WANGLE FAMILY INSITES ANDROID LAUNCH

Wangle Technologies Limited (Wangle or the **Company)** (**ASX:WGL**) is pleased to announce the release of the Android version of the Company's ground-breaking family protection software suite, **Wangle Family Insites (WFI)**, to the Google Play store today.

Summary

- Android Launch confirmed for 17 November 2017
- WFI Portal enhancements released
- GPS Gating feature update
- Desktop version of WFI update

Wangle Family Insites Android Launch Confirmed

The Company is pleased to announce that the Android version of WFI will be released to the Google Play app store today and will be available for customers once the app has been made visible across all of the Google Play servers. The release of the Android version completes the full release of the Company's ground-breaking parent protection suite utilising behavioural analysis of live mobile network traffic across Wangle's best in class secure VPN network to help parents identify and manage online risks to their children.

The product is now available via the Apple and Android App stores on a monthly or annual family subscription and will initially target Australia's 6 million families before a planned international expansion.

WFI Portal Enhancements Release

Additional enhancements to the online parent portal have now been completed for release in coming days (see Figure 1 over page). Enhancements include back-end optimisation and more granular charting of internet and app usage statistics, which will be made visible to WFI customers once their accounts accrue the required level of additional data.

GPS Gating Feature Set

Development of the GPS Gating feature, which allows parents to set an alert that activates when a child's device moves outside of a 20-metre radius from the chosen location, will be finalised next week. It is anticipated that the feature will be released to customers by the end of November after final testing is completed.

WFI Desktop Version

Development of a desktop version of the Wangle VPN for inclusion within WFI, as requested from customer feedback during beta testing, is now well underway with a December launch date anticipated. Further details of the WFI Desktop launch will be released in due course.

ABOUT WANGLE FAMILY INSITES

Wangle Family Insites (**WFI**) offers parents a unique approach to ensuring the safe use of the internet by children and teenagers. By utilising Wangle's world class VPN network, backed by the research insights of childhood development research organization Telethon Kids Institute, WFI monitors mobile network patterns in real time and advises parents of potential threats as well as providing greater details and resources to parents on the threats identified.

ABOUT WANGLE TECHNOLOGIES

Wangle Technologies has developed patented algorithms that not only optimise, compress and secure the data flow to mobile devices, but facilitate real time analysis of network patterns and usage behaviours. Wangle's technology provides compelling value to consumers, service providers and enterprises looking for innovative low-cost solutions for managing network capacity and use.
