## Veris to provide Land Survey Services for Western Sydney Airport project

Veris is pleased to advise its appointment to the Western Sydney Airport (WSA) project, for the provision of Land Survey Services to WSA Co Limited (WSA Co).

The Western Sydney Airport project is one of the largest transformational and civil engineering projects underway in Australia, with an estimated project value of AUD \$5.3bn. The 1,780 ha (approx.) site, located in Badgerys Creek, will deliver Sydney a second airport, which is set to open in 2026.

The Land Survey Services are a critical element of enabling and supporting the Airport Reference Design and will also provide an integral data set for future construction.

The scope of services Veris will provide to the WSA Co includes:

- Cadastral Surveys
- Topographic Survey
- Mobile Laser Scanning
- Underground Utility Surveys
- Aerial Photography & LiDAR
- Control Survey Network

In addition to this engagement, Veris has also won Underground Utility Surveying works to support the geotechnical site investigations on the WSA project.

### Commenting on Veris' award, Managing Director Adam Lamond said:

*"Veris' appointment to the Western Sydney Airport project further demonstrates the strong organic growth from our NSW teams and strategic pursuit of the Transport and Infrastructure sectors. We are proving ourselves as a trusted provider with the ability to service all surveying related aspects of significant infrastructure projects that will shape the face of Australia for many years to come."*
