

Mincor Commences Pre-Production Activities at Widgiemooltha Gold Project, WA

Mincor Resources NL (ASX: MCR) is pleased to announce that the Board has approved the commencement of pre-production activities at its 100%-owned Widgiemooltha Gold Project (WGP) in Western Australia.

The commencement of pre-production activities will ensure that the Company remains on track to be able to progress to full scale mining operations at Widgiemooltha during the current quarter.

The approved pre-production activities, which will include site earthworks, grade control drilling and associated roadworks, are scheduled to get underway this week.

Mincor has appointed Goldfields Technical Services Pty Ltd (GTS), a well-credentialed Kalgoorlie-based mining service contractor, to provide project management and technical services for the WGP. GTS has extensive experience in the management of open cut gold mining operations in the Eastern Goldfields.

Hampton Mining and Civil Services, a Kalgoorlie-based mining contractor, has been appointed to carry out the pre-production earth works.

The WGP Feasibility Study (*full details in ASX release "Gold Feasibility Study Results" dated 26 April 2017*) confirmed the economic viability of a low capital cost start-up gold operation at Widgiemooltha with ore to be treated via a toll treatment arrangement. The Company is progressing the finalisation of major contracts to enable a final mining decision.

Mincor's Managing Director, Peter Muccilli, said: *"This is another significant milestone as the Company progresses towards gold production at Widgiemooltha. It's an exciting period for the Company on a number of fronts, with our 2018 nickel exploration drilling programs and gold pre-production activities both underway."*
