

RMG holds permits in the northern part of Chile. The project is called Tuina and is located approximately 50km from the world's second largest copper mine, Chuquicamata.

The Tuina district has had mining of mantos style deposits for several decades and is considered to have significant potential for new manto discoveries and extraction of sulphide ore which to date has not been mined.

RMG is currently focused on exploration of the La Teca and Santa Rosa prospects.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
