

ASX Announcement

11 October 2017

Halls Creek power station now in production

Zenith Energy Limited (ASX: ZEN) ('Zenith' or the 'Company') is pleased to advise that the installation and commissioning of the 6.5MW diesel-fired power station at Pantoro Resources' Halls Creek Mine has been completed successfully and is now delivering power under the Power Purchase Agreement (PPA).

Zenith commenced the installation of the power facility in June 2017, following the recent transition of Halls Creek's two-year power supply agreement into a five-year Build Own Operate (BOO) contract with the Company.

Zenith Managing Director Hamish Moffat commented: "The successful completion of Halls Creek Mine power station is testament to Zenith's outstanding commitment to deliver reliable and tailored solutions to our clients."

The completion of the diesel-fired power station at the Halls Creek Mine, as well as other recent project expansions, sees Zenith's contracted BOO capacity grow from circa 95MW to in excess of 110MW of installed capacity.
