

Department 13 to Exhibit Mesmer™ at Milipol Asia-Pacific 2017

Milipol Asia-Pacific is a leading international exhibition of homeland security held in Singapore

PERTH, WA and COLUMBIA, MD USA – Counter drone technology company Department 13 (ASX: D13 or “the Company”) is pleased to report its participation in Milipol Asia-Pacific, a leading international exhibition dedicated to solutions, technology and innovations in homeland security, being held in Singapore today, until the 6 April 2017.

Department 13 is the only counter-drone technology company invited to the Milipol Exhibit where it will showcase its MESMER™ Solution Version 1.0 (“MESMER”) technology to more than 400 delegates from over 30 countries involved in the counter terrorism, law enforcement and civil defence communities across the region.

MESMER is a unique, low power, non-jamming, non-kinetic drone mitigation solution, enabling an effective and safe method of protecting personnel and infrastructure from dangerous drones.

Milipol Asia-Pacific attracts over 400 attendees from more than 30 countries. The three-day exhibition runs concurrently with a homeland security conference with leading international speakers who will provide their insight into their current fields of expertise.

Department 13’s attendance at the Milipol Exhibit is being sponsored by the Maryland Department of Commerce, who is funding the visit as part of investment in the development of local companies.

On Department 13’s attendance at Milipol, Jonathan Hunter, CEO of Department 13 said:

“The Milipol Exhibit is a great opportunity for Department 13 to showcase MESMER to the Asia-Pacific homeland security community. As the sole counter-drone security company showcasing at the event, it is a great endorsement of our technology and we look forward to meeting with leading government and security professionals to demonstrate MESMER’s capability and drive sales opportunities.”

About Department 13

Based in Columbia, Maryland, Department 13 (D13) was founded by a team of former military operators, scientists and engineers who apply proprietary innovative advanced technology to emerging requirements. D13 is developing cutting-edge software and communication systems that have the potential to transform the networking and communication fields as well as current applications in drone defense, mobile phone IT security and secure enhanced Android phone systems. D13 is engaged with multiple counter UAS projects to provide strategic solutions for civil, military and commercial security requirements. D13 has 13 patents and 22 patent applications in the development of wireless protocol manipulation and communication networking software with applications in drone defense, local area and wide area cellular communications and networking, enhanced data bandwidth for all digital communications, cyber security for mobile devices and sophisticated RF technology applications (radiometrics).
