Kopang Licence and Turesi Update

On 8 November 2017 Greenpower Energy advised the market that it has secured a second district scale Guyanese Lithium project through a binding Heads of Agreement with Kopang Resources Inc a company associated with Greenpower's existing partners in Guyana, Guyana Strategic Metals Inc.

Greenpower has now been advised that all conditions have been met and the PGGs licence payment made. Greenpower will advise the market once the Minister has signed the PGGs licence and hence official grant has been received. Further details of the licence area will be advised subsequent to the grant.

On 19 January 2018 Greenpower provided the market with an exploration update relating to the Turesi Lithium prospect and associated drilling. Greenpower has been advised by its partner GSM that the drilling rig is in Georgetown, Guyana and that it will be moved to the drill site over the next two weeks. Greenpower will advise shareholders once the rig is onsite and drilling has commenced. GSM have advised that the Company's excavator was mobilized last week and has been patching the road where necessary in order to bring the drill rig through.
