- Boppl's December quarter was a record quarter for live venues and new users

Press Coverage

During the period, the portfolio companies of Yonder & Beyond continued to generate positive press coverage within mainstream and technology focused media outlets including Sydney Morning Herald, Windows Central and Digital Trends to name a few. Links to these articles can be found on the Yonder & Beyond web site.

Beyond Media

Significant progress with LEH and Upscaling nearing commercial agreement

Beyond Media achieved significant progress with the finalisation and launch of the Lenovo Entertainment Hub, a product developed and managed by Beyond Media. Importantly, the company also developed and successfully demonstrated its Virtual Reality (VR) Upscaling technology and is in the process of deploying it together with Lenovo on VR ready machines.

Beyond Media received increasing interest and enquiry from global electronic manufacturers during the quarter, which the company is currently progressing to potential licensing agreements.

The company also closed two content partnerships over the period, one with Green Man Gaming who will provide access to their large catalogue of games and also with Instant Sponsor who will launch its Success Series through the Y-Hub platform.

Lenovo Entertainment Hub and Upscaling Launched at CES

Following the quarter end in the first week of January, Beyond Media and Lenovo showcased the Lenovo Entertainment Hub and the integrated Virtual Reality Upscaling technology at the world's largest Consumer Electronics Convention (CES).

The demonstration took place over 4 days as a part of Lenovo's exhibit, and was highly successful, resulting in significant attention and interest from media and industry with several of the world's largest electronics manufacturers expressing significant interest in undertaking commercialisation partnerships using Beyond Media's technology.

In addition to exhibiting the content delivery platform, Beyond Media and Lenovo also unveiled the Beyond Media Virtual Reality Upscaling technology, a piece of software that enables consumers to play any game built in a 3D environment in VR. The goal is to have the technology embedded in the Lenovo Entertainment Hub on Lenovo Virtual Reality ready devices, and ensure that consumers have access to a substantial library of Virtual Reality content through Lenovo Entertainment Hub, creating a unique selling point both for the Hub and the Lenovo hardware in the rapidly growing VR segment of the market.

Positive reception from the media included coverage and articles in the Sydney Morning Herald, TechRadar, LaptopMag and Windows Central.

The company is in advanced talks with potential deployment clients, in regards to both existing software and services as well as other bespoke solutions covering content distribution, management, security, and compression technologies. Potential clients include some of the largest Electronics Manufacturers, Operators, and Content distributors in the world.

Looking forward:

In the current quarter the company expects, together with Lenovo, to deploy the Lenovo Entertainment Hub and the VR Upscaling technology both in the US and other territories. Deployment is planned through near term shipments of Lenovo computers, as well as making the software available for download on existing consumer devices. Beyond Media will continue to expand the content library available on the Hub with ongoing discussions with some of the world's largest publishers.

GOPHR

Strong Revenue and job volume growth

During the December quarter, Gophr maintained its strong quarter on quarter increase in both revenue and job numbers, with a 25% and 41% increase respectively when compared to the previous quarter. This result was largely attributable to the partnerships secured over the period, which included Abellio, Orckestro, Lineten and Trybe.

The significant increase in job volumes was achieved with a lower average revenue per job when compared to previous periods. This high volume of work has contributed to getting more couriers on the road and a broader exposure to new customers.

Gophr maintained its commitment to customer satisfaction, releasing a major new feature during the quarter. Expanding on the development of its multi drops API released last quarter, Gophr made this multi-drop feature available directly to customers on the booking engine. The completion of this feature now enables Gophr to match and exceed all the services a traditional courier company offers at the point of booking. This has generated many new opportunities for potential partnerships with well-known fashion brands and high street stores.

Gophr continues to receive very positive reviews on Trustpilot, Google Reviews and through Net Promoter Score.

Boppl

Record growth in order volume and mobile transactions

Boppl achieved strong growth during the quarter across all key metrics for order volume and mobile transactions. The company brought on several new customers and the number of customers trialling Boppl increased significantly.

The platform's core customer base continues to grow, with more than 25,000 new users joining since October 2015. During the quarter, Boppl's customer retention remained very high at 94%. This highlights consumer preference for Boppl's mobile ordering and payments utility for on-demand, local food and drink.

Transaction volume increased by 15% in Q2 2017, while \$175,000 of transaction volume was processed.

Other key highlights include:

- Roll out of a successful pilot in the US with Larry's Giant Subs chain and Elevate Coffee Company.
- Agreement of partnership with leading point-of-sale system Clover (First Data Corporation), providing the integrated mobile ordering and payments platform to point-of-sale devices – 500,000+ globally today.
- New development was required to support delivery and order personalisation with integrated point-of-sale systems
- Growing franchise and chain deployment across popular brands such as including Coco Bliss, Pineapple Express Cafes, Acai Brothers and Corbett & Claude group.

Prism Digital

During the quarter Prism Digital generated revenue of \$493k. Other achievements included a one percent increase in the average permanent placement fee over the previous quarter and recent new hires who began delivering revenue for the company.

The company's list of clients grew substantially during this period to include Claranet, one of Europe's largest privately owned Managed Hosting Service Providers, and WorldRemit one of the UK's leading Fintech businesses. Prism Digital also signed a contract to supply one of the UK's largest retailers, Sainsburys Argos. Several clients were also gained in regional England.

Prism Digital exhibited at the DevOps World conference in London over the period, which was partnered with CHEF, Leankit and LogicMonitor, who are the industry leaders in the DevOps space. The 2016 calendar year was Prism Digital's most successful year to date and has established a very strong base for further success in 2017.

Other

YNB has been as yet unable to secure a new 4G mobile partner and has determined that it will not pursue the virtual mobile network operator market following the voluntary creditors liquidation of MeU.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
