Krakatoa Resources Ltd ("Krakatoa" or "the Company", ASX: **KTA**) is pleased to announce that drilling has been completed at the Company's 100% owned Dalgaranga Project.

A total of 1,066 metres was completed across the Reverse Circulation (RC) drilling program to assess grade along strike of mineralisation exposed in the open pit, where the pegmatite occurrences are known to thicken and test areas where the presence of zinnwaldite and lepidolite was noted and have returned anomalous Li, Rb, Nb, or Ta geochemistry.

Samples have been dispatched to Intertek laboratory with assay results expected to be available in approximately four weeks.
