

ASX Release

15 December 2017

NEW CORPORATE IDENTITY: AUSTAR GOLD LIMITED

Mantle Mining Corporation Ltd (ASX:MNM) has been in a significant turn-around phase since late 2016 as it sought to simplify its business strategy, dispose of non-core assets, build the right Board and management team, and focus on developing its cornerstone asset at the high-grade gold Morning Star Project (which includes the exciting Rose of Denmark mine also).

A key part of this strategy is to move forward with a new name and logo, symbolic of this new direction. At its annual general meeting held on 30 November 2017, shareholders of Mantle Mining Corporation Limited approved a change of name to **AuStar Gold Limited**.

The Australian Securities and Investment Commission has given effect to the name change and the Company will adopt a new logo for its website, corporate announcements and other publications.

For the purposes of the Company's ASX listing, the ASX has advised that the effective date for the Company's change in name and ASX code will be 18 December 2017. Until the code changes, shareholders will be able to trade using the old code 'MNM'.

The new ASX code will be **AUL**. This new code will have to be quoted to buy and sell shares or check the share price on and from **18 December 2017**.

From the above date, the Company's website will change to www.austargold.com. Visitors to the Company's previous website will be redirected to the new site.

Company email addresses will also change to @austargold.com.

CEO Mr Tom de Vries said "Our new identity and branding represents a symbolic turning point in the history of the Company. AuStar Gold reflects both the Company's Australian heritage and its renewed focus on production and exploration at our high grade gold projects in the prolific north-eastern Victorian gold fields."

About AuStar Gold:

AuStar Gold is focused on the return to production of the Morning Star mine - **an advanced high-grade gold project, with significant infrastructure including processing plant, a strategic tenement footprint, and prospectively, well positioned for near-term trial mining.**

In addition, AuStar Gold intends to develop its adjoining tenements in the Walhalla to Jamieson gold district (particularly the prolific Woods Point Dyke Swarm) into low cost high grade gold production projects.
