QUARTERLY REPORT FOR PERIOD ENDING – 30 September 2017

OVERVIEW

Work completed by Summit Resources Limited (“Summit” or the “Company”) in the quarter was focussed on finalising planning for the exploration programme to be commenced in October 2018 in order to meet tenement expenditure commitments.

The total JORC (2004) Mineral Resources under Summit’s management in the Mount Isa region includes 104.6Mlb U₃O₈ Measured and Indicated Mineral Resources and 37.5Mlb U₃O₈ Inferred Mineral Resources. Of this, 57.8Mlb U₃O₈ Measured and Indicated Mineral Resources, as well as 26.5Mlb U₃O₈ Inferred Mineral Resources, are attributable to Summit. 53.7% of the Mineral Resources are located at Valhalla; the rest are distributed over the Bikini, Skal, Odin, Andersons, Mirrioola, Watta and Warwai deposits. Details are as follows: - individual Mineral Resource figures, conforming to the JORC guidelines, are quoted on 100% of project basis.

(Figures in the table above may not add due to rounding)

There are currently no plans to update the Company’s mineral resources in the near future. During the quarter the Company continued to operate on minimum operational expenditure, at a level intended to maintain the tenements in good standing, as a consequence of the continuing weakness in the uranium spot price.

The information in the table above in relation to the Mount Isa area mineral resources was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with JORC Code 2012 on the basis that the information that the estimates are derived from has not materially changed since it was last reported.

The Company’s base metal projects are currently being explored by Aeon Metals Limited (**Aeon**) and its subsidiary Aeon Walford Creek Limited (**Aeon Walford**) under joint venture and mineral rights agreements.

REVIEW OF OPERATIONS

ISA URANIUM JOINT VENTURE (QLD)

Interest: Summit Resources (Aust) Pty Ltd - 50%; Paladin Energy Ltd (Paladin) – 50%

Operator: Summit Resources (Aust) Pty Ltd

The Isa Uranium Joint Venture includes the Valhalla, Odin and Skäl deposits.

Work completed during the quarter was limited to exploration planning for programmes to be undertaken during the next six months in order to meet statutory commitments. Routine environmental surveys to ensure adequate rehabilitation of historic drill sites was also conducted.

MOUNT ISA NORTH URANIUM PROJECT (100% Summit Resources (Aust) Pty Ltd)

Summit owns 100% of the Mount Isa North Uranium Project which consists of 934km² of granted tenements that are prospective for uranium, copper and base metals. The tenements are adjacent to the city of Mount Isa. The project includes the Bikini, Mirrioola, Watta, Warwai and Andersons uranium deposits as well as numerous other uranium prospects.

Planning was completed for a geological exploration programme to commence in October 2018 in order to meet existing tenement commitments which fall due at the end of the first half of FY2018. Priority has been given to locations closer to the Valhalla deposit in order to assist in the identification of areas to retain post the next tenement milestone date in January 2018. The existing regional prospectivity analysis has been updated with additional information in order to improve exploration targeting and maximise the expected value of the exploration work. The company expects to complete approximately 2,300m of reverse circulation drilling on at least two prospects along the Gunpowder Road during October 2018 and will follow up in November 2018 with a small (approximately 1,600 line km) heli borne magnetic and radiometric survey along the margins of the Sybella granite.

BASE METALS EXPLORATION (Aeon Walford- 80%; Summit Resources (Aust) Pty Ltd - 20%)

Summary

Aeon Walford (formerly named Aston Metals (Queensland) Limited) was acquired by Aeon in June 2014.

Isa North - EPM 17511, 17513, 17514, 17519 and 16921

Aeon continue to conduct desktop reviews of the previously advised small Hero drilling programme combined with existing data in order to better understand the regional setting and potential prospectivity.

Isa West and Isa South – (all joint venture tenements)

Aeon continued desktop reviews of the Isa West and Isa South tenements during the quarter in order to determine whether further tenement relinquishments may be warranted. It is expected that the outcomes from this work will be utilised for exploration planning and/or tenement reduction in the near future.
