WANGLE FAMILY INSITES ADDS AFFILIATE TRACKING AND ADDITIONAL THREAT CAPABILITY

Wangle Technologies Limited (Wangle or the Company) (ASX: WGL) is pleased to announce new key enhancements to the Company's ground-breaking family protection software suite, **Wangle Family Insites (WFI)**.

WFI - Affiliate Tracking Feature

In line with the Company's previously stated strategy of WFI customer acquisition via distribution partnerships, an **affiliate tracking feature** has been **finalised and released** as part of the Wangle Family Insites product. The affiliate platform allows partners to drive customer growth for the WFI platform and generate revenue via revenue sharing arrangements with simple to setup affiliate tracked links.

WFI – Personal Live Streaming monitoring capability added

The WFI platform is now able to recognise live streaming and video uploads across high risk apps or websites including Snapchat and Instagram. By combining other risk-related data points with video upload activity, the WFI platform will be able to alert parents to potential risk activities such as sexting. The additional alert category has been configured and is ready for immediate release.

WFI – GPS-Gated Alerts (due late November)

Work is well underway on GPS-gated alerts which give parents the ability to lock GPS gates to current locations (eg the home), with live alerts being sent to parents with GPS movement outside of the locally-gated location. This gives parents an unprecedented safety feature on children's movement.

Summary

We are excited to see the platform's combination of real-time analysis and big data processing continue to evolve as its data-set is expanded with more real-world data. The system has already classified tens of thousands of platforms since launch and continues to evolve organically. The underlying algorithms have been designed to adapt to both an increasing volume and velocity of data meaning that with increased scale comes increased accuracy, and the capacity to identify new threats and behavioural changes that will help us to help parents keep kids safe online, and beyond

ABOUT WANGLE FAMILY INSITES

Wangle Family Insites (WFI) offers parents a unique approach to ensuring the safe use of the internet by children and teenagers. By utilising Wangle's world class VPN network, backed by the research insights of childhood development research organization Telethon Kids Institute, WFI monitors mobile network patterns in real time and advises parents of potential threats as well as providing greater details and resources to parents on the threats identified.

ABOUT WANGLE TECHNOLOGIES

Wangle Technologies has developed patented algorithms that not only optimise, compress and secure the data flow to mobile devices, but facilitate real time analysis of network patterns and usage behaviours. Wangle's technology provides compelling value to consumers, service providers and enterprises looking for innovative low-cost solutions for managing network capacity and use.
