ASX Announcement

FINAL BATTERY HUB TENEMENT GRANTED

- **Second and final 100%-owned exploration license granted within Battery Hub Manganese Project, Western Australia**
- **Expands granted strike length from 30km to 50km, including multiple high priority prospects**
- **RC drilling to commence this month upon heritage clearance, with aim of rapidly defining maiden JORC 2012 resource**

Pure Minerals Limited (ASX: PM1) (“Pure Minerals”, “the Company”) is pleased to announce it has been granted the second and final exploration license (E52/3523) that forms the Company’s 100%-owned Battery Hub Manganese Project in Western Australia’s Gascoyne region (Figure 1, below).

The grant of E52/3523 ensures Pure Minerals has tenure over 50km of known manganese strike and can pursue an expanded exploration and development program at Battery Hub. More than 50 manganese prospects have been identified within the total project area, with many surface samples exceeding 50% Mn.

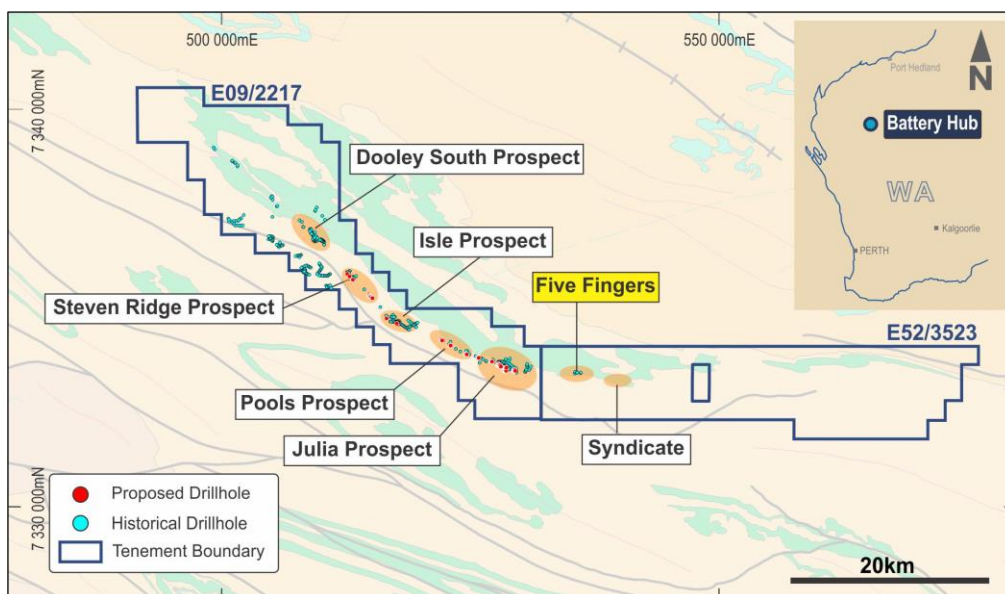

Figure 1: Location of most significant prospects at Battery Hub

Included within the E52/3523 tenement is the highly prospective Five Fingers prospect, which contains multiple manganiferous beds extending over a strike length of more than 5km. Rock chip samples from Five Fingers have returned values of up to 54.8% Mn. Five Fingers will be a priority for initial drill testing on the tenement.

Pure Minerals will immediately submit a Plan of Work for approval to begin a reverse circulation drilling program at the tenement. Drilling at the tenement is expected to be conducted in conjunction with the imminent exploration program at the neighbouring tenement at Battery Hub, E06/2217, where routine native title heritage clearances are being finalised before drilling can commence. Should clearances be approved as planned, the company expects RC drilling to commence at E06/2217 in mid-November 2017 and E52/3523 soon after, with the objective of rapidly defining a maiden JORC 2012 resource.

The Company is well funded to aggressively pursue its exploration plans at Battery Hub and its other projects in the Gascoyne and Pilbara regions of WA, having raised \$4.5 million prior to listing on the Australian Securities Exchange in August.
