DREAMSCAPE NETWORKS ADDS DROPSUITE TO ENABLE SMEs TO EASILY BACKUP, RECOVER AND PROTECT THEIR DIGITAL ASSETS

Dreamscape Networks Limited (ASX:DN8) is pleased to announce it has partnered with Dropsuite Limited (ASX:DSE). The partnership will offer an essential service for customers to easily backup, recover and protect their digital assets.

A leading online solutions provider of domain names, hosting and solutions, Dreamscape Networks owns Australia's #1 domain brand Crazy Domains.

As part of the broad and ever-expanding suite of solutions offered by Crazy Domains, Website Backup can be applied to not only as an add-on for the company's member base of over 1.5m, but it is also available to new customers to prevent costly downtime.

Gavin Gibson, Chief Operations Officer of Crazy Domains, said:

"Losing your website can be a disaster. Everyone knows the sick feeling of losing work that hasn't been saved or backed up, but losing website data can be even worse. A site can be very quickly rendered useless if important data becomes corrupted, the website is hacked, infected by a virus, or critical files are deleted by mistake. This is why we're so excited to be working with Dropsuite.

"The automation of updates means you don't have to remember to back up. It works like an insurance policy. If anything goes wrong, you're covered, and the team at Crazy Domains are on hand 24/7 to help you out. You don't have to lose sleep worrying about what could happen, and can instead focus on growing your business."

Small and mid-sized businesses are often the hardest impacted by website data loss, so the site backup solution is designed as an insurance policy, guarding against what can be very costly data loss.

Significantly reducing the overhead cost of owning, managing and refreshing hardware infrastructure, the savings of site backup are passed on to the end customer.

Site Backup is aimed at users with little or no IT knowledge, who often lack a dedicated IT department or technical staff, and yet rely on continued profitability and uninterrupted revenue. These factors mean they need a serious business continuity solution for their websites.

All files are encrypted with Military Grade AES 256 bit encryption — ensuring data is safe and secure according to the highest professional standards. The Cloud backup product is able for websites built with Wordpress, Magento, Joomla, TYPO3, Drupal, MODX and other website assembly platforms.

In addition, the product is able to backup databases types, including MySQL (with or without SSH over tunnel), MS-SQL, MongoDB and PostgreSQL.

Dreamscape Networks is committed to best-in-world service, providing simple, innovative and affordable online solutions that help businesses to take great steps forward.
