

Chilean exploration field program is now underway

- **First phase of geological mapping and surface geochemical sampling has started**

Gold Projects, Atacama Region, Chile

The Company is pleased to report that the 2017/2018 field exploration program has commenced at its gold properties located in the Atacama Region of Chile.

Three geologists and four field assistants have been deployed for a program of geological mapping and soil sampling. The work follows the success of the geochemical soil sampling programs in the last field season.

At Vidalita a substantive geochemical anomaly (over an area of 4km X 2km) was outlined. The current program will infill existing survey lines and extend the sampling coverage to the eastern margin of the tenement to close off an open target. A program of drilling will then commence.

Within the Jotahues concessions, the previous talus (from coarse material from the side of the valley) sampling program identified an area of anomalous geochemistry in the northern part of the prospect coincident with several areas of outcropping gold-bearing sulphide (as pyrite). These results are sufficiently encouraging to make this prospect a priority target.

About EMU NL

EMU is an ASX listed company seeking to deliver tangible outcomes for investors.

We:

- Focus on testing substantive mineralized systems capable of forming commercially attractive ore deposits, and other mineral resources, that can be developed or exploited using existing technologies;
- Seek to reduce risk by selecting operating environments with established minerals law and mining industries;
- We remain alert to best practice exploration technologies, seeking to bring new insights to our work;
- Investors can benefit from the considerable depth of experience of the management team, with a track record exploration success leading to new mine developments;
- We are active, with meaningful programs of work.

About the projects, Atacama Region, Chile

The Vidalita and Jotahues gold projects are located in the highly mineralised Oligocene/Miocene Maricunga gold belt in northern Chile, approximately 120 km east from the city of Copiapó in the Atacama Region of Chile. The two projects cover an area of over 2,800 hectares of mineral exploration concessions and host alteration and mineralization that appear geologically similar to other high sulphidation gold deposits of the Maricunga gold belt. The projects are accessed using a network of roads that link Copiapó with the Refugio project (Kinross), Cerro Casale project (Barrick/Goldcorp) and the Caspiche project (Goldcorp). Refugio is located 30 km to the northwest of Vidalita.

Emu has an option (**Emu's Option Agreement**) with Prospex SpA and BLC SpA, Chilean subsidiaries of Altius Minerals Corporation of Canada, to acquire 8 concessions at Vidalita and 3 concessions at Jotahues. The option under Emu's Option Agreement may be exercised any time up until 11th November 2019 by granting Prospex and BLC a 1% NSR on production and, subject to Emu expending US\$1 million in pursuing its rights under the Emu Option Agreement by 10th December 2018 and electing to continue with the project, allotting them 2.5 million Emu ordinary shares. In addition, if the option is exercised and subject to certain measured mineral resource hurdles, further shares will be issued. Should a measured resource of 0.5 Moz gold be defined, 5 million Emu ordinary shares would be issued. Should a measured resource of 1Moz gold be defined, a further 5 million Emu ordinary shares would be issued. Refer ASX release 15 November 2016. Prospex SpA in turn has an option under an agreement (the **Prospex's Option Agreement**) to acquire 6 of the 8 Vidalita concessions from local Chilean parties. Under the terms of that agreement, Prospex has the right to exercise that option by 11th November 2019 by paying US\$2 million and granting the Chilean parties a 1% NSR over those 6 concessions. Under Emu's Option Agreement, Emu has assumed the rights and obligations of Prospex under Prospex's Option Agreement.

Forward Looking Statement

This report contains forward looking statements concerning the projects owned by Emu NL. Statements concerning mining reserves, resources and exploration results may also be deemed to be forward looking statements in that they involve estimates based on specific assumptions. Forward-looking statements are not statements of historical fact and actual events and results may differ materially from those described in the forward looking statements as a result of a variety of risks, uncertainties and other factors. Forward looking statements are based on management's beliefs, opinions and estimates as of the dates the forward looking statements are made and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future developments.

Competent Persons Statement

The details contained in this report that pertain to exploration results, mineral resources and mineral reserves are based upon information compiled by Mr. Greg Steemson, Managing Director of Emu NL. Mr. Steemson is a Fellow of the Australasian Institute of Mining and Metallurgy (FAusIMM) and has sufficient experience in the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). Mr. Steemson consents to the inclusion in the report of the matters based upon his information in the form and context in which it appears.
