

Carnavale advances Kikagati Tin Project, Uganda

Carnavale Resources Limited (Carnavale, CAV, or the Company) is pleased to advise on the positive progress made on the Kikagati Tin Project, located in the southern Isingiro region of Uganda.

Due diligence has been completed to Carnavale's satisfaction and has confirmed the project represents an exciting large-scale exploration drill target with potential to define a significant tin resource. Field activities have included geological mapping, rock chip and soil sampling (results pending). No evidence of previous drilling has been discovered.

Large-scale walk-up drill target with significant resource potential

Importantly, extensive artisanal workings together with historic British mining adits clearly define a prospective target zone covering a continuous area of 2.5km strike by 100-200m width. The small scale local artisanal mining is intense and has focused on the numerous stacked quartz veins perpendicular to bedding and other bedding parallel and highly altered units/structures.

The proposed diamond drilling programme aims to test both the more obvious quartz veining and associated muscovite rich alteration selvages and the less obvious bedding parallel structures. The diamond drilling programme is currently being planned in detail and negotiations are underway with the preferred drilling contractor. Carnavale will provide further information on the programme design and commencement of drilling in the near term once sampling results have been received and assessed.

2,000m diamond drilling programme planned

Overall, the project is well located with a good quality sealed bitumen road from the capital city of Kampala all the way to the project, existing regional power supply to the small processing plant, excellent water supply from the bordering Kagera River with an "in stream" turbine power plant currently under construction within 2km of the project. The quality infrastructure near the project is considered positive for any future mine development.

The progression to drilling and targeting the potentially very large tin system aligns with Carnavale's strategy to acquire and explore high quality advanced exploration and development projects prospective for strategic minerals associated with the rapidly increasing demand within the electric battery sector and other new-age disruptive technologies. Tin has been identified as one of the top six most likely metals to be in increased demand by new-age disruptive technologies as an electrical contact material in robotics, electric vehicles, renewable energy generation and advanced computerisation.

Tin - increasing demand

Under the existing agreement, Carnavale may earn an initial 51% equity in APRU, the 100% owner of the Kikagati (Isingiro) Project tenements, by completing 2,000m of diamond drilling (refer to ASX release "Carnavale to Acquire Large-Scale Tin Project, Uganda" 24 April 2018). APRU have additionally agreed to extend the timeframe to complete the drilling to 15 December 2018.

Carnavale has issued 10 million shares, (pursuant to CAV's existing placement capacity under Listing Rule 7.1) and US\$50,000 to parties associated with facilitating the transaction. None of the parties are related parties of CAV.

An Appendix 3B is attached with respect to the new securities issued and the Company gives notice that:

- it issued the securities without disclosure to investors under Part 6D.2 of the Corporations Act 2001 ("Act");

Introduced 01/08/12 Amended 04/03/13

Part 1

Rule 7.1 – Issues exceeding 15% of capital	
Step 1: Calculate “A”, the base figure from which the placement capacity is calculated	
Insert number of fully paid +ordinary securities on issue 12 months before the +issue date or date of agreement to issue	571,999,560
Add the following: <ul style="list-style-type: none"> Number of fully paid +ordinary securities issued in that 12 month period under an exception in rule 7.2 Number of fully paid +ordinary securities issued in that 12 month period with shareholder approval Number of partly paid +ordinary securities that became fully paid in that 12 month period <p><i>Note:</i></p> <ul style="list-style-type: none"> Include only ordinary securities here – other classes of equity securities cannot be added Include here (if applicable) the securities the subject of the Appendix 3B to which this form is annexed It may be useful to set out issues of securities on different dates as separate line items 	<p>70 million ordinary shares issued on 23 March 2018 as part of a private placement to sophisticated investors, shareholder approval given at the general meeting on 26 July 2018.</p> <p>6 million ordinary shares issued to nominees of Directors, Mr Gajewski and Mr Beckwith on 10 August 2018 as part of a private placement, shareholder approval given at the general meeting on 26 July 2018.</p>
Subtract the number of fully paid +ordinary securities cancelled during that 12 month period	Nil
“A”	647,999,560
Step 2: Calculate 15% of “A”	

+ See chapter 19 for defined terms.

“B”	0.15 <i>[Note: this value cannot be changed]</i>
Multiply “A” by 0.15	97,199,934
Step 3: Calculate “C”, the amount of placement capacity under rule 7.1 that has already been used	
<p>Insert number of +equity securities issued or agreed to be issued in that 12 month period <i>not</i> counting those issued:</p> <ul style="list-style-type: none"> Under an exception in rule 7.2 Under rule 7.1A With security holder approval under rule 7.1 or rule 7.4 <p><i>Note:</i></p> <ul style="list-style-type: none"> <i>This applies to equity securities, unless specifically excluded – not just ordinary securities</i> <i>Include here (if applicable) the securities the subject of the Appendix 3B to which this form is annexed</i> <i>It may be useful to set out issues of securities on different dates as separate line items</i> 	10 million ordinary shares issued on 30 August 2018 as a facilitation fee for the Kikagati (Isingiro) Project.
“C”	-
Step 4: Subtract “C” from [“A” x “B”] to calculate remaining placement capacity under rule 7.1	
<p>“A” x 0.15</p> <p><i>Note: number must be same as shown in Step 2</i></p>	97,199,934
<p>Subtract “C”</p> <p><i>Note: number must be same as shown in Step 3</i></p>	10,000,000
Total [“A” x 0.15] – “C”	<p>87,199,934</p> <p><i>[Note: this is the remaining placement capacity under rule 7.1]</i></p>

+ See chapter 19 for defined terms.

Part 2

Rule 7.1A – Additional placement capacity for eligible entities	
Step 1: Calculate “A”, the base figure from which the placement capacity is calculated	
“A” <i>Note: number must be same as shown in Step 1 of Part 1</i>	647,999,560
Step 2: Calculate 10% of “A”	
“D”	0.10 <i>Note: this value cannot be changed</i>
Multiply “A” by 0.10	64,799,956
Step 3: Calculate “E”, the amount of placement capacity under rule 7.1A that has already been used	
Insert number of ⁺ equity securities issued or agreed to be issued in that 12 month period under rule 7.1A <i>Notes:</i> <ul style="list-style-type: none"> • This applies to equity securities – not just ordinary securities • Include here – if applicable – the securities the subject of the Appendix 3B to which this form is annexed • Do not include equity securities issued under rule 7.1 (they must be dealt with in Part 1), or for which specific security holder approval has been obtained • It may be useful to set out issues of securities on different dates as separate line items 	Nil.
“E”	-
Step 4: Subtract “E” from [“A” x “D”] to calculate remaining placement capacity under rule 7.1A	
“A” x 0.10 <i>Note: number must be same as shown in Step 2</i>	64,799,956
Subtract “E” <i>Note: number must be same as shown in Step 3</i>	-
Total [“A” x 0.10] – “E”	64,799,956. <i>Note: this is the remaining placement capacity under rule 7.1A</i>
