NGY: Listed on Australian Securities Exchange (ASX)

DELIVERING CLEAN
ENERGY TO INDONESIA

Corporate Presentation – September 2017

Disclaimer

Legal Disclaimer

This presentation has been prepared by Globaltec Formation Berhad (“GFB”) and NuEnergy Gas Limited (“NuEnergy Gas”) (collective as “Group”) and is being provided for the sole purpose of providing preliminary background financial, operational and other information to enable shareholders and/or prospective investors to review the business activities of the Group. It is not intended as an offer, invitation, solicitation or recommendation with respect to the purchase or sale of any securities.

Certain statements included in this release constitute forward looking information. This information is based upon a number of estimates and assumptions made on a reasonable basis by the Group in light of its experience, current conditions and expectations of future developments, as well as other factors that the Group believes are appropriate in the circumstances. While these estimates and assumptions are considered reasonable, they are inherently subject to business, economic, competitive, political and social uncertainties and contingencies.

Many factors could cause the Group actual results to differ materially from those expressed or implied in any forward-looking information provided by the Group, or on behalf of, the Group. Such factors include, among other things, risks relating to additional funding requirements, gas prices, exploration, acquisition, development and operating risks, competition, production risks, regulatory restrictions, including environmental regulation and liability and potential title disputes. Forward looking information is no guarantee of future performance and, accordingly, investors are cautioned not to put undue reliance on forward looking information due to the inherent uncertainty therein. Forward looking information is made as at the date of this release and the Group disclaims any intent or obligation to update publicly such forward looking information, whether as a result of new information, future events or results or otherwise.

The purpose of this presentation is to provide general information about the Group. No representation or warranty, express or implied, is made by the Group that the material contained in this presentation will be achieved or prove to be correct. Except for statutory liability which cannot be excluded, each of the Group its officers, employees and advisers expressly disclaims any responsibility for the accuracy or completeness of the material contained in this presentation and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this presentation or any error or omission therefrom. This presentation should be read in conjunction with the Annual Financial Report as at 30 June 2016 of the Group, the half year financial statements together with any Bursa/ASX announcements made by the Group in accordance with its continuous disclosure obligations arising under the relevant acts/laws.

- **Who We Are**
- Indonesia's Energy Markets
- Our Portfolio
- Tanjung Enim PSC Commercialisation
- Why Invest in NuEnergy

- NuEnergy Gas is an ASX Listed, Independent Clean Energy Company
- Paid-Up Capital: AUD106 Million
- Focused on Exploring, Developing & Producing Clean Gas in Indonesia
- 6 Production Sharing Contracts (PSC) Covering Over 3,600km²
- Proud Partner of the Indonesian Government and Energy Industry

Committed to Delivering Maximum Shareholder Value/Return

Sumatra

East Kalimantan

Experienced Board and Proven Leadership Team

Dr. Victor Zhang Chief Technical Officer	SINOPEC	bp	SINOCHINA	30 years
Jason Chua Chief Financial Officer	Globaltec	AIC	KPMG	17 years

NuEnergy Gas has augmented an experienced board and proven leadership team with:

- Vast experience of operating and commercializing unconventional gas and CBM projects
- Deep technical knowledge and understanding of hydrocarbon geology in Indonesia
- Long standing and trusted relationship across the Asian energy markets, especially within Indonesia

Our major shareholders are -

1. Globaltec Energy Resources ("GER")
2. New Century Energy Resources ("NCE")

About GER and NCE

- GER and NCE are subsidiaries of Globaltec Formation Berhad ("Globaltec"), a conglomerate listed on the Malaysian Stock Exchange
- Businesses spanning across manufacturing, oil & gas, palm oil plantation and investment holdings
- Global exposure in 10 locations across 3 countries, 7 facilities and employs about 1,200 employees
- In 2014, Globaltec teamed-up with NCE, a team of experts with vast experience in the oil & gas exploration, production and servicing industry, to recapitalise and transform NuEnergy Gas
- Together hold approximately 65% of NuEnergy Gas collectively

NCEenergy

**Indonesia's
National Oil
Company**

**Indonesia's
Largest Energy
Company**

**Indonesia's
Largest Coal
Company**

**Indonesia's
Emerging
Energy & Coal
Company**

- We offer our shareholders a unique opportunity to access South East Asia and gain exposure to Indonesia's fast moving and dynamic energy market
- We are proud to be recognised as a partner of choice for other leading Indonesian energy companies
- Each of our partners are highly capitalized with ambitious growth plans for increasing unconventional gas production
- We are committed with them to delivering clean energy to the people of Indonesia

Building a sustainable upstream company by investing in: People + Environment + Community Engagement + CSR + Health, Safety & Security + Corporate Governance

Sustainability is integral to our business and our every day actions. We operate in a socially responsible and conscious manner:

- We are incredibly proud of our people, they are at the heart of our company and all we do
- We are committed to minimising the footprint and operational impact our operations have on the environment and local communities
- We generate jobs, economic benefits and our investments have ensured we are trusted member of these communities
- We maintain rigorous standards for meeting all environment standards, rules and regulations
- Integrity and sound corporate governance also underpin everything we do

- Who We Are
- **Indonesia's Energy Markets**
- Our Portfolio
- Tanjung Enim PSC Commercialisation
- Why Invest in NuEnergy

World's 4th largest population and growing rapidly

Strong GDP growth and good economic outlook (5% growth y-on-y)

Increasing energy demand (5.9% in 2016) and robust gas prices

Declining conventional O&G production from domestic supplies

Government support to increase clean energy production

Fantastic investment potential in a fast growing country looking for new investment in its energy industry to meet the needs of its people and its enterprises

- Indonesia seeks energy security and has a government agenda to transition to a more low carbon economy
- New conventional fields are very difficult to find and existing fields already have declining production.
- Natural gas production dropped for a sixth year in a row, by 7.4% (-5.3 Bcm) in 2016 (19% lower than 2010) - BP
- Supply shortage in Central and South Sumatera (combined population of 55 million) will be 296 MMSCFD in 2020 rising to 937 MMSCFD in 2030.

Source: Kementerian Energi dan Sumber Daya Mineral – Direktorat Jenderal Minyak dan Gas Bumi – Indonesia - 2014

Indonesia's Gas Prices - Robust & Attractive

Gas prices in Indonesia average between US\$6 mmbtu to US\$10 mmbtu

Vietnam US\$7 mmbtu
Singapore US\$4 mmbtu

Malaysia US\$4 mmbtu
United States US\$2.5 mmbtu

Indonesia's Unconventional Gas Resources

- We focus on Coal Bed Methane (CBM), an unconventional gas which is more environmentally friendly than coal as it is a clean-burning fuel and produces approximately 15-50% less GHG emissions.
- **453 TCF:** Resources estimate for all basins
- **90 TCF:** Resource estimate for all working areas
- **Low Drilling Costs:** current drilling costs run at approx. USD0.65M per CBM well. These drilling costs compare favorably to onshore conventional drilling costs in Indonesia of USD10-30M per well. Shale exploration is not expected to start for several years.

Source: SKK Migas (Indonesian Oil & Gas Regulator), Nov 2016

Government Policy Promotes Unconventional Gas Development & Provides Strong Foundation for our POD Roadmap

- Ministerial Decree 2015 for Unconventional Gas was issued to assist in the development of Indonesia Unconventional Gas Resources (CBM, shale oil, shale gas, tight sand gas and methane hydrate)
- Ministerial Decree 2017 was issued to firm up Government's intention for a flexible type of contract which is better suited for CBM development. The application of Gross Split Contract ("GSC") for new upstream contract replacing the current PSC which allows more flexibilities in term of less stringent process for approval and permits
- Tax regulation and contractor's split improvements are being formulated for the GSC to improve the attractiveness for investors
- We may apply for the GSC through contract amendment to provide a strong foundation for our POD Roadmap and to secure opportunity for economic upside

*Improved share
(revenue/profit) split for
contractors*

*Removal of rigid regulations
currently applied under
conventional oil and gas*

*Opportunity for cost reduction
from various flexibilities arising
from the new contract*

Increasing CBM Investment Across Indonesia

Existing Contractors	Number of PSCs / Working Areas	Total Investment (as of Dec 2016)
Vico	1	~ US\$ 300 Million
Sugico	23	US\$ 322 Million
NuEnergy Gas	6	US\$ 46 Million
Ephindo	7	US\$ 80 Million
ExxonMobil (with Sugico)	2	~ US\$ 180 Million
Santos	2	~ US\$ 50 Million
Total		~ US\$ 978 Million

SUGICO

ExxonMobil

Santos

We are ideally suited with our excellent acreage to be first mover into commercialization and full production by the end of 2018

- Who We Are
- Indonesia's Energy Markets
- **Our Portfolio**
- Tanjung Enim PSC Commercialisation
- Why Invest in NuEnergy

Assets / Projects	➤ Unconventional Gas (CBM) Assets in South Sumatra, Central Sumatra and East Kalimantan ➤ 3695 km²
Resources / Reserves	➤ OGIP: 9,691 BCF ➤ 1C / 2C / 3C: 75.84 BCF / 109.84 BCF / 193 BCF (net of NuEnergy Gas working interest) ➤ Prospective: 2,194 BCF (net of NuEnergy Gas working interest)
Business & Operations	➤ 26 wells since August 2009 ➤ NuEnergy Gas is the operator for all Assets ➤ 47 personnel; 542 years of overall CBM experience
Commercial / Development	➤ POD preparation approved for Tanjung Enim PSC ➤ Integrated development of 4 South Sumatra CBM Assets operated by NuEnergy Gas ➤ In the vicinity of existing gas and market infrastructure

Key Strategic Focus on South Sumatra

- Total South Sumatra PSCs have a combined acreage of 2,279.5 km²
- Unrisked Net Best Estimate Prospective Resource of 2.2 TCF
- Estimated CBM gas value of US\$15.4 billion (RM66.22 billion)
- Strong Partners – Pertamina, MedcoEnergi, Bukit Asam and Sugico
- Cost Recovery of US\$44 million (RM189 million)
- Total of 22 wells drilled in South Sumatra PSCs
- Average coal thickness of 40 to 49 meters from low rank coal seams ranging in depth from 300 meters to 700 meters

We Are Moving Towards an Integrated and Large Scale Development in South Sumatra

We hold six onshore PSCs, across South and Central Sumatra and East Kalimantan

- Moving quickly from pre-development to production, monetizing their reserves, delivering shareholder return
- We target shallow deposits so each asset can be developed quickly and at low-cost
- Interests in 4 PSCs, located in the close proximity of Tanjung Enim. South Sumatra is widely known as the emerging play of Indonesia CBM, with its enormous potential of 183 tcf gas initially in place estimates
- Located in a very strategic location, with existing trunklines connecting the region to key markets; and
- The presence of major energy companies and buyers.

Ingredients for successful unconventional gas (CBM) production	NGY Acreage
Known, thick, abundant and laterally continuous coal beds	✓
Indications of favourable reservoir for accumulation and preservation of CBM	✓
Relatively shallow deposits ~ less than 1,000 m	✓
Evidence of fracturing and faulting in coal, correct geothermal gradient	✓
The presence of gas fields producing from coal-bearing rocks	✓

Plans for 2017/2018 – Major Milestones Ahead

- Who We Are
- Indonesia's Energy Markets
- Our Portfolio
- **Tanjung Enim PSC Commercialisation**
- Why Invest in NuEnergy

Tanjung Enim Exploration & Appraisal

Tanjung Enim, our first PSC progressing quickly towards commercialisation (revenue generating)

13 Exploration and Appraisal wells have been drilled.
Successful cost optimization & cost discipline → Low cost production.

Tanjung Enim Resources Upgrade & Certification

Tanjung Enim, our first PSC progressing quickly towards commercialisation (revenue generating)

Upgraded our Reserves from Contingent Resources.

Please refer our announcement dated 22 February 2017 for further information.

Tanjung Enim Plan of Development (POD)

Tanjung Enim, our first PSC progressing quickly towards commercialisation (revenue generating)

**Initial POD → 100 Wells
(North Area and North West Area)**

Received approval from SKK Migas to prepare and submit POD.
Please refer our announcement dated 3 August 2017 for further information.

Tanjung Enim, our first PSC progressing quickly towards commercialisation (revenue generating)

- Our PSC partners have given their commitments to the POD preparation for the long-term development of the PSC
- The initial POD covers an area of 16km² with 100 wells
- Total CAPEX estimated at US\$82 million

Tanjung Enim Commercialisation Plan & Options

Tanjung Enim, our first PSC progressing quickly towards commercialisation (revenue generating)

Exploration & Appraisal

Completed

Resources Upgrade & Certification

Summary - Why Invest in NuEnergy Gas?

- 
- Five downward-pointing chevrons are arranged vertically on the left side of the slide. Each chevron is a different shade of blue, ranging from light blue at the top to dark blue at the bottom. Each chevron points towards a corresponding bullet point in a rounded rectangular box on the right.
- **Recognised Partner of Choice in a Country with Attractive Gas Prices, Growing Gas Demand and Government Support**
 - **Exciting Acreage with Excellent Subsurface, Qualified Reserves, Existing Gas Content and Low-Cost Drilling**
 - **Strong Balance Sheet with Committed and Supportive Shareholders**
 - **Proven Management Team, Operators of All Our PSCs, Alongside World Class Joint Venture Partners**
 - **Multiple Commercialisation Options to Quickly and Sustainably Generate Shareholder Value and Return**
