

DEVELOPING WORLD CLASS PROJECTS FOR THE EXPANDING GRAPHITE MARKET

**MINING INDABA, CAPE TOWN, SOUTH AFRICA
PETER CANTERBURY – MANAGING DIRECTOR**

TRITON MINERALS OVERVIEW

- **World Class Assets** - Triton holds a portfolio of advanced projects in Mozambique's proven graphite region
- **Near Term Production** - DFS confirms robust economics for the flagship Ancuabe project with first production anticipated in H2 2019
- **Marketing/Financing** - Near-term focus on EPC engagement, converting Ancuabe non binding offtake agreements and commercialisation of Nicanda Hill
- **Global Focus on Graphite Market** - Electric Vehicle and battery storage revolution and significant demand growth for expandable graphite
- **Delivering on Strategy** - All strategic milestones delivered in 2017, management team remain committed to fast tracking development
- **Diversification** – In depth due diligence on potential Australian Lithium Asset acquisition complements graphite portfolio and provides opportunity to build a multi-commodity & geographically diversified mid-tier resources company.

CORPORATE SNAPSHOT

- Share price increase > 50% in 2017 yet Triton remains **undervalued** relative to its ASX peer group (Enterprise Value/Contained Graphite)
- Strong share market **liquidity** with average daily volume +2 million shares
- Supportive **cornerstone** investor Shandong Tianye Mining Co Ltd (20%)
- Highly **experienced** and **motivated** management

Corporate Overview

Shares on Issue	769.9M
Listed options	87.4M
Unlisted options	59.5M
Performance rights	19.0M
Share Price 31 January 2018	A\$0.112
Market capitalisation	A\$86.13M

Share Price Performance and Daily Volumes

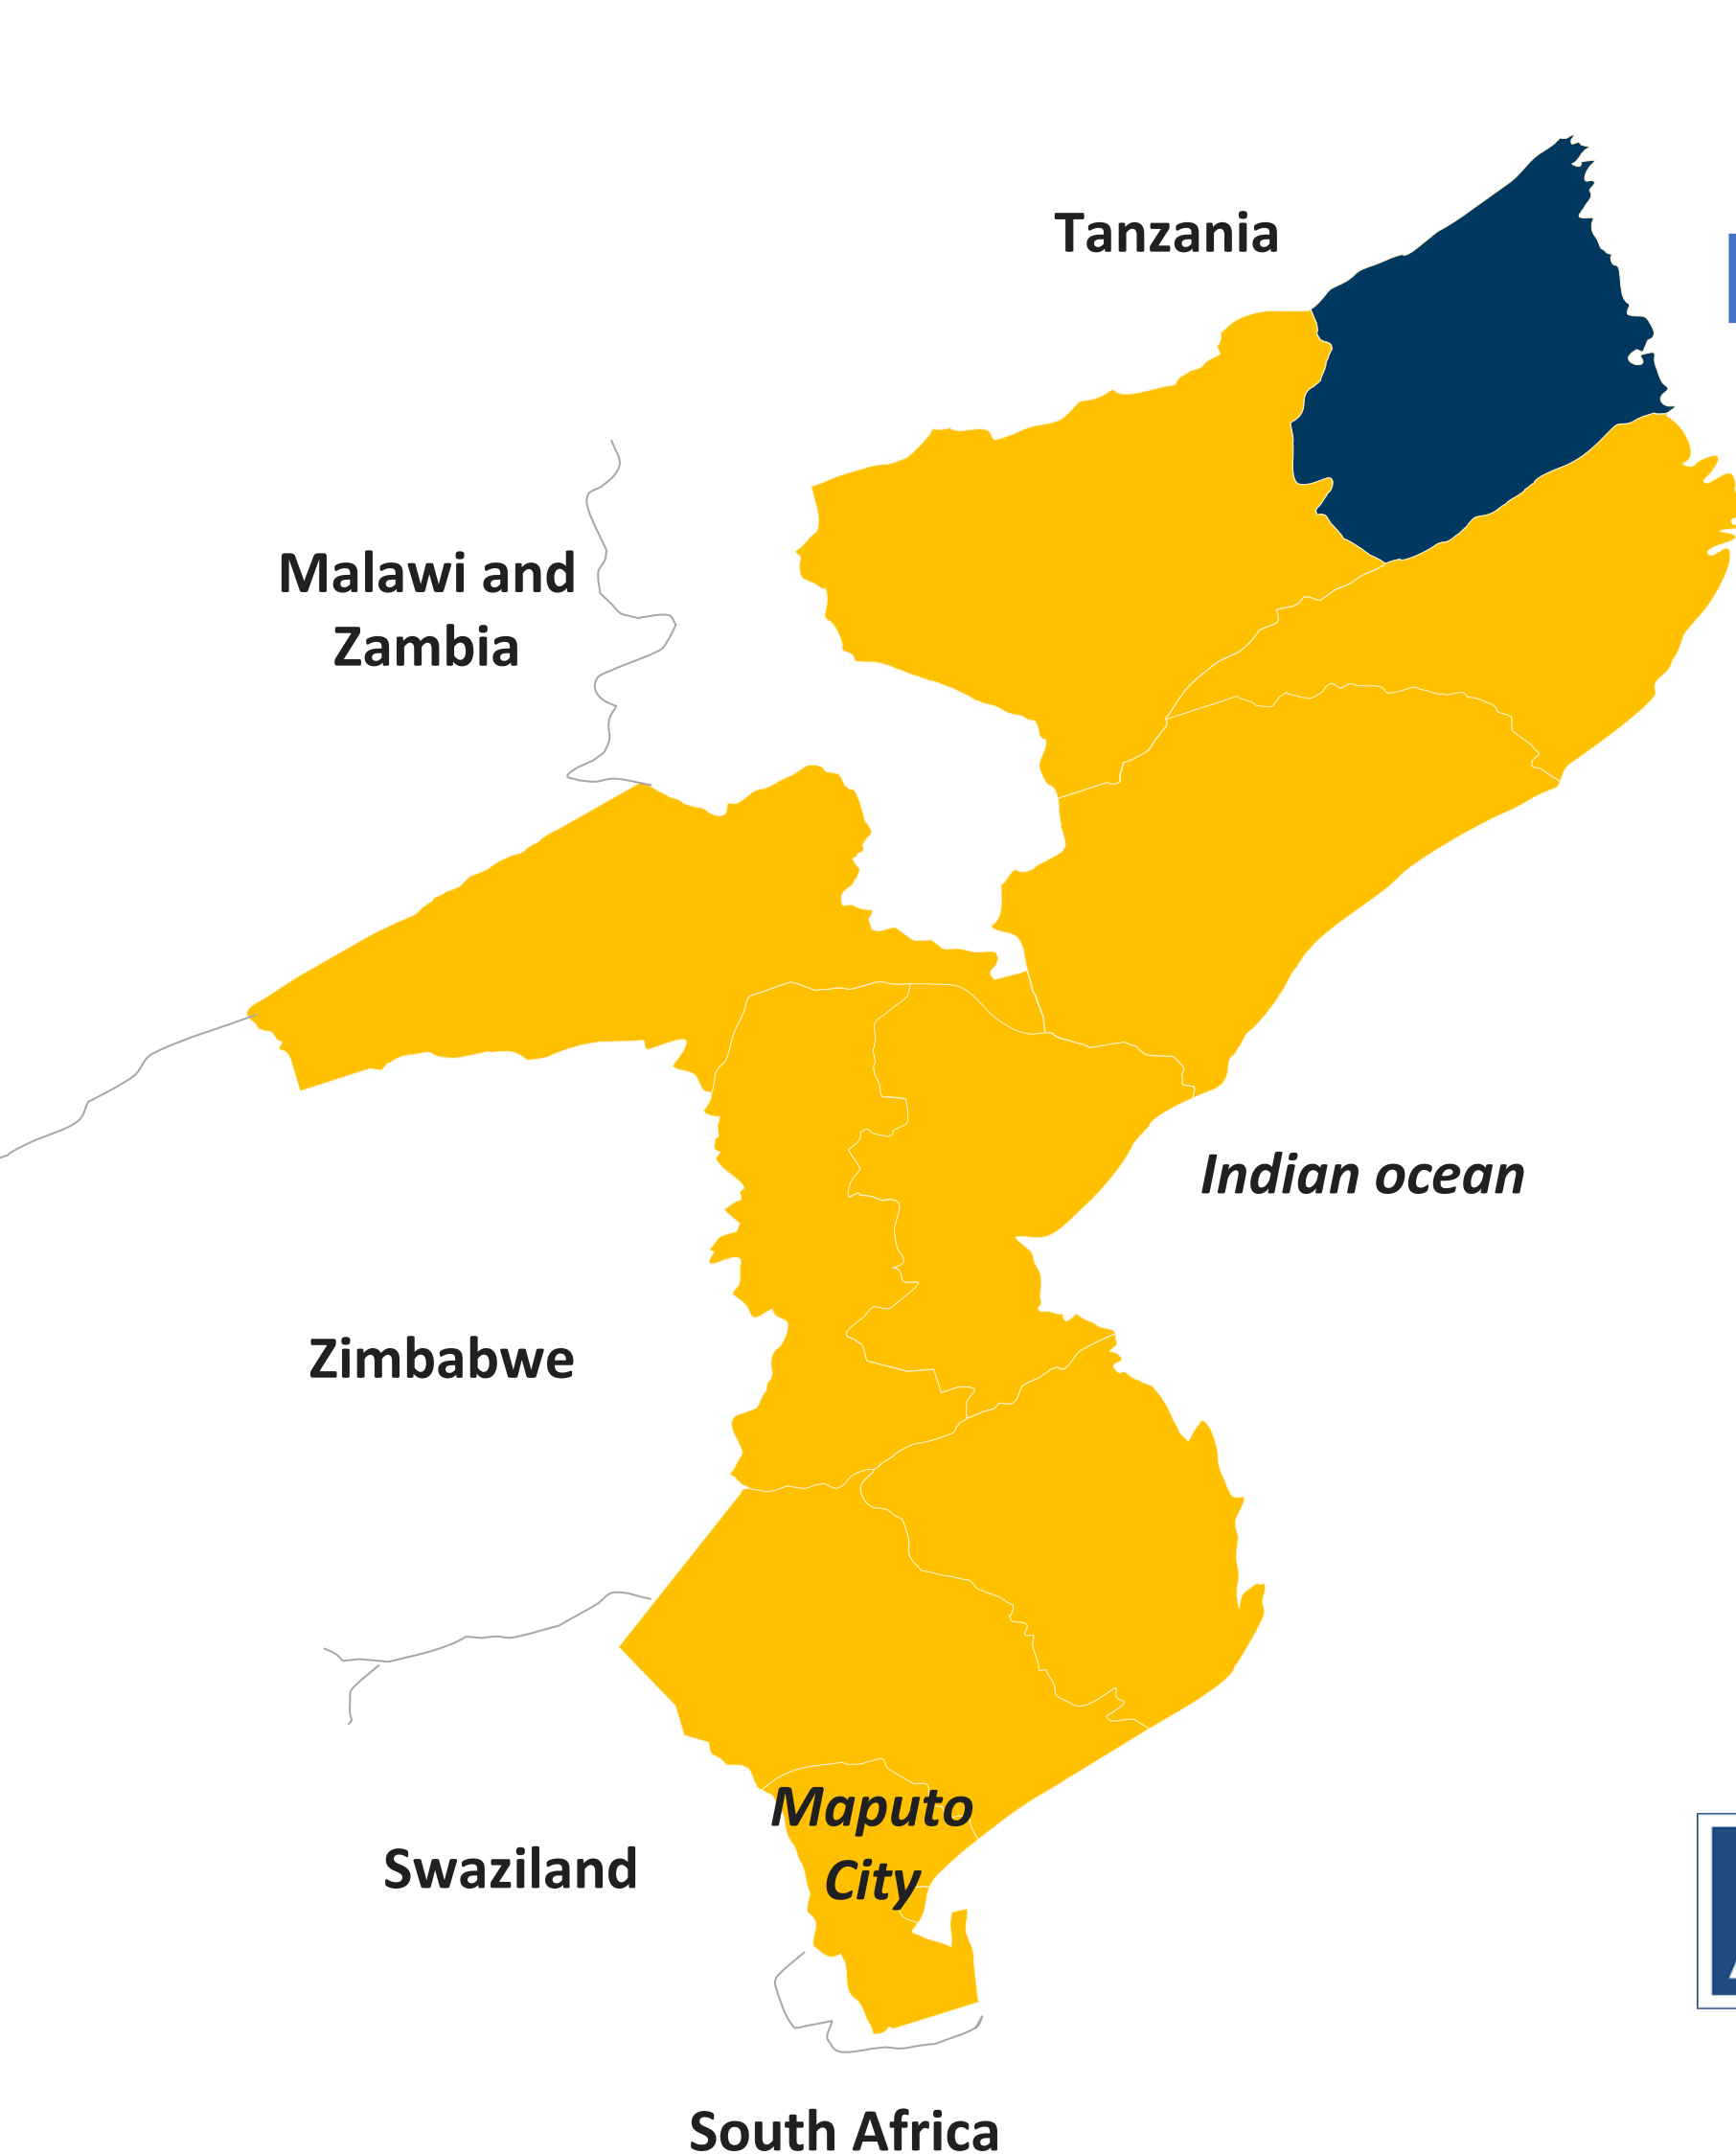

Research Reports

Edison Sept 2017 – Valuation 24.6 cents per share
 Somers May 2017 – Target price 28 cents per share

MOZAMBIQUE

A stable mining jurisdiction with a supportive government

- Population 29 million, official language Portuguese
- Cabo Delgado is a proven graphite producing region
- Mozambique has a mature mining industry, with operations in Graphite, Coal, Aluminum and Gold

An Investment Location for Majors

MOZAMBIQUE – CABO DELGADO

Engaged Community with Good Infrastructure and Local Workforce

WORLD CLASS PORTFOLIO OF GRAPHITE ASSETS

Ancuabe

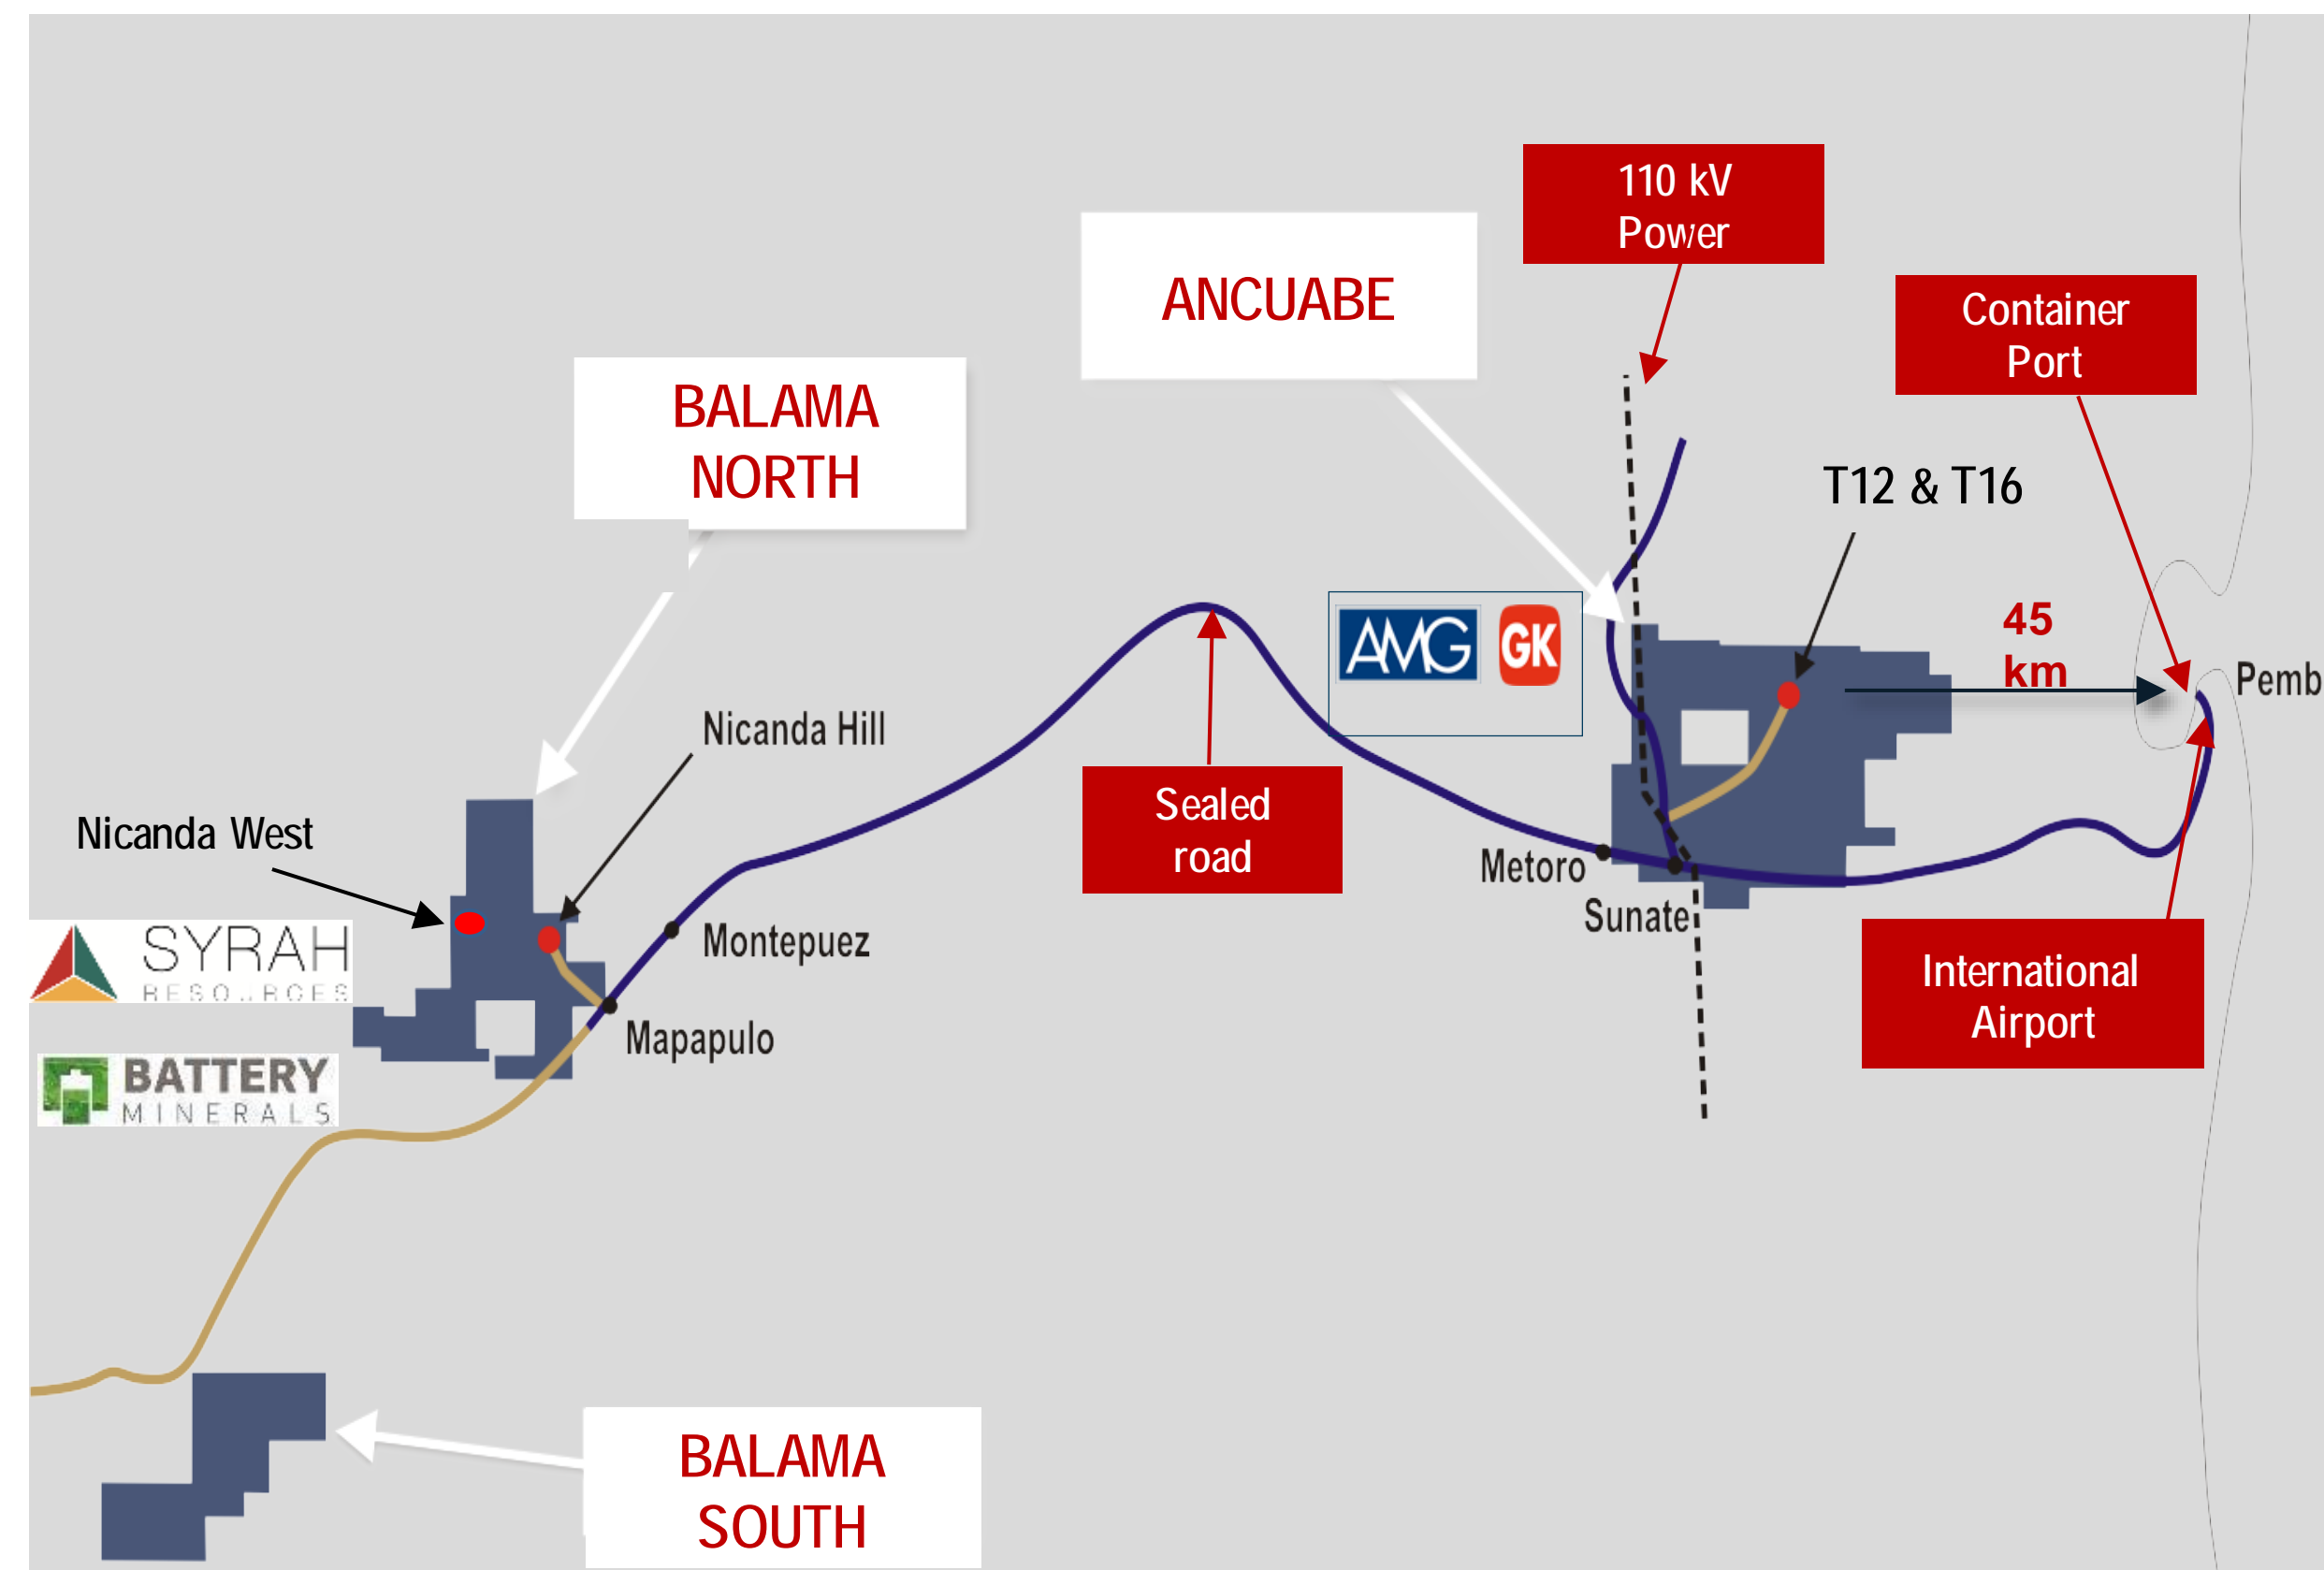

- Flagship project
- Robust Definitive feasibility study completed
- Development phase underway
- 59% large flake graphite (>180µm), 32% jumbo flake graphite (>300µm)
- Anticipated first shipment in H2 2019
- High quality large flake resource from proven graphite region suited to expandable graphite market

Nicanda Hill

- One of the world's largest graphite deposits and a globally significant vanadium deposit
- Next door to Syrah Resources' Balama Project
- Investigating joint venture opportunities
- Flake size ideally suited to the Lithium battery market

Nicanda West

- Potential follow up project to Ancuabe
- Similar high quality, large flake characteristics

Ancuabe Project

Premium Flake for Expandable Graphite Market

Infrastructure	<ul style="list-style-type: none">• Located in a proven graphite region adjacent to AMG's Ancuabe graphite mine• Best access to port, power and road infrastructure of all of the East African graphite projects. Only 80km by sealed road to the Port of Pemba.
Mineral Reserve	<ul style="list-style-type: none">• Total Indicated and Inferred Mineral Resource of 46.1 million tonnes (Mt) at an average grade of 6.6% Total Graphitic Carbon (TGC) for 3.04 Mt of contained graphite¹• JORC Compliant Ore Reserve of 24.9Mt at 6.2% TGC at Ancuabe²
Metallurgy	<ul style="list-style-type: none">• Industry leading flake size distribution and purity: Allows significantly higher prices to be achieved<ul style="list-style-type: none">• 59% large flake graphite (>180 microns), 32% jumbo flake graphite (>300 microns)• Excellent concentrate purity (average 97.5% TGC across all flake sizes) from simple flotation• Proven expandability results from Independent Testwork in Europe, China and Australia
DFS	<ul style="list-style-type: none">• Definitive Feasibility study confirms robust economics²<ul style="list-style-type: none">• Up to 60,000 tpa graphite concentrate• Unleveraged pre-tax NPV of US\$298m, pre-tax internal rate of return of 36.8% and payback period of 3.8 years
Markets	<ul style="list-style-type: none">• Ideally suited (large flake size and high purity) to the expandable graphite for flame retardant building materials• Expected markets Europe, China, Korea and Japan

1. ASX Announcement 14 December 2017 "Additional Mineral Resource Upgrade at Ancuabe Graphite Project with Increase in Confidence Level and Shows Further Upside to Soon to Be Released DFS"

2. ASX Announcement 15 December 2017 "Triton Delivers Robust Ancuabe Definitive Feasibility Study and Declares Maiden Ore Reserve"

ANCUABE PROJECT DELIVERY PHASE UNDERWAY

- **Definitive Feasibility Study** completed December 2017, confirmed Ancuabe is a high quality, long life project with robust economics¹:
 - ✓ JORC Compliant Ore **Reserve** of 24.9Mt at 6.2% Total Graphitic Carbon supports the evaluation period of least **27 years**¹
 - ✓ Unleveraged pre-tax NPV of **US\$298m**, pre-tax internal rate of return of **36.8%** and payback period of **3.8 years**
- Mining **concession** application, environmental permitting **EPDA** approved and draft **ESHIA** submitted
- Site visits completed by prospective **EPC** and **financing** partners: Sinosteel and MCC.
- Knight Piésold **commenced** detailed design for tailings, water and roads package
- Tenders underway for the Project Management Consultant and Camp contracts. Tender to be issued for bulk earthworks.

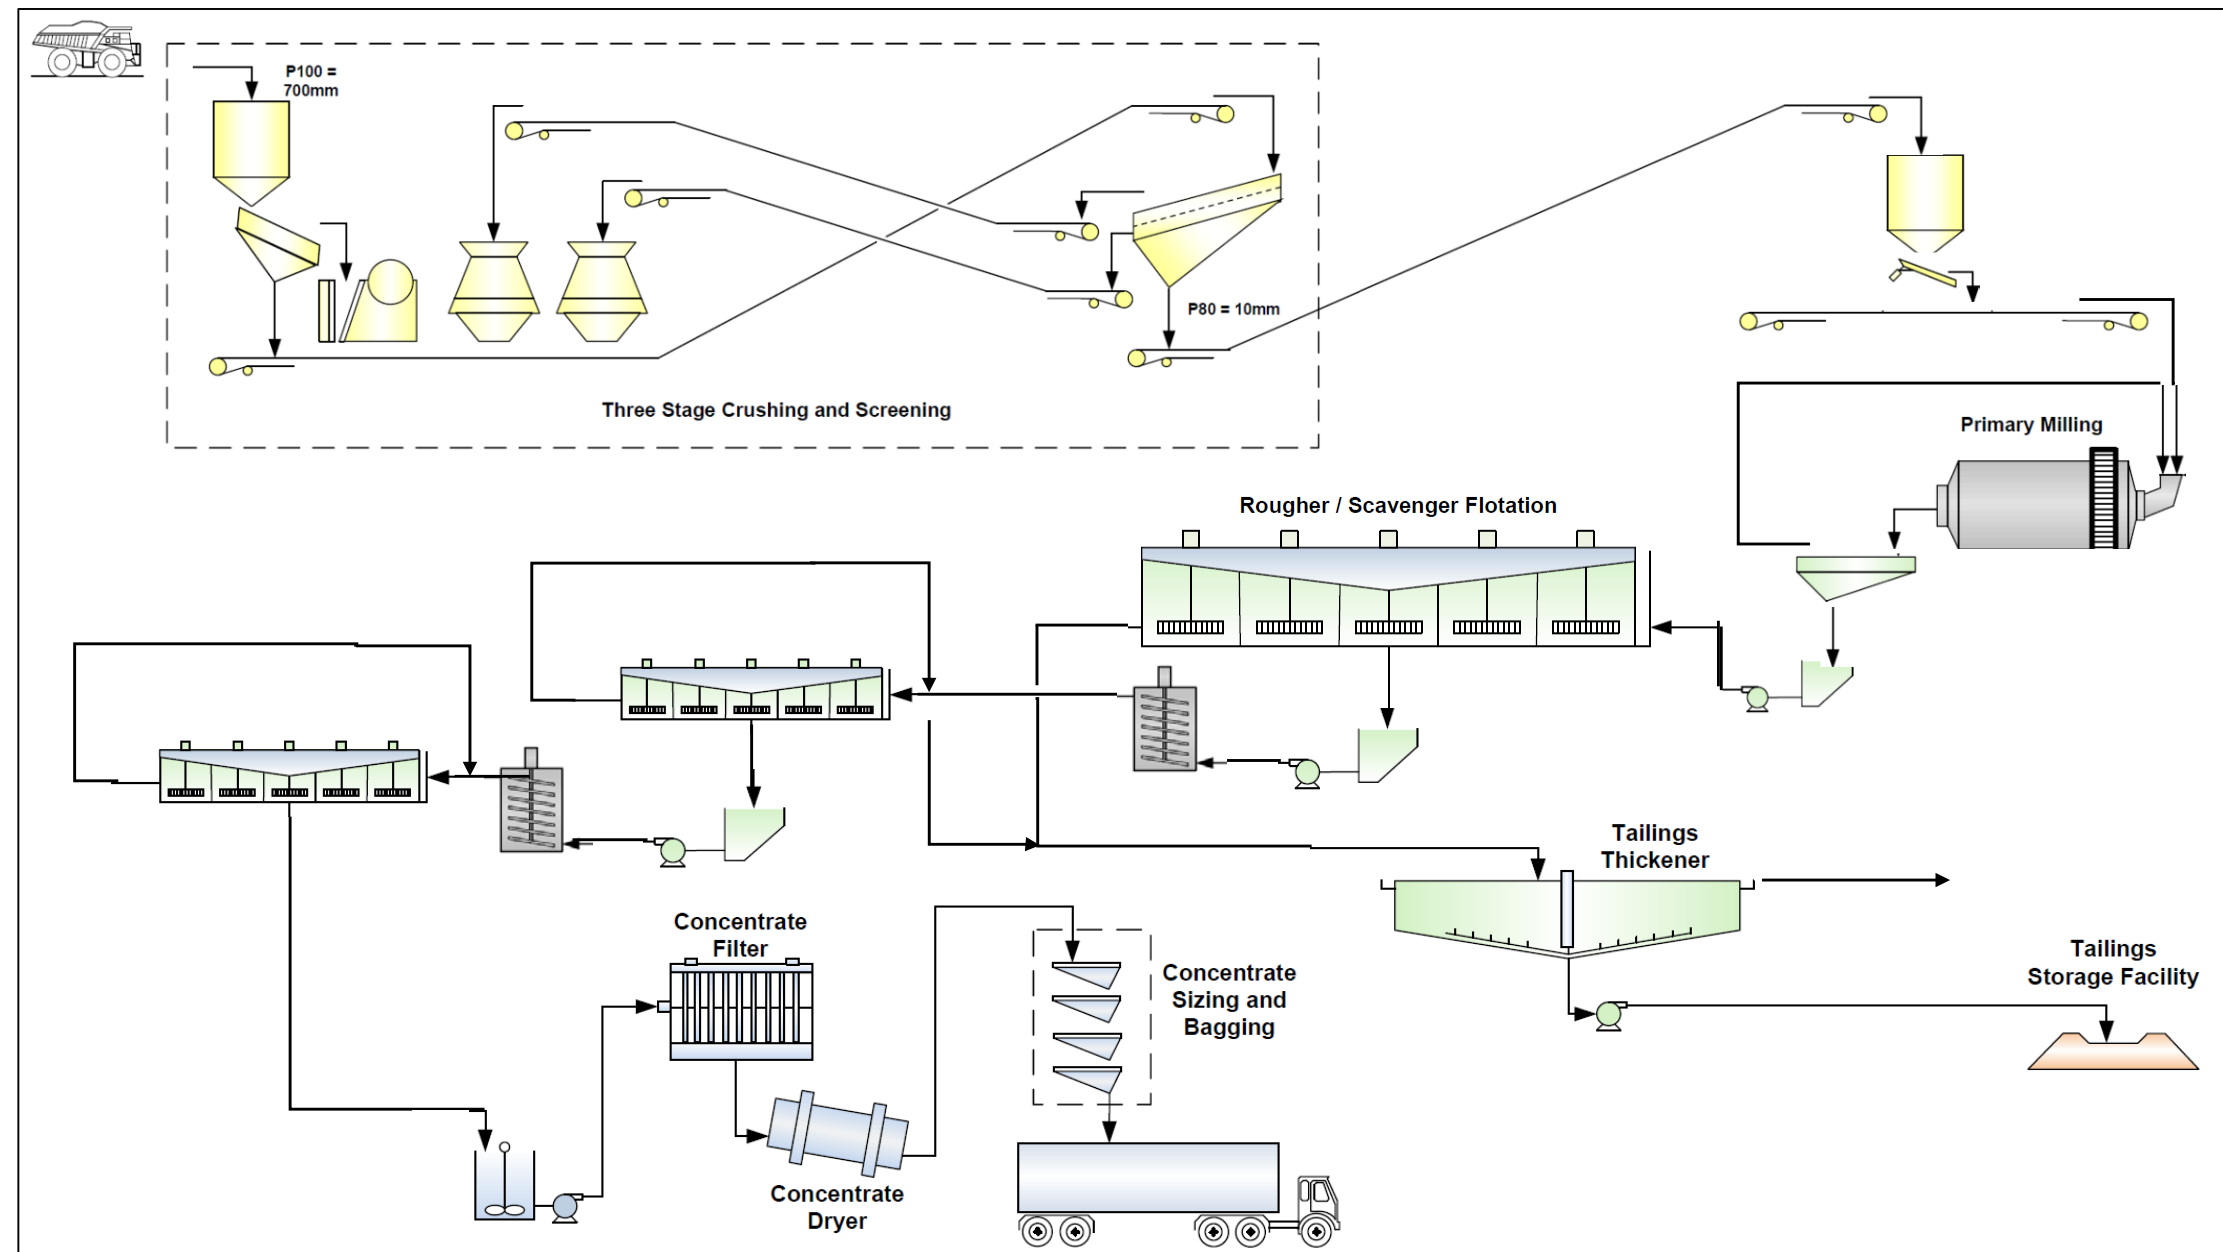

1. ASX Announcement 15 December 2017 'Triton Delivers Robust Ancuabe Definitive feasibility Study and declares maiden ore reserve'. See disclaimer and cautionary statements for further information

PROJECT OVERVIEW

FLWSHEET PILOT PLANT TESTED

- Successful **pilot plant** testing of approx. 8.5 tonnes of core from T12 and T16 completed with results expected in coming weeks
- Graphite concentrate product **samples** available for continued customer **acceptance** testing

MARKETING ACTIVITIES

- Non-binding offtake MOU's signed with:
 - ✓ Qingdao **Haida** Graphite, one of the world's largest producers of graphite, up to **25%** of Ancuabe graphite concentrate production
 - ✓ **Sinoma**, subsidiary of China's largest building materials company, up to **50%** of Ancuabe graphite concentrate production
 - ✓ Qingdao **Tianshengda** Graphite, up to **15,000** tonnes per annum, minimum **five year** term
- Discussions with potential offtake partners continue to secure **binding** agreements.
- Discussions for JV opportunities for **Nicanda Hill**, one of the **world's largest** graphite deposits and a globally significant **vanadium** deposits
- Product testwork with end customers underway including battery testwork in Japan with major battery producer
- European based technical and marketing consultant appointed to secure Ancuabe offtake and Nicanda Hill strategic partnerships. Product marketing continues in Japan, Korea and China

Grenfell Tower fire: Government minister admits cladding was banned in the UK

Who's afraid of bromine?

Flame Retardants Under Fire

How lax building rules contributed to Grenfell disaster

TRITON'S PRIMARY FOCUS IS EXPANDABLE GRAPHITE

- Graphite is expanded by immersing the natural flake graphite concentrate (usually at a grade of 95% to 99% Total Graphitic Carbon (TGC)), in a bath of acid and oxidising agents, which forces apart the crystal lattice planes
- Material is then heated up to 950°C resulting in rapid expansion
- Expanded Graphite generates inert gas when heated and extinguishes a fire by cutting off the supply of air.

Highly heat resistant

Free of heavy metals

Low material use

Non-polluting

Radiation resistant

Relatively low cost

Corrosion resistant

Reduces fume formation

Triton's expanded graphite

Foil made from expanded graphite

Graphite foam made by BASF

EXPANDABLE GRAPHITE DEMAND DRIVERS

Flame Retardant Building Materials (FRBM)

- Fire safety is rapidly becoming a global issue in commercial and residential construction
- China has recently mandated FRBM in all new buildings and will ban traditional brominate flame retardants in 2018
- Concerns over the combustibility of building materials used historically may require retrofitting of existing buildings (eg the Lacrosse Melbourne Docklands building fire in 2014 where combustible cladding was recently ordered to be replaced)
- Likely to drive the increased use of suitable flame retardant materials in all new buildings

Graphite based Flame Retardant Building Materials (FRBM)

possess:

- ✓ excellent flame suppression qualities
- ✓ improved thermal efficiency
- ✓ cost effective alternative
- ✓ denser composition

Aluminium composite panel Flammable core

Insulating core

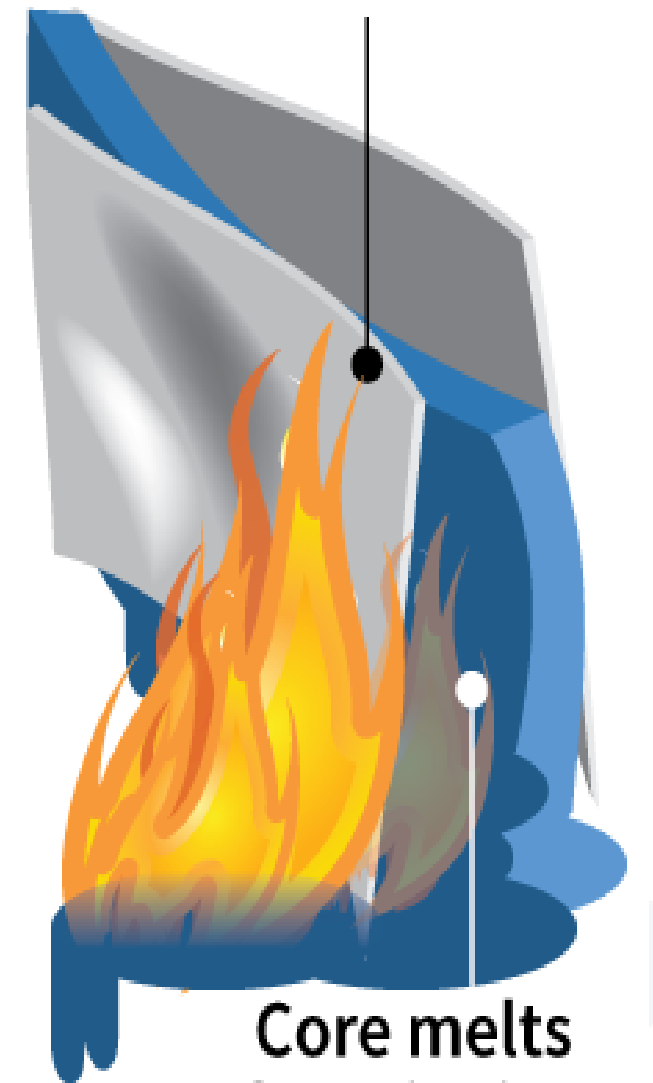

2-5mm thick,
100% polyethylene

Heat from a fire will
conduct quickly to the
core through thin
aluminium

Core loses ability to
bind, causing outer
skins to deform and
delaminate

Surfaces
0.5mm thick
aluminium skin

Core melts
and can ignite

GRAPHITE CRITICAL TO BATTERY PRODUCTION

Industry commentators remain bullish for graphite pricing and demand:

- Catalyst is **Li-ion batteries** demand for EV and battery storage – auto majors now entering the industry:

“VW will need more than 150GWh of lithium-ion battery capacity annually by 2025 for our own e-fleet alone, equivalent to at least four giga factories for battery cells.”

Mr Matthias Mueller, CEO, VW Group

“The global energy landscape is changing. Traditional centres of demand are being overtaken by fast-growing emerging markets.

The energy mix is shifting driven by technological improvements and environmental concerns.”

Mr Robert Dudley, Group CEO, BP

Graphite Extending its End Use Applications

Previously, there was one major industry investing in batteries....

Consumer Electronics

8 - 10% CAGR

Transportation

20 - 30% CAGR

Energy Storage

>30% CAGR

Consumer Devices

>15% CAGR

Source: Albemarle & Imformed

“The demand for Lithium Ion Batteries is unstoppable”

Roskill, a globally recognised voice in graphite

IMPACT FOR NATURAL FLAKE GRAPHITE

Natural Flake Graphite production will have to at least **DOUBLE** by 2025 even under conservative EV market forecasts to meet the demand **ALONE** from Li-Ion Batteries

Lithium ion battery demand | EV, Stationary & Electronics

Flake Feedstock Demand

Natural flake graphite demand is directly correlated to Lithium ion battery demand and has much more growth potential due to multiple uses

CHINESE SUPPLY DOMINANCE DECLINING

Driven by Environmental Policy & Legislation

- Environmental management a key pillar of Chinese Government policy
- China's current 5 year plan sets environmental goals to meet the UN 2030 Agenda for Sustainable Development
- Focused on growing car and bus EV capability and cleaning up major polluting industries
- Chinese graphite industry being impacted with mine closures due to government concern with poor management of acid treatment water

Typical Chinese graphite plants and poor environmental management

Pathway to Production

Aiming for first production in 2019

Timeline	Milestone
H1 2018	<ul style="list-style-type: none">➤ Anticipated binding agreements with strategic financing/offtake partners➤ Anticipated award of mining concession and environmental approvals➤ Proposed award of major works packages➤ Aim for Board investment decision and project approvals➤ Commence basic engineering, and early works workforce mobilisation➤ Identification of potential Nicanda Hill Joint Venture partners
H2 2018	<ul style="list-style-type: none">➤ Anticipated commencement of construction
2019	<ul style="list-style-type: none">➤ Anticipated completion of construction (H1) and commencement of commissioning➤ Anticipated commercial production and ramp up of operations➤ Targeting Estimated first shipment (H2)

The Triton Management Team delivered on major milestones in 2017 and continue to consistently and systematically work towards construction, commissioning and production with first shipment targeting for H2 2019

Nicanda Hill Project

One of the World's Largest Graphite Deposits For The EV Market and a Globally Significant Vanadium Deposit

Infrastructure	<ul style="list-style-type: none">• Approximately 240km by road from Pemba Port
Resource	<ul style="list-style-type: none">• 2015 JORC Inferred and Indicated Mineral Resource¹ of 1.44Bt at 11.1% TGC and 0.29% V₂O₅ for 160.3 million tonnes on contained graphite and 4.2 million tonnes on contained Vanadium (V₂O₅)• Restated JORC Resource² 1.43 Bt at 11.1% TGC• Includes Indicated Mineral Resource Estimate of 369Mt at 11.3% TGC for 41.5Mt of contained graphite
Metallurgical results and Markets	<ul style="list-style-type: none">• Nicanda Hill graphite ideally suited to supply Lithium-ion Battery market:• Predominantly fine and small flake size material
Scoping Study & DFS	<ul style="list-style-type: none">• Results of Scoping Study (ASX Announcement dated 26 November 2014 'Nicanda Hill Scoping Study'):<ul style="list-style-type: none">• 1.8Mtpa processing plant throughput for 210ktpa graphite production• US\$1.23b NPV₁₀ and IRR of 137% (pre-tax) based on US\$110m pre-production capex, LOM US\$338/t opex and US\$985/t basket price• Initial mine life of 30 years
Next Steps	<ul style="list-style-type: none">• Triton to leverage significant work undertaken to date in advancing value realisation options for the project• Investigating potential JV opportunities

¹ ASX Announcement 30 October 2015 "Nicanda Hill Resource Upgrade"

² ASX Announcement dated 16 September 2016 "Restated Mineral Resource Estimate for Nicanda Hill"

Note: There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the production target itself will be realised

LITHIUM ASSETS OPTION AGREEMENT

- Exciting opportunity to build Triton into a commodity and geographically diverse mid-tier resources company
- Acquisition may provide access to cashflow from potential royalty streams and increase the Company's attraction to potential financing partners for Ancuabe.
- Highlights of the Lithium Assets:
 - ✓ Potential royalty over lithium production from a 30-hectare portion of Location 53, the Northern part of the Mt Marion Lithium Mine.
 - ✓ Lithium exploration assets. The right to explore and mine lithium at the remainder of Location 53 and Location 59: ASX announcements suggest that tonnage and grade of the Mt Marion Lithium Mine trends to the north of the deposit, potentially into the Location 53 area.
 - ✓ Potential royalty over the Buldania Lithium Project, owed by Liontown Resources Limited
- Option must be exercised on or before 28 February 2018, extensive legal, technical and commercial due diligence is underway
- The acquisition is subject to Triton completing satisfactory due diligence and shareholder approval

INVESTMENT SUMMARY

World Class Assets

High quality graphite from a proven graphite region with excellent infrastructure and stable mining jurisdiction

Near Term Production and Robust Economics

Ancuabe DFS has demonstrated the project is commercially viable. Nicanda Hill provides JV opportunity for the battery market and Nicanda West a future expandable graphite project

Graphite Market Transformation Underway

Demand driven by EV and battery storage revolution and environmental/legislative changes, with traditional sources of supply diminishing

Delivering on Strategy

Triton's experienced management team has accelerated project development and is delivering on milestones

DISCLAIMER AND COMPETENT PERSONS STATEMENT

This presentation has been prepared by Triton Minerals Limited (Triton or the Company) and has been prepared for information purposes only. This presentation contains general and background information about the Company's activities current as at the date of the presentation and should not be considered to be comprehensive or to comprise all the information that an investor should consider when making an investment decision. The information is provided in summary form, has not been independently verified, and should not be considered to be comprehensive or complete. The Company is not responsible for providing updated information and assumes no responsibility to do so.

This presentation has been prepared without taking into account the objectives, financial situation or needs of individuals. This presentation is not, and should not be considered as, an offer, investment advice or a recommendation to acquire the Company securities or any other financial products and neither this document nor any of its contents will form the basis of any contract or commitment. Before making an investment decision prospective investors should consider the appropriateness of the information having regard to their own objectives, financial situation and needs, and seek legal, taxation and financial advice appropriate to their jurisdiction and circumstances. The Company assumes that the recipient is capable of making its own independent assessment, without reliance on this document, of the information and any potential investment and will conduct its own investigation.

This presentation is not, and should not be considered as, an offer or an invitation to acquire securities in the Company or any other financial products and neither this document nor any of its contents will form the basis of any contract or commitment. This presentation is not a prospectus. Offers of securities in the Company will only be made in places in which, or to persons to whom it would be lawful to make such offers. This presentation must not be disclosed to any other party and does not carry any right of publication. Neither this presentation nor any of its contents may be reproduced or used for any other purpose without the prior written consent of the Company.

This presentation includes certain "forward-looking statements" and opinions. Forward-looking statements and forward-looking information are frequently characterised by words such as "plan", "expect", "project", "intend", "believe", "forecast", "anticipate", "estimate" and other similar words, or statements that certain events or conditions "may", "will" or "could" occur. Although the Company believes the expectations expressed in such statements and information are based on reasonable assumptions, there can be no assurance that such information or statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such information. Past performance is not necessarily a guide to future performance and no representation or warranty is made as to the likelihood of achievement or reasonableness of any forward looking statements or other forecast.

No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness, correctness, reliability or adequacy of any statements, estimates, opinions or other information, or to the reasonableness of any assumption or other statement, contained in the presentation (any of which may change without notice). To the maximum extent permitted by law, Triton, its professional advisers and their related bodies corporate, affiliates and each of their respective directors, officers, partners, employees, advisers and agents and any other person involved in the preparation of the presentation expressly disclaim all liability and responsibility (including, without limitation, any liability arising from fault or negligence) for any direct or indirect loss or damage which may arise or be suffered through use of or reliance on anything contained in, or omitted from, this presentation.

An investment in the Company shares is subject to investment and other known and unknown risks, some of which are beyond the control of the Company. Such risks include, but are not limited to the market price of graphite, general business, economic, competitive, political and social uncertainties; the actual results of current exploration activities and feasibility studies; assumptions in economic valuations which prove to be inaccurate; possible variations of ore grade recoveries or rates; climatic conditions; political instabilities; insurrection or war; arbitrary decisions by governmental authorities; delays in obtaining government approvals or financing or in the completion of development or construction activities.

Information in relation to the Ancuabe Scoping Study, including production targets and financial information, included in this report is extracted from an ASX Announcement dated 10 May 2017 (see ASX Announcement – 10 May 2017), 'Ancuabe Scoping Study Results Highlight Premium Product with Robust Economics', www.tritonminerals.com and www.asx.com.au.

The Company confirms that all material assumptions underpinning the production target and financial information set out in the announcement released on 10 May 2017 and continue to apply and have not materially changed.

DISCLAIMER AND COMPETENT PERSONS STATEMENT

The Scoping Study referred to in this presentation has been undertaken to determine the potential viability of an open pit mine and graphite processing plant, constructed adjacent to the Ancuabe T12 and T16 deposits, and to reach a decision to proceed with more definitive feasibility studies. To achieve the range of proposed feasibility studies and potential mine development outcomes indicated in the Scoping Study, additional funding will likely be required. Investors should note that there is no certainty that Triton will be able to raise that funding when needed. It is also possible that such funding may only be available on terms that dilute or otherwise affect the value of existing Triton shares. It is also possible that Triton could pursue other 'value realisation' strategies such as sale, partial sale, or joint venture of the project. If it does, this could materially reduce Triton's proportionate ownership of the project. The Company has concluded it has a reasonable basis for providing the forward-looking statements included in this presentation and to expect that it will be able to fund the development of the project. Triton recognises that exclusion of the Inferred Mineral Resources from the mine plan reduces the potential returns for the Ancuabe Graphite Project. This will be addressed in the next and final stage of drilling, which commenced in May 2017. Given the uncertainties involved, investors should not make any investment decisions based solely on the results of the Scoping Study.

Unless otherwise stated, all dollar values are in Australian dollars (A\$). The information in this presentation remains subject to change without notice.

This presentation is not an offer of securities for sale in the United States. Any securities to be issued by the Company have not been and will not be registered under the US Securities Act of 1933, as amended (the "US Securities Act") and may not be offered or sold in the United States absent registration or an exemption from registration under the US Securities Act. No public offer of the securities is being made in the United States and the information contained herein does not constitute an offer of securities for sale in the United States. This presentation is not for distribution directly or indirectly in or into the United States or to US persons.

Distribution of this presentation may be restricted by law. Persons who come into possession of this presentation should seek advice on and observe any such restrictions. Any failure to comply with such restrictions may constitute a violation of applicable securities laws.

Competent Person Statements

The information in this announcement that relates to the Definitive Feasibility Study and resource estimates for the **Ancuabe Graphite Project** in relation to:

16 May 2017 "Testwork Confirms Ancuabe Graphite is a High Quality Product"

14 December 2017 "Additional Mineral Resource Upgrade at Ancuabe Graphite Project with Increase in Confidence Level and Shows Further Upside to Soon to Be Released DFS"

15 December 2017 "Triton Delivers Robust Ancuabe Definitive Feasibility Study and Declares Maiden Ore Reserve"

The Company confirms that it is not aware of any new information or data that materially affects the information as announced on 10 May 2017, 16 May 2017 and 30 November 2017. All material assumptions and technical parameters underpinning the results and estimates continue to apply and have not materially changed.

The information in this announcement that relates to the in situ mineral resources for the **Nicanda West Graphite Project** in relation to:

17 May 2016 "Maiden Inferred Mineral Resource – Nicanda West"

The Company confirms that it is not aware of any new information or data that materially affects the information as announced on 17 May 2016. All material assumptions and technical parameters underpinning the results and estimates continue to apply and have not materially changed.

The information in this announcement that relates to the scoping study and resource estimates for the **Nicanda Hill Graphite Project** in relation to:

16 September 2016 "Restated Mineral Resource Estimate for Nicanda Hill" and 26 November 2014 "Nicanda Hill Scoping Study"

The Company confirms that it is not aware of any new information or data that materially affects the information as announced on "16 September 2016 and 26 November 2014. All material assumptions and technical parameters underpinning the results and estimates continue to apply and have not materially changed.

THANK YOU

PETER CANTERBURY
MANAGING DIRECTOR

SUPPLEMENTARY INFORMATION

GRAPHITE MARKET PRICE UPDATE

- Unlike Lithium and Cobalt - Graphite prices have only just started to move from historical lows
- Price rises have occurred over all flake sizes – however supply of large flake high purity graphite is scarce
- Are we now seeing the beginning of the growth trend for natural flake graphite prices?

GRAPHITE

COBALT

LITHIUM

Source: LME

Source: Benchmark Minerals

WHAT'S IMPORTANT FOR GRAPHITE

Carbon purity:

Flake graphite concentrates with a greater carbon purity receive a premium price because they require less processing to remove disruptive impurities

Mesh size:

- Similar to high carbon purity grades, larger mesh sizes demand a premium
- Tighter supply conditions for these grades dictate that prices escalate rapidly at mesh sizes larger than +80 mesh
- Larger mesh size also improves the materials conductivity for higher-value applications

Source: MB Research
