COMPANY UPDATE

- **Completion and launch of first live, online version of E-Collate**
- **Activated first stage of marketing and outreach program**
- **E-Collate software targeting the multi-billion-dollar superannuation market.**

Transcendence Technologies Limited ("**Company**" or "**TTL**") is pleased to announce the readiness of the E-Collate platform for active trials by end-users. This marks an important milestone in the development of E-Collate.

E-Collate Pty Ltd (**E-Collate**) is an innovative document aggregation software technology. The Company is initially targeting the multi-billion superannuation market as it seeks to streamline the administration of individual Self-Managed Superannuation Funds (**SMSF**).

E-Collate uses proprietary software and interfaces to enable rapid arrangement, secure storage and efficient export of compliance sensitive documentation. The system utilises hybrid file storage referenced with tagging, data entry and reporting modules to seamlessly track compliance performance and prepare for annual account and audit lodgement events.

E-Collate's web platform now has the minimum function required for the end user to upload, manage and export documents collections for their SMSF accounting and audit service providers ("**SMSF Providers**").

The Company has now formally commenced direct contact with SMSF Providers to gather end-user participants for the current pilot program release of E-Collate.

Concurrent with pilot program operations, TTL is building initial relationships with a range of SMSF Providers for their participation in the full commercial release stage.

The Board is excited to note the progress on E-Collate to date and will continue to review progress of the pilot program before authorising transition of E-Collate to a full scale commercial offering.

The Company will continue to update the market as matters progress.
