## **QUARTERLY UPDATE ON ACTIVITIES FOR THE PERIOD TO 31 MARCH 2018**

### **KEY POINTS:**

- **Continued Development of the Zyber Platform**
- **Changes to the Board**

Zyber Holdings Limited (ASX: "ZYB") presents the following update on activities for the 3 month period ending 31 March 2018 (the "Quarter").

### **Product Update:**

During the Quarter the development team has been resolving issues and developing a proof of concept that will provide end-to-end encryption to the Zyber platform using blockchain technology. In the coming weeks, the team will deploy the new feature, which will be known as Zyber Secure Control, to our demonstration environment ([www.myzyber.com](http://www.myzyber.com)). Development still continues on the underlying platform despite a limited budget and resources.

### **Zyber Secure File Share - available on [myzyber.com](http://myzyber.com)**

Zyber Secure File Share offers data protection and a level of trust within an organizations' Information Technology (IT) environment. Enterprise customers install the Zyber platform and users access their own company's file share through mobile applications or a browser. The Zyber platform can also be deployed as a multi-tenant application.

This feature allows an organization to safely separate their users and data by department or even re-sell the Zyber product. This is analogous to how the Zyber team deploys and maintains the [www.myzyber.com](http://www.myzyber.com) demonstration site. At this site, we offer a free demo of 2GB and the data is kept separate from other demo customers.

### **How the data is stored?**

When files are uploaded they are done so through a secure protocol and encrypted before storage. Storage can be in a database, on a file system or in a storage service like Amazon S3 - all under IT control. When a request is made for that file, Zyber determines the permissions and decrypts the file before sending it back using a secure protocol. The keys to decrypt are only accessible to the IT

environment where the Zyber server is deployed.

### **End-to-end encryption**

End-to-end encryption requires the user to encrypt the data before uploading and only authorized users can decrypt the data for use. This means that even though the data may be stored within a company's environment, even IT cannot decrypt it. This presents a difficult challenge for hackers.

### **Zyber Secure Control**

Zyber Secure Control is a newly developing feature which offers end-to-end encryption by storing access to encrypted files in a smart contract on the blockchain. Unlike distributed file system projects, the data is still under the control of IT but is not accessible unless explicit access is given by the owner through the blockchain. Look ahead in the coming weeks for this feature to be available on [www.myzyber.com](http://www.myzyber.com).

### **General Update/New Development Direction:**

The Board continues to review opportunities to further develop the Zyber platform and its portfolio of product offerings.

During the Quarter the Company reviewed a possible investment in a private company, however notified shareholders that it would not be proceeding.

Zyber was initially listed on ASX as a business developing a secure, easy to install, mobile communication platform that allows users to transact, share data and collaborate across multiple devices and operating systems. The design of the software platform has departed from its original development objectives, which included 4 stages beginning with USB virtual desktop and ending with mobile touch virtualization. Zyber is now developing a proof of concept that will provide end-to-end encryption using blockchain technology.

Zyber has not proceeded with its previous plans to prepare provisional patent applications and will consider the most appropriate means of protection given the software's stage of development and its budget.

### **Board Changes:**

On 22 January 2018 the Company announced that Peter Wall had tendered his resignation as Non-Executive Director. Bernard Crawford joined the Board as a Non-Executive Director.

On 21 February 2018, Mr George Hatzipapas joined the Board as an Executive Director. Mr Bernard Crawford resigned from the Board.

### **Capital Structure and Finances:**

As at 31 March 2018, the Company had 650,759,725 listed shares trading under the ASX ticker "ZYB" and 260,922,443 listed options trading under the ASX ticker "ZYBOA".

During the quarter 2,681,118 listed options were converted to fully paid ordinary shares.

The Company also has 80,818,257 Exchangeable Shares on issue.

Unaudited net cash reserves as at 31 March 2018 stood at approximately \$A1.1m.

During the Quarter, the Company dual listed on the Frankfurt Stock Exchange. The trading data is Frankfurt WKN: A2AE0D and the shares will trade under the symbol "DRL".

If shareholders have any questions regarding this Quarterly Report they are welcome to contact the Company on +61 474 455 529.

George Hatzipapas  
Executive Director

### **About Zyber**

Zyber Secure Mobile Solutions ([www.zyber.com](http://www.zyber.com)) builds secure file sharing business applications with an emphasis on security, scalability and functionality. Zyber automates confidential information flow processes for industries including government, banking, healthcare, retail and the public sector.

Zyber was initially listed on ASX as a business developing a secure, easy to install, mobile communication platform that allows users to transact, share data and collaborate across multiple devices and operating systems. The design of the software platform has departed from its original development objectives, which included 4 stages beginning with USB virtual desktop and ending with mobile touch virtualization. Zyber is now developing a proof of concept that will provide end-to-end encryption using blockchain technology.

Zyber has not proceeded with its previous plans to prepare provisional patent applications and will consider the most appropriate means of protection given the software's stage of development and its budget.

### **Social Media Policy**

We believe in providing the highest levels of communications, and whilst the ASX remains the platform for market sensitive releases, we encourage all shareholders to follow Zyber on Twitter (@myzyber), LinkedIn and YouTube.

### **Notes**

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
