PROFESSOR DONNA CROSS

Wangle Technologies Limited (Wangle or the Company) (ASX:WGL) wishes to congratulate Professor Donna Cross following the announcement of the **Early Years Initiative**, a ten-year collaboration between the Telethon Kids Institute, the Minderoo Foundation and the Western Australian Government.

The Early Years Initiative (EYI) represents a landmark effort to make Western Australia a global leader in early childhood care, drawing from local and international expertise, and under which Professor Cross will play a major role.

Due to the associated increased commitments, Professor Cross has offered her resignation as a non-executive director of Wangle, however will remain as an advisor to Wangle as the Company continues its collaboration with Telethon Kids Institute on WFI's ongoing development.

Wangle Technologies CEO Mr Sean Smith said:

"The input and guidance of Professor Cross during Wangle Family Insite's development cannot be understated and the Company thanks her for her invaluable contribution. We also understand the enormity of the Early Years Initiative which aims to address the developmental needs of our youngest children, and which will demand all of Donna's time and efforts. We are all proud of her involvement in this major and important initiative."

Professor Donna Cross said:

"While disappointed to resign as a Director from Wangle Technologies Limited, I remain very encouraged by and supportive of the efforts the Company is making to help families to work closely with their children to maximise the benefits and minimise the harms of engaging with online environments. I look forward to advising Sean and the team into the future."

WFI is available with a free 30-day trial via the Apple and Android App stores on a monthly or annual family subscription and will initially target Australia's 6 million families before a planned international expansion.

- ENDS -

ABOUT WANGLE FAMILY INSITES

Wangle Family Insites (WFI) offers parents a unique approach to ensuring the safe use of the internet by children and teenagers. By utilising Wangle's world class VPN network, backed by the research insights of childhood development research organization Telethon Kids Institute, WFI monitors mobile network patterns in real time and advises parents of potential threats as well as providing greater details and resources to parents on the threats identified.

ABOUT WANGLE TECHNOLOGIES

Wangle Technologies has developed patented algorithms that not only optimise, compress and secure the data flow to mobile devices, but facilitate real time analysis of network patterns and usage behaviours. Wangle's technology provides compelling value to consumers, service providers and enterprises looking for innovative low cost solutions for managing network capacity and use.
