

## WOODLARK – Visible gold

The [Board](#) of Geopacific Resources Ltd (Geopacific) is pleased to announce the discovery of visible gold in a hole currently being drilled at the Busai deposit, at the Woodlark Gold Project (Woodlark) in Papua New Guinea.

### Visible gold discovered at Busai at shallow depth

Two intercepts have been identified from 52 metres downhole in a strongly altered zone in hole BA17DD003. Drilling continues, still in the zone.

**Figure 1: Visible gold at 53 metres downhole in hole BA17DD003**

#### Geopacific Managing Director Ron Heeks said

*“Drilling commenced at Busai late last year with the first results released last week. Identifying several occurrences of visible gold from extensional drilling is a further indication of the upside grade potential of the Woodlark deposits. I look forward to seeing the assay results from this intersection”.*
