Gallatin Gas-Condensate project update (7.5% WI to IHS)

Interpose is pleased to advise that the Rogers Drilling rig spud the Christine Keahey #1 well (CK#1 well) Monday US time. The rig is currently drilling away at 650 feet. The CK#1 well will test the possibility of a potentially productive section of the Pettit formation that lies across the prospect area. The well is targeting potential reserves of 5bcfg and 70,000 BO and is expected to take approximately 28 days to drill and test.

About the Gallatin project;

IHS acquired a 7.5% working interest with a 25% back in after payout to the project generator.

IHS dry hole cost estimated at USD\$73,762.

Completion costs of USD\$23,000 estimated if a successful well.

IHS will earn a 7.5% WI in 1,074 acres covering the project area AML.

Net Revenue Interest of 75%.

The company will keep the market informed of progress and results from the CK#1 well as they come to hand.
