Tisová – Option Period Extended to April 30, 2018

Highlights

- Option period has been extended until 30 April 2018
-

Auroch Minerals Limited (**Auroch** or the **Company**) advises that the option period over the historic Tisova Copper Mine has been extended for a further 30 days until 30 April 2018.

The extension of the option period flows from delays encountered resulting from poor weather conditions that hindered the drilling activity and resulted in a 30 day delay in the work program. This extension will allow Auroch to continue evaluation of the results received from the drilling programme completed late in 2017 and to evaluate its strategy going forward in relation to its European exploration activities.

All other terms and conditions of the Option Agreement remain the same.
