Preferred Contractor Status – Gruyere Joint Venture Bulk Earthworks

MACA Limited ('MACA') (ASX: MLD) is pleased to advise that it has been confirmed as preferred contractor for the bulk earthworks package for the Gruyere Joint Venture. The Gruyere project is a joint venture between Gold Road Resources Limited and Gold Fields Limited. Final contract award is anticipated in April upon finalisation of detailed management and mobilisation plans.

The project is expected to commence before the end of the financial year and will consist of access road, airstrip and process plant earthworks for the first 6 months followed by construction of the tailings storage facility (TSF), mine stripping and run-of-mine (ROM) pad. The duration of the project for MACA is expected to be 15 months and at its peak the bulk earthworks project will employ in excess of 150 personnel.

MACA Operations Director Geoff Baker said "The Gruyere project is on the back of several minor civil works awards in Victoria and will help underpin the Civil business into the next financial year. Work in Hand in the Civil and Infrastructure Division for FY18 will be in excess of \$60M upon contract award".
