WA Gold Portfolio

In December 2016, the Company announced the acquisition of a prospective gold portfolio comprised of four Licenses with multiple significant drill intersections in the Eastern Goldfields Province of Western Australia.

WMN currently intends to proceed with a 6 month exploration program for these gold assets, including geochemical sampling, mapping, and drill targeting.

Persada

As previously advised, the Persada tenement expired on 12 August 2016 and in order to maintain tenure, the Company must convert the Exploration IUP to a Production IUP. WMN considers this would be a very costly exercise and not in the best interests of WMN's shareholders and therefore has allowed the Exploration IUP over the Persada tenement to lapse.

Corporate

During the March 2017 Quarter, the Company completed a placement of 84,615,385 Shares (pursuant to its placement capacity approved on the 29th November 2016 at the Company's AGM) at an issue price of \$0.013 per share to sophisticated investors, to raise \$1,100,000. The Company issued 5,076,923 Shares in lieu of broker fees associated with the placement.

The Company also issued 12,226,029 ordinary fully paid shares on exercise of options, raising \$238,408.

Tenements held at 31 March 2017

Set out below is the relevant information in relation to Western Mining Network Ltd tenements as required under ASX Listing Rule 5.3.3.
