Gold Stream

The Company entered into a gold stream financing arrangement in May 2015 under which Cartesian Royalty Holdings (“CRH”) provided US\$8 million in return for an entitlement to receive 20% of the gold produced during the first three years of commercial production from Cascavel, subject to a minimum quantity of 16,000 ounces of gold and a maximum quantity of 24,000 ounces of gold to be delivered to CRH. No interest is payable and the facility is secured over the Company’s interest in the Cascavel Project and the assets of the Project.

Following the suspension of operations in October 2016, the Company negotiated with CRH to replace the milestone/date default clause contained in the gold stream agreement. New variation deeds were agreed which allow the Company sufficient time to complete the necessary independent operations reviews and remedial action planning to allow it to recommence operations.

Refer to the ASX announcement dated 9 December 2016 – Appendix A, for a summary of the material terms of the variation deeds entered into between the Company and CRH.
