INDOSAT STREAMING PLATFORM TO KICK-OFF WITH WORLD CUP

TV2U International Limited (ASX: TV2) (**TV2U** or **Company**) is pleased to announce that the iStream service delivered through its agreement with Indosat Ooredoo (PT Indosat Tbk) (**Indosat**) will stream full coverage of the 2018 FIFA World Cup.

As announced on 13 June 2018, installation and integration of TV2U's technology to power the iStream platform is complete. Live broadcasts of all match fixtures will be available to subscribers in Indonesia over IP. Previous matches alongside other assets associated with the World Cup, and managed by Indosat's editorial curation team, will also be available via catch up for the duration of the sporting event.

Highlights

- **Indosat is delivering 2018 World Cup content over IP in partnership with KLIX and Visinesia, the World Cup 2018 exclusive internet broadcaster licence holder. The sporting content will be available through the iStream mobile app suite and on all other connected devices via web browser.**
- **iStream will offer several subscription options to quickly establish its profile as a go-to destination for accessing World Cup content in the region.**
- **The World Cup will become a valuable springboard for building iStream's user base before the service expands to become a broader content hub after the sporting event.**

Evolution of the iStream service

Following the World Cup, a range of on-demand and live video assets – including a mix of global, local, and user-generated content – will be available through iStream as it evolves to become a major content hub in the region. Further details pertaining to this can be found within TV2U's previous market update.

Nick Fitzgerald, TV2U's CEO, added: "The World Cup will be a big driver in getting subscribers to use and experience the iStream platform in the first instance. It'll result in strong revenues as a result of several subscription models designed to meet different content budgets of consumers in the region. And it'll also set the foundations for TV2U's platform to capitalise on the insights created by those subscribers for targeted advertising, new user acquisition, and up-sell opportunities in the second phase of iStream's lifecycle."
