Company Announcements Office ASX Limited Level 4, 20 Bridge Street SYDNEY NSW 2000

ACTIVITIES REPORT FOR THE QUARTER ENDED 30 JUNE 2018

No field exploration activity was undertaken during the quarter at the Millennium Zinc Project which is in joint venture with Encounter Resources Limited and the Company's only current exploration project. The Company instigated negotiations to enter two new base metal joint ventures during the quarter but without reaching agreement. It will retain an active program seeking exploration opportunities.

Hampton Hill Mining NL's (Hampton Hill) key assets remain a significant shareholding in Peel Mining Limited (Peel) and a 5% gross overriding royalty interest in the Central Tenements of the Apollo Hill Gold Project located near Leonora in the Western Australian goldfields that is owned by Saturn Metals Ltd (Saturn)..

Hampton Hill holds investments of 10.35 million shares in Peel and 1.25 million shares in Saturn which, as at the date of this report, have a total market value of approximately \$5.2 million. Peel continues to report significant exploration success from its base metal projects in the Cobar district of NSW which include the Southern Nights, Mallee Bull and Wirlong projects. Peel also holds a 36% interest in Saturn.

Saturn completed 9 diamond drill holes during the quarter and has 2 RC drilling rigs active in an effort to expand on and better define the Apollo Hill gold deposit resources which has a stated JORC 2012 compliant inferred resource of 17.2 million tonnes grading 0.9 grams /tonne gold which is based only on all drilling up to end of calendar 2011 (Refer Agricola Mining Consultants Pty Ltd Independent Geologist's Report, Saturn Prospectus dated 10 January,2018)

Shareholders are referred to the June 2018 quarterly reports of both Peel and Saturn for further details relating to these assets.

Hampton Hill also holds a 0.98% net smelter royalty plus claw back rights over the Northlander tenements owned by Evolution Mining Ltd as a minor part of their Kunanalling Project and situated about 8 kilometres east of their Mungari Processing Plant (Refer Figure 2). It has an aggressive exploration program underway in the region seeking

increased reserves for Mungari which may ultimately result in mineable resources at Northlander. The claw back rights will only be triggered in the event that a gold resource of greater than 500,000 ounces is defined (currently considered unlikely), but the royalty could well provide a useful cash flow for Hampton Hill in the future.

Notes

- The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
- 2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
